

Reading Tip

Graphic organizers such as the Cause-Effect organizer help you organize what you are reading so you can remember it later.

Target Your Reading

Use this to focus on the main ideas as you read the chapter.

- 1 Before you read** the chapter, respond to the statements below on your worksheet or on a numbered sheet of paper.
 - Write an **A** if you **agree** with the statement.
 - Write a **D** if you **disagree** with the statement.
- 2 After you read** the chapter, look back to this page to see if you've changed your mind about any of the statements.
 - If any of your answers changed, explain why.
 - Change any false statements into true statements.
 - Use your revised statements as a study guide.

Before You Read A or D	Statement	After You Read A or D
	1 Gravity, water, wind, and glaciers are common agents of erosion.	
	2 Deposition occurs when agents of erosion lose energy and drop the sediments they are carrying.	
	3 Mass movement is the slow process of changing rock into soil.	
	4 The two broad categories of glaciers are called continental glaciers and valley glaciers.	
	5 During the most recent ice age, continental glaciers covered the entire Earth.	
	6 Valley glaciers carve deep, V-shaped valleys.	
	7 Abrasion can be caused by windblown sediment striking and wearing away the surface of rock.	
	8 Most dunes move, or migrate away from the direction of the wind.	
	9 During sandstorms, large sand grains are often carried high into the atmosphere.
