

Target Your Reading

Use this to focus on the main ideas as you read the chapter.

- **Before you read** the chapter, respond to the statements below on your worksheet or on a numbered sheet of paper.
 - Write an A if you agree with the statement.
 - Write a **D** if you **disagree** with the statement.
- After you read the chapter, look back to this page to see if you've changed your mind about any of the statements.
 - If any of your answers changed, explain why.
 - Change any false statements into true statements.
 - Use your revised statements as a study guide.

Before You Read A or D		Statement	After You Read A or D
	1	Water often causes sheet erosion when it flows in thin, broad sheets.	
	2	Streams are classified as young, mature, or old.	
	3	The stages of development of a stream depend only on the actual age of the stream.	
	4	The largest drainage basin in the United States is the Grand Canyon.	
	5	Water that soaks into the ground and collects in tiny pores in underlying rock is called groundwater.	
	6	The water table below Earth's surface always remains at the same depth.	
	7	The three major forces at work on a shoreline are waves, currents, and tides.	
	8	A longshore current runs perpendicular to the shoreline.	
	9	All sand is made of the mineral quartz.	

Make connections with memorable events, places, or people in your life. The better the connection, the more likely you will remember.
