

TABLE OF CONTENTS

BASIC DERIVE COMMANDS:	1
<i>Commands and shortcuts for Algebra, 2D, and 3D Windows</i>	
INTRODUCTION:	5
<i>Main Menu, Shortcuts, Main Screen and Graphic Screen</i>	
ASSIGNMENT 1: Expressions and Functions (0.1&2)	7
<i>Arithmetic operations; entering and evaluating expressions and functions</i>	
ASSIGNMENT 2: Graphing Functions (0.3)	9
<i>Graphing functions; specifying the viewing window; graphing two functions together</i>	
ASSIGNMENT 3: Solving Equations (0.4).....	11
<i>Algebraic and numerical equation solving; other algebraic operations</i>	
ASSIGNMENT 4: Trigonometry and Exponentials (0.5&6)	13
<i>Trigonometric, exponential and logarithmic functions; the constants e and π</i>	
ASSIGNMENT 5: Limits, Part I (1.1).....	15
<i>Finding two- and one-sided limits of functions of one variable</i>	
ASSIGNMENT 6: Limits, Part II (1.4)	17
<i>Limits involving infinity</i>	
ASSIGNMENT 7: Limits, Part III (1.6)	19
<i>Loss of significance errors; scientific notation</i>	
ASSIGNMENT 8: Derivatives of Explicit Functions (2.1-7).....	21
<i>Finding first derivatives by definition; finding derivatives symbolically</i>	
ASSIGNMENT 9: Implicit Differentiation (2.8).....	23
<i>Plotting and finding derivatives for implicitly-defined curves</i>	
ASSIGNMENT 10: Newton's Method (3.2).....	25
<i>Applying Newton's method; dependence of Newton's method upon starting point</i>	
ASSIGNMENT 11: Curve Sketching (3.6)	27
<i>Curve sketching; using derivative plots to find critical points</i>	
ASSIGNMENT 12: Integration and Riemann Sums (4.1-4)	29
<i>Indefinite and definite integrals; evaluating Riemann sums</i>	
ASSIGNMENT 13: Numerical Integration (4.7).....	31
<i>Midpoint, Trapezoid and Simpson's Rules; numerical integration</i>	
ASSIGNMENT 14: Solids of Revolution (5.1-4).....	33
<i>Volume using disk and shell methods; surface area</i>	
ASSIGNMENT 15: Probability (5.7)	35
<i>Random trials; normal probability distribution</i>	

ASSIGNMENT 16: Separable Differential Equations (6.5).....	37
<i>Solving separable differential equations; graphing particular and general solutions</i>	
ASSIGNMENT 17: Euler's Method (6.6).....	39
<i>Direction fields; applying and graphing Euler's method</i>	
ASSIGNMENT 18: Integration Techniques (7.1-5).....	41
<i>Finding antiderivatives; checking answers; exceptional situations</i>	
ASSIGNMENT 19: Improper Integrals (7.7)	43
<i>Discontinuous integrands; infinite limits of integration</i>	
ASSIGNMENT 20: Infinite Series (8.2-7)	45
<i>Series of constants; finding and graphing Taylor series</i>	
ASSIGNMENT 21: Fourier Series (8.9)	47
<i>Finding and graphing Fourier series; the Gibbs phenomenon</i>	
ASSIGNMENT 22: Parametric Equations (9.1-3)	49
<i>Graphing parametric curves; calculus with parametric equations</i>	
ASSIGNMENT 23: Polar Coordinates (9.4-7)	51
<i>Graphing in polar coordinates; calculus with polar coordinates</i>	
ASSIGNMENT 24: Vectors (10.1-5)	53
<i>Vectors in two and three dimensions; vector operations and graphing vectors</i>	
ASSIGNMENT 25: Vector-Valued Functions, Part I (11.1-3)	55
<i>Graphing vector-valued functions in the plane; derivatives and reparameterization</i>	
ASSIGNMENT 26: Vector-Valued Functions, Part II (11.1-4)	57
<i>Arc length and curvature; unit tangent vectors; vectors in space</i>	
ASSIGNMENT 27: Functions of Two Variables (12.1-2)	59
<i>Graphing functions of two variables; contour plots; limits</i>	
ASSIGNMENT 28: Partial Derivatives (12.3-7)	61
<i>Functions of three variables; finding partial derivatives; gradients and local extrema</i>	
ASSIGNMENT 29: Double Integrals (13.1-3)	63
<i>Evaluating double integrals; Riemann sums; polar coordinates</i>	
ASSIGNMENT 30: Triple Integrals (13.4-7)	65
<i>Surface area; evaluating triple integrals; cylindrical and spherical coordinates</i>	
ASSIGNMENT 31: Vector Fields in the Plane (14.1-4)	67
<i>Plotting plane vector fields and flow lines; gradient fields; Green's Theorem</i>	
ASSIGNMENT 32: Vector Fields in Space (14.6-8)	69
<i>Parametrically-defined surfaces; space vector fields; flux integrals, divergence, and curl; Stokes' Theorem</i>
