## **Target Your Reading**

Use this to focus on the main ideas as you read the chapter.

**Before you read** the chapter, respond to the statements below on your worksheet or on a numbered sheet of paper.

- Write an A if you agree with the statement.
- Write a **D** if you **disagree** with the statement.

2 After you read the chapter, look back to this page to see if you've changed your mind about any of the statements.

- If any of your answers changed, explain why.
- Change any false statements into true statements.
- Use your revised statements as a study guide.

Before You Read A or D		Statement	After You Read A or D
	1	A physical property can be observed with your senses.	
	2	State, density, melting point, and boiling point are chemical properties.	
	3	The ability to attract some metal objects is a physical property of lodestone.	
	4	Mass, weight, and volume are size-dependent properties.	
	5	A change of state is a chemical change.	
	6	A color change is a sign of a chemical change.	
	7	The release of energy is a sign of a physical change.	
	8	If the chemical composition of a substance changes, it has undergone a chemical change.	
	9	When wood burns, it undergoes a chemical change.	

To help understand a difficult paragraph, identify the main idea and then identify the supporting details.
