Project 5-7 (pages 229-233)

Create a Photo Montage

Directions: After you have finished your project, determine whether you have completed the criteria listed in the left column. Fill in the checklist in the shaded columns below and then turn the rubric in to your teacher along with your project.

	Student Checklist		Teacher Evaluation
Criteria	**Completed**	**Not Completed**	**Comments**
Save Data File 5-7 with a new name. Display all layers.			
Resize the baby to 71 percent of its original size without distorting the image.			
Select the bottom of the flower. Create a *Flower Petal* layer and move it above the *Baby* layer.			
Erase parts of the petal that cover the baby's face.			
Select the baby's arm. Copy to create a new *Arm* layer. Move it above the *Flower Petal* layer.			
Create new layers to paint small black shadows under the baby's arm and to the left of his head.			
Blend the shadows layers, using the Darken blending mode and the Gaussian Blur filter.			
Use the Burn tool to create a light shadow near the baby.			
Flatten the image.			
Create a vignette effect by selecting a large oval around the flower, feathering the edges, and removing the unselected background.			
Follow directions to save your work.
