13-9 Permutations and Combinations ..... 245
13-10 Probability of Compound Events ..... 247
Tie It Together ..... 249
Before the Test ..... 250

## Note-Taking Tips

Your notes are a reminder of what you learned in class. Taking good notes can help you succeed in mathematics. The following tips will help you take better classroom notes.

- Before class, ask what your teacher will be discussing in class. Review mentally what you already know about the concept.
- Be an active listener. Focus on what your teacher is saying. Listen for important concepts. Pay attention to words, examples, and/or diagrams your teacher emphasizes.
- Write your notes as clear and concise as possible. The following symbols and abbreviations may be helpful in your note-taking.

| Word or <br> Phrase | Symbol or <br> Abbreviation | Word or <br> Phrase | Symbol or <br> Abbreviation |
| :--- | :---: | :--- | :---: |
| for example | e.g. | not equal | $\neq$ |
| such as | i.e. | approximately | $\approx$ |
| with | w/ | therefore | $\therefore$ |
| without | w/o | versus | vs |
| and | + | angle | $\angle$ |

- Use a symbol such as a star ( $\star$ ) or an asterisk (*) to emphasis important concepts. Place a question mark (?) next to anything that you do not understand.
- Ask questions and participate in class discussion.
- Draw and label pictures or diagrams to help clarify a concept.
- When working out an example, write what you are doing to solve the problem next to each step. Be sure to use your own words.
- Review your notes as soon as possible after class. During this time, organize and summarize new concepts and clarify misunderstandings.

## Note-Taking Don'ts

- Don't write every word. Concentrate on the main ideas and concepts.
- Don't use someone else's notes as they may not make sense.
- Don't doodle. It distracts you from listening actively.
- Don't lose focus or you will become lost in your note-taking.
$\qquad$
$\qquad$
$\qquad$

## In <br> 1 The Tools of Algebra

## Before You Read

Before you read the chapter, respond to these statements.

1. Write an $\mathbf{A}$ if you agree with the statement.
2. Write a $\mathbf{D}$ if you disagree with the statement.

| Before You Read | Tools of Algebra |
| :--- | :--- |
|  | • A variable represents an unknown <br> number or quantity. |
|  | - If the order of numbers multiplied is <br> changed, the product will also <br> change. |
|  | - A coordinate plane has an $x$ - and a <br> $y$-axis. |
|  | - A scatter plot sometimes shows a <br> trend in the data, but not always. |
|  | - You need an ordered pair with two <br> numbers to plot a point on a <br> coordinate plane. |

Construct the Foldable as directed at the beginning of this chapter.

## Note Taking Tips

- When you take notes, be sure to describe steps in detail. Include examples of questions you might ask yourself during problem solving.
- When searching for the main idea of a lesson, ask yourself, "What is this paragraph or lesson telling me?"
Then make certain you answer the question.
$\qquad$
$\qquad$
$\qquad$

## CHAPTER <br> 1 The Tools of Algebra

## Key Points

Scan the pages in the chapter and write at least one specific fact concerning each lesson. For example, in the lesson on variables and expressions, one fact might be that a variable is a letter or symbol used to represent an unknown value. After completing the chapter, you can use this table to review for your chapter test.

| Lesson |  |  |
| :--- | :--- | :--- |
| 1 -1 | Words and Expressions |  |
| $1-2$ | Variables and Expressions |  |
| $1-3$ | Properties |  |
| $1-4$ | Ordered Pairs and Relations |  |
| 1 1-5 | Words, Equations, Tables, and <br> Graphs |  |
| 1 Scatter Plots |  |  |

$\qquad$
$\qquad$
$\qquad$

## 1-1 Words and Expressions

## What You'll Learn Skim the text under the Now heading. List two things you will learn about in the lesson.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

# Active Vocabulary 

New Vocabulary Write the correct term next to each definition.
rules to follow when evaluating an expression with more than one operation
contains a combination of numbers and operations such as addition, subtraction, multiplication, and division
to find the numerical value of an expression

Vocabulary Link Operation is a word that is used in everyday English. Find the definition of operation using a dictionary. Explain how the English definition can help you remember how operation is used in mathematics.
$\qquad$
$\qquad$

Main Idea

## Translate Verbal

Phrases into Expressions
p. 5

## Details

Complete the operation of the numerical expressions for each verbal phrase.

1. the number of weeks in 42 days $\rightarrow 42 \square 7$
2. the difference of 18 and $13 \rightarrow 18 \square 13$
3. the quotient of 81 and $9 \rightarrow 81 \square 9$
4. the total number of students if there are 7 boys and 11 girls $\rightarrow 7$ $\square$
5. the total number of tires on 14 cars $\rightarrow 14 \square 4$
6. the sum of 51 and $39 \rightarrow 51 \square 39$
7. the product of 9 and $6 \rightarrow 9 \square 6$
8. the cost of 4 candies at $\$ 0.35$ each $\rightarrow 4 \square 0.35$

Order of Operations p. 6

Complete each step to evaluate $2[(7+9) \times 3]-15$.

## Melping You remember One classmate evaluates the expression

 $4+6 \div 2$ and gets an answer of 5 . Another classmate evaluates the same expression and gets an answer of 7 . Use the order of operations to explain which answer is correct.$\qquad$
$\qquad$
$\qquad$

## 1-2 Variables and Expressions

## What You'll Learn Skim the lesson. Write two things you already know about variables and expressions.

1. $\qquad$
$\qquad$
2. $\qquad$

## Active Vocabulary

Review Vocabulary Write a numerical expression for each verbal phrase. (Lesson 1-1)

18 books shared equally among 6 students $\qquad$ a package of 15 pencils minus 3 pencils $\qquad$
4 eggs plus 3 eggs $\qquad$

New Vocabulary Match the term with its definition by drawing a line to connect the two.
an expression with at least one variable and one operation
branch of mathematics that uses symbols a letter or symbol that represents an unknown value choosing a variable and the quantity it represents
$\qquad$
$\qquad$
Lesson 1-2 (continued)

## Main Idea

Algebraic Expressions and Verbal Phrases
pp. 11-12

## Details

Describe the steps involved in writing algebraic expressions.

Evaluate each expression if $a=3, b=7$, and $c=5$.

1. $6 c \div 15=\square$
2. $32+4 a=\square$
3. $27 a-(16-3 c)=\square$
4. $\frac{b c}{a+2}=\square$
5. $2 b-4 a=\square$

## Helping You Remember

Variable is a word used in everyday English as well as in mathematics. Write the definition of variable. Explain how the English definition can help you remember how variable is used in mathematics.
$\qquad$

## Evaluate Expressions

pp. 12-13
$\qquad$
$\qquad$
$\qquad$

## 1-3 Properties

## What You'll Learn Scan Lesson 1-3. List two headings that you would use to make an outline of this lesson.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary New Vocabulary Write the definition next to each term.

properties $\qquad$
$\qquad$
counterexample $\qquad$

## simplify

deductive reasoning

Vocabulary Link Simplify has a non-mathematical meaning as well. Use the word simplify in a non-mathematical sentence.
$\qquad$
$\qquad$
Lesson 1-3 (continued)

## Main Idea

## Details

Properties of Addition and Multiplication pp. 18-19

Simplify Algebraic Expressions
p. 20

Complete the table by writing the definition and an example of each property.

| Property | Definition | Example |
| :--- | :--- | :--- |
| Commutative <br> Property of <br> Addition |  |  |
| Associative <br> Property of <br> Multiplication |  |  |
| Additive <br> Identity |  |  |
| Multiplication <br> Identity |  |  |

Simplify each expression by filling in the blanks with a variable or number.

1. $(8+x)+2$

2. $k \times(4 \times 4)$

3. $3 \times(7 \times p)$

4. $9+(b+5)$

## Helping You Remember

In your own words, define counterexample. Tell how it is used in mathematics and why it is important.
$\qquad$
$\qquad$

## 1-4 Ordered Pairs and Relations

## What You'll Learn

Skim Lesson 1-4. Predict two things that you expect to learn based on the headings and the Key Concept box.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

Active Vocabulary
Review Vocabulary Fill in each blank with one correct term.
(Lesson 1-2)

algebraic expression
a(n) $\qquad$ with at least one $\qquad$ and one $\qquad$

New Vocabulary Label the diagram with the correct terms.

$\qquad$
$\qquad$
Lesson 1-4 (continued)

## Details

## Ordered Pairs

pp. 25-26

## Relations

p. 27

Graph each ordered pair on the coordinate plane below.
$A(6,4) \quad B(0,4) \quad C(2,1) \quad D(5,0)$

Write the relation as a table. Then write the domain and range.

| $\boldsymbol{x}$ |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
| $\boldsymbol{y}$ |  |  |  |  |

domain: $\square$

## Helping You Remember

Write two examples of coordinate systems that
are used in everyday life.
$\qquad$
$\qquad$

## 1-5 Words, Equations, Tables, and Graphs

# What You'll Learn <br> Skim the Examples for Lesson 1-5. Predict two things you think you will learn about words, equations, tables, and graphs. 

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$
$\qquad$

## Active Vocabulary

Review Vocabulary Explain how the Additive Identity Property and the Multiplicative Identity Property are the same. (Lesson 1-3)
$\qquad$
$\qquad$

New Vocabulary Fill in each blank with the correct term or phrase.
function $\quad$ a $\qquad$ where each member of the domain is paired with exactly one member in the $\qquad$
equation a mathematical__ stating that two quantities are $\qquad$
function rule the $\qquad$ performed on the input in a function to get the $\qquad$
$\qquad$
$\qquad$
Lesson 1-5 (continued)

## Main Idea

## Details

Complete each function table. Then write the rule for each function.

1. Nancy bought half as many pants as shirts.

| Number of shirts | Input $(x)$ |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Number of pants | Output $(y)$ |  |  |  |  |

Rule:
2. The recipe calls for 3 times more cups of flour than water.

| Cups of water | Input (x) |  |  |  |  |
| :---: | :---: | :--- | :--- | :--- | :--- |
| Cups of flour | Output (y) |  |  |  |  |

Rule:

Represent the function in three different ways.
For each 1,000 meters in altitude, the temperature, which is $35^{\circ} \mathrm{C}$, decreases $6.5^{\circ} \mathrm{C}$.

## Multiple Representations

p. 34
$\square$

## Helping You Remember

Name the four ways that functions can be represented.
$\square$ -
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## 1-6 Scatter Plots

## What You'll Learn

## Active Vocabulary

Review Vocabulary Complete the table below naming the operation, (addition, subtraction, multiplication, or division) that each verbal phrase represents. (Lesson 1-1)

| Verbal phrase | Operation |
| :--- | :--- |
| less |  |
| more than |  |
| quotient |  |
| total |  |
| shared equally |  |
| difference |  |
| times |  |
| sum |  |
| product |  |

New Vocabulary Define the following term from this lesson.

## scatter plot

Scan the text in Lesson 1-6. Write two facts you learned about scatter plots as you scanned the text.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$
$\qquad$

Vocabulary Link A scatter plot can be used to determine trends between two sets of data. Find the definition of trend using a dictionary. Describe how trend relates to scatter plots using your own words.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
Lesson 1-6 (continued)

## Main Idea

## Details

## Construct Scatter Plots

 p. 40pp. 41-42

## Analyze Scatter Plots

- 

Draw a scatter plot that shows each relationship.
$\underset{\sim}{\sim}$

## Heplig You Remember Describe three real life situations between

 quantities where the relationship is a positive relationship, a negative relationship, and no relationship.$\qquad$
$\qquad$
$\qquad$
$\qquad$
Compare and contrast the characteristics of scatter plot and a graphical representation of a function.

| Scatter plot | Graph of Function |
| :--- | :--- |
|  |  |
|  |  |
|  |  |

$\qquad$ DATE $\qquad$
$\qquad$

## CHAPTER <br> $\square$ <br> The Tools of Algebra

## The It Together

Complete the table with an example from the chapter.

| Property | Symbols | Example(s) |
| :--- | :--- | :--- |
| Commutative Property |  |  |
| Associative Property |  |  |
| Additive Identity |  |  |
| Multiplicative Identity |  |  |
| Multiplicative Property <br> of Zero |  |  |

Complete the graphic organizer with a term from the chapter.

triple a number and add two

| Input (x) | 0 | 1 | 2 | 3 |
| :---: | :---: | :---: | :---: | :---: |
| Output (y) | 2 | 5 | 8 | 11 |

$$
y=3 x+2
$$

$\qquad$
$\qquad$
$\qquad$

## N <br> 1 Tools of Algebra

## Before the Test

Now that you have read and worked through the chapter, think about what you have learned and complete the table below. Compare your previous answers with these.

1. Write an $\mathbf{A}$ if you agree with the statement.
2. Write a $\mathbf{D}$ if you disagree with the statement.

| Tools of Algebra | After You Read |
| :--- | :--- |
| - A variable represents an unknown <br> number or quantity. |  |
| - If the order of numbers multiplied is |  |
| changed, the product will also change. |  |$\quad$.

Math Online Visit glencoe.com to access your textbook, more examples, self-check quizzes, personal tutors, and practice tests to help you study for concepts in Chapter 1.

## Are You Ready for the Chapter Test?

Use this checklist to help you study.I used my Foldable to complete the review of all or most lessons.I completed the Chapter 1 Study Guide and Review in the textbook.I took the Chapter 1 Practice Test in the textbook.I used the online resources for additional review options.I reviewed my homework assignments and made corrections to incorrect problems.I reviewed all vocabulary from the chapter and their definitions.

## Study Tips

- Make a calendar that includes all of your daily classes. Besides writing down all assignments and due dates, include in your daily schedule time to study, work on projects, and review notes you took during class that day.
$\qquad$
$\qquad$
$\qquad$

## тй <br> 2 Operations with Integers

## Before You Read

Before you read the chapter, respond to these statements.

1. Write an $\mathbf{A}$ if you agree with the statement.
2. Write a $\mathbf{D}$ if you disagree with the statement.

| Before You Read | Operations with Integers |
| :---: | :---: |
|  | - A negative number is less than 0. <br> Every number has one absolute <br> value. |
|  | -Negative numbers can not be used in <br> division problems.- When a number is added to its <br> opposite, the sum is zero. |
|  | - The difference of two negative <br> numbers is a negative number. |

## FOLDA ${ }^{\prime}$ BES Study Organizer Construct the Foldable as directed at the beginning of this

 chapter.- When you take notes, include definitions of new terms, explanations of new concepts, and examples of problems.
- At the end of each lesson, write a summary of the lesson, or write in your own words what the lesson was about.
$\qquad$
$\qquad$
$\qquad$

## chater <br> 2 Operations with Integers

## Key Points

Scan the pages in the chapter and write at least one specific fact concerning each lesson. For example, in the lesson on integers and absolute value, one fact might be that a positive number is a number greater than zero. After completing the chapter, you can use this table to review for your chapter test.

| Lesson | Fact |  |
| :--- | :--- | :--- |
| 2 -1 | Integers and Absolute Value |  |
| $2-2$ | Adding Integers |  |
| $2-3$ | Subtracting Integers |  |
| $2-4$ | Multiplying Integers |  |
| $2-5$ | Dividing Integers |  |
| 2 Graphing in Four Quadrants |  |  |
|  |  |  |
|  |  |  |

$\qquad$
$\qquad$
$\qquad$

## 2-1 Integers and Absolute Value

## What You'll Learn <br> Skim the Examples for Lesson 2-1. Predict two things you think you will learn about integers and absolute value.

1. $\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary

New Vocabulary Match the term with the correct definition by drawing a line and connecting the two.
negative number a comparison of numbers or quantities
positive number
integers coordinate
inequality
absolute value
the distance a number is from zero on a number line a number less than zero
the counting numbers, their opposites, and zero a point on a number line or graph a number greater than zero

Vocabulary Link List three examples of how negative numbers are used in everyday life.
$\qquad$
$\qquad$

## Lesson 2-1 (continued)

## Main Idea

Compare and Order Integers
pp. 61-62

## Details

Fill in the blank with $<,>$, or $=$ to make each numerical sentence true.

1. $-19 \square-17$
2. $0 \square-3$
3. $-1+-3 \square-4$
4. $-7 \square-10-17$
5. $1-6 \square 2-4$

Absolute Value p. 63

Graph $|-5|$ on a number line. Write its value on the line below your number line. Then explain how you used a number line to find the absolute value of $\mathbf{- 5}$.

## Helping You Remember

Absolute is a word used in the English language.
Find a definition of absolute in a dictionary. Write the definition that most closely relates to mathematics. Explain how the definition you wrote down can help you remember the meaning of absolute value in mathematics.
$\qquad$
$\qquad$
$\qquad$

## 2-2 Adding Integers

## What You'll Learn

Skim Lesson 2-2. Predict two things you expect to learn based on the headings and the Key Concept box.

1. $\qquad$
2. $\qquad$

## Active Vocabulary

Review Vocabulary Label the diagram with the correct terms. (Lesson 2-1)
positive numbers negative numbers

$\qquad$
$\qquad$

New Vocabulary Fill in each blank with the correct term or phrase.
opposites

## -

two $\qquad$ with the same $\qquad$ but different $\qquad$
additive inverse -
an $\qquad$ and its $\qquad$

Vocabulary Link Opposites can have non-mathematical meanings as well. Name the opposite of the terms listed.
up
on $\qquad$
day $\qquad$
hot $\qquad$
boy $\qquad$
south $\qquad$
$\qquad$
$\qquad$
Lesson 2-2 (continued)

## Main Idea

## Details

## Add Integers

pp. 69-71
Model the addition sentence $3+(-4)$ on a number
line. Write the sum on the line under your model. Then explain in words how you used the number line to find the sum.
$\square$
$\qquad$
$\qquad$

Add More Than Two Integers
pp. 71-72

$$
\begin{array}{rlr}
5 & +(-7)-2 & \\
& =5+2+(-7) \\
& =(5+2)+(-7) & \\
& =7+(-7) & \text { Simplify. } \\
& =0 &
\end{array}
$$

Write each property used to simplify the expression.

## Helping You Remember

Suppose that one of your friends was absent from math class the day you learned to add integers. Write an explanation to your friend about how to add integers with the same signs. Then explain how to add integers with different signs.
$\qquad$
$\qquad$

## 2-3 Subtracting Integers

## What You'll Learn Scan the text under the Now heading. List two things you will learn about in the lesson.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$
$\qquad$

# Active Vocabulary 

Review Vocabulary Define each term. Include two examples in your definitions. (Lessons 2-1 and 2-2)
additive inverse $\qquad$
integer $\qquad$
$\qquad$
$\qquad$
opposites $\qquad$
$\qquad$

Vocabulary Link Integers are used in everyday life. For each description, write the integer.
four degrees below zero
twelve inches long $\qquad$
twenty-five feet below sea level
fifty dollars overdrawn
$\qquad$
$\qquad$
Lesson 2-3 (continued)

## Main Idea

## Details

## Subtract Integers

pp. 76-77

Describe how to subtract integers with the same and different signs and how to add integers with the same and different signs.

|  | Add Integers | Subtract Integers |
| :--- | :--- | :--- |
| same sign |  |  |
| different <br> signs |  |  |
|  |  |  |

Label the following diagram of a substraction sentence. Then write the subtraction sentence and solve.

Write an example for each difference described below. Then use addition to find each difference. subtract a positive integer from a positive integer $\qquad$ subtract a positive integer from a negative integer $\qquad$ subtract a negative integer from a positive integer $\qquad$ subtract a negative integer from a negative integer $\qquad$
$\qquad$
$\qquad$

## 2-4 Multiplying Integers

## What You'll Learn Scan the text in Lesson 2-4. Write two facts you learned about multiplying integers.

1. $\qquad$
$\qquad$
$\qquad$
2. $\qquad$
$\qquad$

Active Vocabulary Vocabulary Link Commute and associate are words that are used in everyday English. Find the definition of commutative and associative using a dictionary. Explain how the English definitions can help you remember how commutative and associative are used in mathematics.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## Main Idea

## Details

## Multiply Integers

pp. 83-85
Fill in the boxes to simplify each expression.

1. $-3(-5)$ $\square$
2. $-8 \times 4$ $\square$
3. $12 \times 10$ $\square$
4. $4(-2)$ $\square$
5. $-9(-7)$ $\square$ 6. $-6 \cdot 6$ $\square$

Simplify the expression given the reason for each step.

$$
-3(12+m+18)
$$

$\qquad$
$\qquad$ Commutative Property
$\qquad$ Simplify inside.

$$
=
$$

$\qquad$

## Helping You Remember

In your own words, explain why the product of three negative integers is negative. Give an example.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## 2-5 Dividing Integers

## What You'll Learn Scan the text in Lesson 2-5. Write two facts you learned about dividing integers.

1. $\qquad$
$\qquad$
$\qquad$
2. $\qquad$
$\qquad$
$\qquad$

Active Vocabulary $\quad$ Review Vocabulary Fill in the blank with the correct value. (Lessons 2-1 and 2-2)
additive inverse $\quad$ The additive inverse of -8 is $\qquad$ .
opposite $\quad$ The opposite of 6 is $\qquad$ _.
absolute value $\quad$ The absolute value of $|-9|$ is $\qquad$ .

Vocabulary Link Write two examples of how the mathematical term mean is used in everyday life.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## Lesson 2-5 (continued)

Main Idea

## Divide Integers

pp. 90-91

## Mean (Average)

p. 92

## Details

## Write positive or negative to identify each quotient.

Evan wanted to make sure his golf score average did not go above 42 . He previously scored $44,38,33,47$, and 41. Fill in the blanks to solve the equation for $x$ that will tell Evan the maximum score he could get and still have an average of 42.
$\frac{44+38+33+47+41+x}{\square}=42$ There are 6 data items.

$6\left(\frac{\square+x}{\square}\right)=42 \times \square$
$\square$
$x=\square$

Find the sum of the numerator.

Eliminate the denominator by multiplying each side by 6 .

Simplify.
Subtract 203 from each side.

Helping You Remember
Write one example of each quotient described below. Then find the quotient.
dividing a positive integer by a negative integer $\qquad$
dividing a negative integer by a negative integer $\qquad$
dividing a negative integer by a positive integer
$\qquad$
$\qquad$

## 2-6 Graphing in Four Quadrants

## What You'll Learn

Skim the lesson. Write two things you already know about graphing in four quadrants.

1. $\qquad$
$\qquad$
2. $\qquad$

## Active Vocabulary

Review Vocabulary Label the diagram with the correct terms. (Lesson 1-4)
origin
$y$-axis
$x$-axis
$x$-coordinate
$y$-coordinate
quadrants

New Vocabulary Label the diagram above with the correct quadrant: I, II, III, or IV.
$\qquad$
$\qquad$

## Details

## Graph Points

pp. 96-97

Match the ordered pairs with the correct quadrant by drawing a line to connect the coordinates with the quadrant. Circle coordinates that are not in any quadrant.
Quadrant I

$$
(-3,-3)
$$

Quadrant II

$$
\begin{equation*}
(1,-5) \tag{-2,0}
\end{equation*}
$$

Quadrant III
$(6,2)$

Quadrant IV (0, 0)

Model the following function by creating a function table with input and output values. Then graph the function.
The sum of one negative and one positive number is 3 .

## Helping You Remember

Draw a coordinate grid with points to represent your classroom and where your classmates sit. Explain how to name the location of your classmates.
$\qquad$
$\qquad$

# 2-7 Translations and Reflections on the Coordinate Plane 

What You'll Learn<br>Skim Lesson 2-7. Predict two things that you expect to learn based on the headings and the Key Concept box.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary

$\qquad$ $-$
a transformation where each point of the original figure has a corresponding figure on the other side of a line of symmetry
$\qquad$ a transformation where each point of an original figure moves the same distance in the same direction
$\qquad$ a line of reflection
New Vocabulary Write the correct term next to each definition.
$\qquad$ an operation that maps an original geometric figure onto a new figure
a transformed figure

Vocabulary Link Transform is a word that is used in everyday English. Find the definition of transform using a dictionary. Explain how the English definition can help you remember how transformation is used in mathematics.
$\qquad$
$\qquad$
Lesson 2-7 (continued)

## Main Idea

## Details

## Transformations

p. 101

## Translations and Reflections

pp. 102-103

Complete the organizer by defining the terms in your own words.

Compare and contrast translation and reflection.

|  | Translation | Reflection |
| :--- | :--- | :--- |
| How they <br> are alike |  |  |
| How they <br> are <br> different |  |  |

## Helping You Remember

Identify each type of transformation. Then describe in your own words how you know that you are correct.

$\qquad$
$\qquad$

## curne <br> 2 Operations with Integers

## The It Together

Complete the graphic organizer with a phrase to help you remember the process.

$\qquad$
$\qquad$
$\qquad$

## Nunc <br> 2. Operations with Integers

## Before the Test

Now that you have read and worked through the chapter, think about what you have learned and complete the table below. Compare your previous answers with these.

1. Write an $\mathbf{A}$ if you agree with the statement.
2. Write a $\mathbf{D}$ if you disagree with the statement.

| Operations with Integers | After You Read |
| :---: | :--- |
| - A negative number is less than 0. |  |
| - Every number has one absolute value. |  |
| - Negative numbers can not be used in |  |
| division problems. |  |$\quad$| - When a number is added to its opposite, |
| :--- |
| the sum is zero. |

Math Online Visit glencoe.com to access your textbook, more examples, self-check quizzes, personal tutors, and practice tests to help you study for concepts in Chapter 2.

## Are You Ready for the Chapter Test?

Use this checklist to help you study.
I used my Foldable to complete the review of all or most lessons.
$\square$ I completed the Chapter 2 Study Guide and Review in the textbook.
$\square$ I took the Chapter 2 Practice Test in the textbook.
$\square$ I used the online resources for additional review options.
$\square$ I reviewed my homework assignments and made corrections to incorrect problems.
$\square$ I reviewed all vocabulary from the chapter and their definitions.

## Study Tips

- Make up acronyms to remember lists or sequences. PEMDAS is one acronym for remembering the order of operations (parentheses, exponents, multiply and divide, add and subtract). (Please Excuse My Dear Aunt Sally)
$\qquad$
$\qquad$
$\qquad$

## cumber <br> 3 Operations with Rational Numbers

## Before You Read

Before you read the chapter, think about what you know about rational numbers. List three things you already know about operations with rational numbers in the first column. Then list three things you would like to learn about them in the second column.

| K | W |
| :---: | :---: |
| What I know... |  |
|  |  |
|  |  |

Construct the Foldable as directed at the beginning of this chapter.

## Note Taking Tips

- As you read each lesson, list ways the new knowledge has been or will be in your daily life.
- When you take notes, record real-life examples of how you can use fractions and decimals such as telling time and making change.
$\qquad$ DATE $\qquad$
$\qquad$

## cumb <br> 3 <br> Operations with Rational Numbers

## Key Points

Scan the pages in the chapter and write at least one specific fact concerning each lesson. For example, in the lesson on dividing rational numbers, one fact might be that reciprocals are two numbers whose product is 1 . After completing the chapter, you can use this table to review for your chapter test.

| Lesson |  |  |
| :--- | :--- | :--- |
| $3-1$ | Fractions and Decimals |  |
| $3-2$ | Rational Numbers |  |
| $3-3$ | Multiplying Rational Numbers |  |
| $3-4$ | Dividing Rational Numbers |  |
| 3-5 | Adding and Subtracting Like <br> Fractions |  |
| 3-6 | Adding and Subtracting Unlike <br> Fractions |  |
|  |  |  |

$\qquad$
$\qquad$

## 3-1 Fractions and Decimals

## What You'll Learn Scan the text under the Now heading. List two things you will learn about in this lesson.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary <br> Review Vocabulary Define inequality in your own words.

(Lesson 2-1)
inequality

New Vocabulary Match the term with its definition.
bar notation terminating decimal repeating decimal
decimals with a pattern in digits that have no end
line placed over repeating digits
decimals that divide evenly with no remainder

Vocabulary Link Terminate is a word that is used in everyday English. Find the definition of terminate using a dictionary. Explain how the English definition can help you remember how terminate is used in mathematics.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## Main Idea

Write Fractions as
Decimals
pp. 121-123

Compare Fractions and Decimals
pp. 123-124

## Details

Complete the diagram by comparing and contrasting repeating decimals and terminating decimals.

Fill in the blank with $<,>$, or $=$ to make each numerical sentence true.

1. $\frac{5}{6} \square \frac{2}{3}$
2. $-0.36 \square-\frac{1}{3}$
3. $\frac{23}{100} \square \frac{1}{5}$
4. $\frac{7}{19} \square \frac{4}{15}$
5. $-\frac{7}{8} \square-\frac{8}{9}$
6. $-\frac{1}{5} \square-0.2$
7. $\frac{3}{8} \square \frac{6}{7}$
8. $\frac{4}{11} \square \frac{5}{21}$

## Helping You Remember

In your own words, explain the difference between 0.6 and $0 . \overline{6}$. Which number is greater?
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## 3-2 Rational Numbers

## What You'll Learn Scan the text in Lesson 3-2. Write two facts you learned about rational numbers as you scanned the text.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$
$\qquad$

# Active Vocabulary 

Review Vocabulary Write the definition next to each term.
(Lessons 1-3 and 2-1)
integers $\qquad$
properties

New Vocabulary Fill in the blanks with the correct term or phrase.
rational numbers $>$ any $\qquad$ that can be written as $\qquad$

Vocabulary Link Rational is a word used in everyday English. Find the definition of rational in a dictionary. Then use the dictionary to find the antonym, or a word that means the opposite, of rational.
$\qquad$
$\qquad$
Lesson 3-2 (continued)

## Details

## Rational Numbers

pp. 128-129
Match each repeating decimal with its equivalent fraction.

| $0 . \overline{3}$ | $\frac{14}{33}$ |
| :--- | :--- |
| $0 . \overline{125}$ | $\frac{1}{3}$ |
| $0 . \overline{42}$ | $\frac{1}{33}$ |
| $0 . \overline{03}$ | $\frac{7}{9}$ |
| $0 . \overline{7}$ | $\frac{125}{999}$ |

Identify and Classify Rational Numbers
p. 130

Complete the diagram by labeling each oval with the correct set of numbers. Use the terms whole numbers and integers. Then include three examples of whole numbers, integers, and rational numbers.
Rational Numbers

## Helping You Remember

Describe the relationship among whole numbers, integers, and rational numbers, in your own words. Give an example of a number that is not rational and explain why it is not.
$\qquad$
$\qquad$
$\qquad$ DATE $\qquad$
$\qquad$

## 3-3 Multiplying Rational Numbers

## What You'll Learn

Skim Lesson 3-3. Predict two things that you learn based on the headings and figures in the lesson.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$
$\qquad$

# Active Vocabulary 

Review Vocabulary Write the correct term next to each definition. (Lessons 2-2 and 3-2)
$\qquad$ - a number less than zero
$\qquad$ the counting numbers, their opposites, and zero
$\qquad$ any number than can be written as a fraction
a number greater than zero

Vocabulary Link Multiplication is the same as repeated addition. In Lesson 2-2 you used a number line to add integers. Explain how you can use 'repeated addition' to demonstrate $4 \cdot \frac{1}{2}$ on a number line.
$\qquad$
$\qquad$

## Lesson 3-3 (continued)

## Main Idea

## Multiply Fractions

pp. 134-135

## Evaluate Expressions with Fractions

pp. 135-136

## Details

Use the model to find $\frac{3}{5} \times \frac{4}{7}$. Explain your steps on the lines below.

|  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |

$\qquad$
$\qquad$
$\qquad$

Fill in the blanks to find each product in simplest form.
Use $x=\frac{2}{3}, y=-\frac{7}{11}$, and $z=\frac{3}{5}$.

1. $x y$
$\square$
2. $\frac{5}{9} z$

3. $-2 y$

4. $x y z$
$\square \times \square \times \square=\square$

## Helping You Remember

Explain in your own words how to find the product of two fractions with a model. What portion of the model is the product?
$\qquad$
$\qquad$
$\qquad$

## 3-4 Dividing Rational Numbers

## What You'll Learn Scan Lesson 3-4. List two headings you would use to make an outline for this lesson.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary Review Vocabulary Fill in the blank with the correct term or phrase. (Lesson 2-2).

additive inverse an $\qquad$ and its opposite

New Vocabulary Write the definition next to each term.
multiplicative inverses $\qquad$
reciprocals

Vocabulary Link Reciprocal is a word that is used in everyday English. Find the definition of reciprocal using a dictionary. Explain how the English definition can help you remember how reciprocal is used in mathematics.
$\qquad$
$\qquad$
Lesson 3-4 (continued)

## Details

Divide Fractions
pp. 141-143

Place three division expressions in each section of the Venn diagram.

Simplify each expression.
Divide Algebraic Expressions p. 143

1. $\frac{x^{2}}{4} \quad \frac{x y}{2} \quad \square$
2. $\frac{b}{6 a b} \quad \frac{3 b}{a}$

3. $\frac{7}{g h} \quad \frac{5}{4 f h}$

4. $\frac{14 x}{x y} \quad \frac{1}{10 x y}$

5. $\frac{q}{12} \quad \frac{n^{2}}{2} \square$
6. $\frac{b}{2 d} \quad \frac{2}{9 c}$

## Helping You Remember

In your own words, explain how you know whether the quotient of two fractions will be less than 1 , equal to 1 , or greater than 1 .
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## 3-5 Adding and Subtracting Like Fractions

## What You'll Learn <br> Skim the examples for Lesson 3-5. Predict two things you think you will learn about adding and subtracting like fractions.

1. $\qquad$
$\qquad$
$\qquad$
2. $\qquad$
$\qquad$
$\qquad$

Active Vocabulary Review Vocabulary Write the correct term next to each definition. (Lesson 2-1).
$\qquad$ the distance a number is from zero on a number line
$\qquad$ - a number less than zero
$\qquad$ the counting numbers, their opposites, and zero
a number greater than zero

New Vocabulary Write the definition next to the term.
like fractions

Vocabulary Link Like is a word that is used in everyday English. Find the definition of like using a dictionary. Explain how the English definition can help you remember how like is used in mathematics.
$\qquad$
$\qquad$
Lesson 3-5 (continued)

Add Like Fractions
pp. 147-148

Subtract Like Fractions pp. 148-150

Complete the diagram.

| What It Is | What It Is Not |  |
| :---: | :---: | :---: |
|  | Like <br> Denominators | Non Examples |
|  |  |  |

Fill in the blanks with each difference.

1. $3 \frac{3}{5}-2 \frac{2}{5}=\square$
2. $8 \frac{3}{7}-5 \frac{5}{7}=\square$
3. $\frac{1}{9}-1 \frac{8}{9}=\square$
4. $\frac{3}{10}-\frac{9}{10}=\square$

Helping You Remember
Sketch a model to show each sum or difference.
a. $\frac{3}{10}+\frac{6}{10}$
b. $\frac{6}{7}-\frac{3}{7}$
$\qquad$
$\qquad$

## 3-6 Adding and Subtracting Unlike Fractions

Skim the lesson. Write two things you already know about adding and subtracting unlike fractions.

1. $\qquad$
$\qquad$
2. $\qquad$

# Active Vocabulary <br> opposites 

Review Vocabulary Write the definition next to the term.
(Lessons 2-2 and 3-5)
$\qquad$

New Vocabulary Label the diagram with the correct terms.
like fractions unlike fractions

Vocabulary Link Unlike can have non-mathematical meanings as well. Give an example of two things that are unlike each other. Then give an example of two things that are like each other.
unlike: $\qquad$
$\qquad$
like: $\qquad$
$\qquad$
$\qquad$

## Lesson 3-6 (continued)

## Main Idea

## Add Unlike Fractions

pp. 153-154

## Details

Shade each circle to show equivalent fractions for $\frac{1}{3}$ and $\frac{1}{2}$ using the LCD. Then write the addition sentence the model represents.

Subtract Unlike Fractions
pp. 154-155

| Find a <br> common <br> denominator. | Write each <br> fraction with <br> the common <br> denominator. | Subtract the <br> numerators, write <br> the difference over <br> the common <br> denominator. |
| :--- | :--- | :--- |

Helping You Remember
Describe two methods that you can use to add $1 \frac{1}{3}$ and $3 \frac{3}{5}$. Then find the sum.

Write each step used to find $\frac{5}{6}-\frac{1}{4}$.
$\qquad$
$\qquad$
$\qquad$

## CHAPTER <br> 3 Operations with Rational Numbers

## The It Together

Complete each graphic organizer with a phrase to help you remember the process.

$\qquad$
$\qquad$
$\qquad$

## Bum <br> 3 Operations with Rational Numbers

## Before the Test

Review the ideas you listed in the table at the beginning of the chapter. Cross out any incorrect information in the first column. Then complete the table by filling in the third column.

| K | W | L |
| :---: | :---: | :---: |
| What I know... | What I want to find out... | What I learned... |
|  |  |  |
|  |  |  |

Math Online Visit glencoe.com to access your textbook, more examples, self-check quizzes, personal tutors, and practice tests to help you study for concepts in Chapter 3.

## Are You Ready for the Chapter Test?

Use this checklist to help you study.
$\square$ I used my Foldable to complete the review of all or most lessons.I completed the Chapter 3 Study Guide and Review in the textbook.I took the Chapter 3 Practice Test in the textbook.I used the online resources for additional review options.I reviewed my homework assignments and made corrections to incorrect problems.I reviewed all vocabulary from the chapter and their definitions.

- Get a good nights rest before a test. Students that take the time to sleep usually do better than students who stay up late cramming.
$\qquad$
$\qquad$
$\qquad$

## Expressions and Equations

## Before You Read

Before you read the chapter, think about what you know about expressions and equations. List three things you already know about them in the first column. Then list three things you would like to learn about them in the second column.

| K | W |
| :---: | :---: |
| What I know... |  |
|  |  |
|  |  |

Construct the Foldable as directed at the beginning of this chapter.

## Note Taking Tips

- When you take notes, listen or read for main ideas. Then record those ideas for future reference.
- Write down questions that you have about what you are reading in the lesson. Then record the answer to each question as you study the lesson.
$\qquad$
$\qquad$
$\qquad$

## antiv <br> 4 Expressions and Equations

## Key Points

Scan the pages in the chapter and write at least one specific fact concerning each lesson. For example, in the lesson on simplifying algebraic expressions, one fact might be that a term without a variable is called a constant. After completing the chapter, you can use this table to review for your chapter test.

|  | Lesson | Fact |
| :--- | :--- | :--- |
| $4-1$ | The Distributive Property |  |
| $4-2$ | Simplifying Algebraic Expressions |  |
| $4-3$ | Solving Equations by Adding or <br> Subtracting |  |
| $4-4$ | Solving Equations by Multiplying <br> or Dividing |  |
| $4-5$ | Solving Two-Step Equations |  |
| $4-6$ | Writing Equations |  |

$\qquad$
$\qquad$

## 4-1 The Distributive Property

## What You'll Learn <br> Skim Lesson 4-1. Predict two things that you expect to learn based on the headings and the Key Concept box.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary

New Vocabulary Write the definition next to each term.
equivalent pressions

Distributive Property $\qquad$

Vocabulary Link Distribute is a word that is used in everyday English. Find the definition of distribute using a dictionary. Explain how the English definition can help you remember how distributive is used in mathematics.
$\qquad$
$\qquad$

## Lesson 4-1 (continued)

## Details

## Numerical Expressions

 pp. 171-172Complete each expression using the Distributive Property.

1. $5(3+4)=5 \cdot 3+5 \cdot$ $\square$
2. $6(4-1)=6 \cdot \square-6 \cdot 1$
3. $2(8-7)=2 \cdot \square-2 \cdot \square$
4. $3(4+9)=\square \cdot 4+\square \cdot 9$
5. $(2+5) 8=2 \cdot 8+5 \cdot$ $\square$
6. $(6-3) 7=\square \cdot 7-\square \cdot 7$

Model the expression 3( $x+2$ ). Then model 3 groups of $x$ and 3 groups of 2 . Write two equivalent expressions below your model.

Algebraic Expressions pp. 172-173
$\qquad$
$\qquad$
$\qquad$

## 4-2 Simplifying Algebraic Expressions

## What You'll Learn

## Active Vocabulary

coefficient
constant
like terms
simplest form
simplifying the expression

Scan Lesson 4-2. List two headings you would use to make an outline of this lesson.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

New Vocabulary Match the term with its definition by drawing a line to connect the two.
a term without a variable
each part of an algebraic expression
terms that contain the same variables
the numerical part of a term that contains a variable
an algebraic expression that has no like terms and no parentheses
$\qquad$
$\qquad$

Parts of Algebraic Expressions
pp. 178-179

## Details

Identify the parts of the algebraic expression below.

$$
4 x+9 y+7 y-2 x+5
$$

How many terms are there in the expression? $\qquad$

How many sets of like terms are there? $\qquad$

Circle one pair of like terms. $\qquad$

List another pair of like terms. $\qquad$

What is the constant term? $\qquad$

Simplify Algebraic Expressions
pp. 179-180

Simplify each expression by combing like terms.

1. $4 x+3 x=\square x$
2. $10+4 y+6 y=10+\square y$
3. $15 a+6 b-3 b+2 a=\square a+\square b$
4. $3 t+1+8 t-6=\square t-\square$
5. $2 m-4 k+3-8 m+2=\square m-\square k+\square$

## Helping You Remember

Constant is a word used in everyday English as well as in mathematics. Write the definition of constant. Explain how the English definition can help you remember how constant is used in mathematics.
$\qquad$

## 4-3 Solving Equations by Adding or Subtracting

## What You'll Learn <br> Skim the Examples for Lesson 4-3. Write two things you already know about solving equations by adding or subtracting.

1. $\qquad$
$\qquad$
2. $\qquad$

## Active Vocabulary

New Vocabulary Write the correct term next to each definition.
$\qquad$
a mathematical sentence that contains an equals sign (=)
$\qquad$ -
$\qquad$ a value for the variable that makes an equation true

Vocabulary Link Inverse operations can have non-mathematical meanings as well. For each activity, name the inverse operation that would undo the activity.
turning on a light switch $\qquad$
driving 5 miles north $\qquad$
tying a shoelace $\qquad$
opening a window
$\qquad$
$\qquad$

## Details

Solve Equations by Adding
pp. 184-185

Fill in the blanks to solve each equation.

1. $x-2=7$
2. $y-4=-3$

3. $b-1 \frac{2}{3}=\frac{1}{6}$

4. $c-6.2=-9.7$

Solve Equations by Subtracting
pp. 185-186

Model the following situation by drawing algebra tiles. Then solve.

Grace and Carrie have 14 necklaces combined. Carrie has 9 necklaces. How many does Grace have?

## Helping You Remember

How is adding the same number of blocks to each side of a balance scale like the Addition Property of Equality?

$\qquad$

## 4-4 Solving Equations by Multiplying or Dividing

## What You'll Learn

Skim the lesson. Write two things you already know about solving equations by multiplying and dividing.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$
$\qquad$

Review Vocabulary Label the diagram with the correct terms. (Lesson 4-2)
constant variable

$\qquad$
$\qquad$
Lesson 4-4 (continued)

## Main Idea

## Details

Solve Equations by Dividing
pp. 191-192

## Solve Equations by Multiplying

p. 193

Fill in the blanks to solve each equation.

1. $3 m=18$

$m=\square$
2. $0.6 s=-42$

$s=\square$
3. $-5 n=35$

4. $-8 t=-48$

Write an equation to represent the model below. Then solve.

## Helping You Remember

Write two examples of equations that can be solved using each of the four properties of equations below.

Addition Property of Equality: $\qquad$
Subtraction Property of Equality: $\qquad$

Multiplication Property of Equality: $\qquad$
Division Property of Equality: $\qquad$
$\qquad$
$\qquad$

## 4-5 Solving Two-Step Equations

## What You'll Learn Scan the text in Lesson 4-5. Write two facts you learned about solving two-step equations.

1. $\qquad$
$\qquad$
2. $\qquad$

## Active Vocabulary

Review Vocabulary Identify the following inverse operations. Draw a line from each operation to its inverse. (Lessons 4-3 and 4-4).

| addition | addition |
| :--- | :--- |
| subtraction | subtraction |
| multiplication | multiplication |
| division | division |

New Vocabulary Define the following terms from this lesson.
two-step equation

Vocabulary Link Two-step equations can be illustrated by real-world examples. Consider the two-step process of putting on socks and putting on shoes. Explain how to "undo" the process. Write an example of another real-world process that takes two steps to "undo".
$\qquad$
$\qquad$
Lesson 4-5 (continued)

## Main Idea

## Details

Solve Two-Step Equations
pp. 199-201

Justify each step used in solving the equation.

$$
\begin{aligned}
6 x-14 & =16 \\
6 x-14+14 & =16+14 \\
6 x & =30 \\
\frac{6 x}{6} & =\frac{30}{6} \\
x & =5
\end{aligned}
$$

$\qquad$
$\qquad$
$\qquad$
$\qquad$

Solve the equation given the justification for each step.

| $\frac{y}{9}+4$ | $=-2$ |
| ---: | :--- |
| $\square$ | $=\square$ |
| $=\square$ | Subtraction Property of Equality |
|  | $=\square$ |
| $\square$ | Simplify. |
| $y$ | $=\square$ |
| Multiplication Property of Equality |  |
| $\square$ | Simplify. |

## Helping You Remember

List the steps you would use in the order you would use them to "undo" each equation.
$2 x+17=35$ $\qquad$
$\qquad$
$\frac{x}{6}-1=18$ $\qquad$
$\frac{x+3}{4}=5$
$\qquad$
$\qquad$
$\qquad$

## 4-6 Writing Equations

## What You'll Learn <br> Scan the text under the Now heading. List two things you will learn about in the lesson.

1. $\qquad$
$\qquad$
2. $\qquad$

Review Vocabulary Complete the table below listing words that indicate each operation. Use the words below the table. (Lesson 1-1)

| Addition | Subtraction | Multiplication | Division |
| :--- | :--- | :--- | :--- |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |

| decreased by | difference |
| :--- | :--- |
| increased by | less |
| less than | more than |
| product | quotient |
| sum | times |
| total | twice |

$\qquad$
$\qquad$

## Lesson 4-6 (continued)

Main Idea

## Details

Write Two-Step Equations
pp. 205-206

Answer each question using the information below.
Miguel and Carla spent $\$ 64$ at the bookstore combined. Carla spent $\$ 15$ less than Miguel.

1. Who spent less money at the bookstore? $\qquad$
2. How much less? $\qquad$
3. Write an expression to represent the amount of money Miguel spent, in terms of $m$. $\qquad$
4. Write an expression to represent the amount of money Carla spent, in terms of $m$. $\qquad$
5. Write an equation to represent the amount Miguel and Carla spent combined, in terms of $m$. $\qquad$
6. How much did each person spend at the bookstore?
$\qquad$

## Two-Step Verbal Problems

p. 206

Write a verbal sentence to represent the equation below. Then solve.

$$
\frac{x}{12}+4=16
$$

$\qquad$
$\qquad$

## Helping You Remember

Write a word problem that can be solved using a two-step equation. Solve the equation.
$\qquad$
$\qquad$
$\qquad$ DATE $\qquad$
$\qquad$

## Expressions and Equations

## Tie It Together

Complete the graphic organizer to review writing and solving equations.
Georgia and her brother collected cans for a recycling program. Georgia collected three more than twice as many cans as her brother. They collected a total of 213 cans. How many cans did each person collect?

| Steps |
| :--- | :--- | :--- |
| Write the equation by translating <br> from words to symbols, to the <br> equation. |
| Combine ___ terms. |

$\qquad$
$\qquad$

## CMAPTER <br> Expressions and Equations

## Before the Test

Review the ideas you listed in the table at the beginning of the chapter. Cross out any incorrect information in the first column. Then complete the table by filling in the third column.

| K | W | L |
| :---: | :---: | :---: |
| What I know... | What I want to find out... | What I learned... |
|  |  |  |
|  |  |  |
|  |  |  |

Math Online Visit glencoe.com to access your textbook, more examples, self-check quizzes, personal tutors, and practice tests to help you study for concepts in Chapter 4.

## Are You Ready for the Chapter Test?

Use this checklist to help you study.I used my Foldable to complete the review of all or most lessons.I completed the Chapter 4 Study Guide and Review in the textbook.I took the Chapter 4 Practice Test in the textbook.I used the online resources for additional review options.I reviewed my homework assignments and made corrections to incorrect problems.I reviewed all vocabulary from the chapter and their definitions.

## Study Tips

- When you are preparing to read new material, scan the text first, briefly looking over headings, highlighted text, pictures, and call out boxes. Think of questions you might answer as you read.
$\qquad$
$\qquad$

## CHAPTER <br> 5 <br> Multi-Step Equations and Inequalities

## Before You Read

Before you read the chapter, think about what you know about solving multi-step equations and inequalities. List three things you already know about them in the first column. Then list three things you would like to learn about them in the second column.

| K | W |
| :---: | :---: |
| What I know... |  |
|  |  |

Construct the Foldable as directed at the beginning of this chapter.

## $\int$ Note Taking Tips

- A visual (graph, diagram, picture, chart) can present information in a concise, easy-to-study format.
Clearly label your visuals and write captions when needed.
- When you take notes, you may wish to use a highlighting marker to emphasize important concepts.
$\qquad$
$\qquad$

## CHAPTER <br> 5 Multi-Step Equations and Inequalities

## Key Points

Scan the pages in the chapter and write at least one specific fact concerning each lesson. For example, in the lesson on inequalities, one fact might be that an inequality is a mathematical sentence that compares quantities that are not equal. After completing the chapter, you can use this table to review for your chapter test.

| Lesson | Fact |  |
| :--- | :--- | :--- |
| $5-1$ | Perimeter and Area |  |
| $5-2$ | Solving Equations with Variables <br> on Each Side |  |
| $5-3$ | Inequalities |  |
| $5-4$ | Solving Inequalities |  |
| $5-5$ | Solving Multi-Step Equations and <br> Inequalities |  |

$\qquad$
$\qquad$
$\qquad$

## 5-1 Perimeter and Area

## What You'll Learn Scan the text in Lesson 5-1. Write two facts you learned about perimeter and area as you scanned the text.

1. $\qquad$
$\qquad$
2. $\qquad$

# Active Vocabulary <br> Review Vocabulary Fill in each blank with the correct term or 

 phrase. (Lesson 1-2)variable a $\qquad$ or $\qquad$ that represents an
$\qquad$ value
algebraic expression
perimeter
formula

New Vocabulary Match the term with its definition by drawing a line to connect the two.
area distance around a geometric figure
equation that shows a relationship among certain quantities measure of the surface enclosed by a figure
$\qquad$
$\qquad$
Lesson 5-1 (continued)

## Details

## Perimeter

pp. 221-222

Area
pp. 222-223

Complete the diagram by labeling each figure so that its perimeter is equal to 24 millimeters.

Model a triangle with height of 12 inches and base length of 10 inches. Then find its area.

## Helping You Remember

Compare and contrast the units used for perimeter and area. Explain why area uses square units and perimeter does not.
$\qquad$
$\qquad$
$\qquad$

## 5-2 Solving Equations with Variables on Each Side

## What You'll Learn Scan the text under the Now heading. List two things you will learn about in the lesson.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

Active Vocabulary $\int$ Review Vocabulary Fill in each blank with the correct term or phrase. (Lessons 4-2 and 4-3)
like terms $\quad$ terms that contain the same $\qquad$
simplest form $\quad$ an algebraic expression that has no $\qquad$ terms and no
$\qquad$
simplifying the expression $-\quad$ You can use the $\qquad$ to combine like terms.
allows you to $\qquad$ or $\qquad$ the same quantity

Additive or Subtraction Properties of Equality
from each side of an $\qquad$ to keep the two sides equal

Vocabulary Link Equality is a word that is used in everyday English. Find the definition of equality by using a dictionary. List an example of something in your life that has equality.
$\qquad$
$\qquad$

## Lesson 5-2 (continued)

## Details

Equations with Variables on Each Side pp. 229-230

Model the equation $3 x-2=5 x-4$ using algebra tiles. Then solve.

Fill in the blanks to solve each equation.

1. $2 x+5=3 x$
$\square=x$
2. $7 b+5=-3 b-10$

$$
\begin{aligned}
10 b & =\square \\
b & =\square
\end{aligned}
$$

3. $21-16 t=4 t-14$
4. $0.8 y+1.6=0.6 y-1$

$$
\begin{aligned}
0.2 y & =\square \\
y & =\square
\end{aligned}
$$

5. $9 a-3=15$

$a=\square$
6. $18 x+6=9-3 x$
$\square x=3$
$x=$

## Helping You Remember

Write an equation with a variable on both sides, along with all the steps needed to solve the equation. Trade with a partner. Then each of you should explain verbally why each step in solving the equation was carried out.
$\qquad$
$\qquad$
$\qquad$

## 5-3 Inequalities

## What You'll Learn <br> Skim the lesson. Write two things you already know about inequalities.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary <br> Review Vocabulary Write the term next to each definition.

(Lesson 2-1)
$\qquad$
$\longrightarrow$ the counting numbers, their opposites, and zero
$\qquad$ a number greater than zero

New Vocabulary Write the definition next to the term.
inequality $\qquad$
$\qquad$

Vocabulary Link Inequality is a word that is used in everyday English. Find the definition of inequality using a dictionary. Explain how the English definition can help you remember how inequality is used in mathematics.
$\qquad$
$\qquad$
Lesson 5-3 (continued)

## Main Idea

## Write Inequalities

pp. 234-235

## Graph Inequalities

p. 236

## Details

Fill in the organizer with words that describe the symbols.

Write an inequality for each model.

1. $\qquad$

2. $\qquad$

## Helping You Remember

Write a paragraph explaining how to graph an inequality to a classmate that was absent from class the day it was taught. Include an explanation of the symbols used, as well as the use of open and closed dots or points.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## 5-4 Solving Inequalities

## What You'll Learn

Scan Lesson 5-4. List two headings you would use to make an outline of this lesson.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

Review Vocabulary Use the diagram to fill in each blank with the correct term. (Lesson 5-1)

## formula

The $\qquad$ for the triangle is $126 \mathrm{~cm}^{2}$ and the $\qquad$ perimeter for the triangle is 54 cm .
area $\quad A=\frac{1}{2} b h$ is the __ for the area of a triangle.

Vocabulary Link Addition and Subtraction Properties allow you to add or subtract the same quantities to each side of an equation or inequality with the sentence remaining true.
List an example of something in everyday life that you have to do "the same on both sides" to keep it equal or the same.
$\qquad$
$\qquad$
Lesson 5-4 (continued)

## Details

Solve Inequalities by Adding or Subtracting pp. 241-242

Solve Inequalities by Multiplying or Dividing by a Positive Number pp. 242-243

Multiply or Divide an Inequality by a Negative Number
pp. 243-244

Draw an arrow and match the correct property needed to solve the inequality. Then solve each inequality.

Model the solution of the inequality on the number line.

$\qquad$
$\qquad$

## 5-5 Solving Multi-Step Equations and Inequalities

## What You'll Learn <br> Skim the Examples for Lesson 5-5. Predict two things you think you will learn about solving multi-step equations and inequalities.

1. $\qquad$
$\qquad$
2. $\qquad$

## Active Vocabulary

Review Vocabulary Fill in each blank with the correct term or phrase. (Lesson 4-1)

Distributive Property
To $\qquad$ a sum or difference by a number, each term inside the $\qquad$ by the number outside of the $\qquad$ .

New Vocabulary Write the definition next to each term.
$\qquad$
$\square$
identity
$\qquad$
$\qquad$
$\qquad$
Lesson 5-5 (continued)

## Details

Solve Equations and Inequalities with Grouping Symbols
pp. 248-249

No Solution or All Numbers as Solutions p. 250

Complete the organizer by following the steps given to solve the inequality.

Steps in Solving Multi- $\quad 2(x-3) \quad 4(x+3)-6 x$ Step Equations and Inequalities

Step 1: Use the
Distributive
Property to remove parentheses

Step 2: Combine like terms on same side

Step 3: Use the Addition or Subtraction Properties

Step 3:

Step 4: Use the Multiplication or Division Properties

Write an equation that has a solution that is an identity. Then write an equation with a null or empty set.
identity:
null or empty set:

## Helping You Remember

An identity is an equation that is true for every value of the variable. A null or empty set occurs when an equation has no solution. Write and solve an example of each type of equation.
$\qquad$

## antic <br> The It Together

5 Multi-Step Equations and Inequalities

Complete the graphic organizer to compare and contrast equations and inequalities.

$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

$\qquad$
$\qquad$

## CHAPTER <br> 5 Multi-Step Equations and Inequalities

## Before the Test

Review the ideas you listed in the table at the beginning of the chapter. Cross out any incorrect information in the first column. Then complete the table by filling in the third column.

| K | W | L |
| :---: | :---: | :---: |
| What I know... | What I want to find out... | What I learned... |
|  |  |  |
|  |  |  |

Math Online Visit glencoe.com to access your textbook, more examples, self-check quizzes, personal tutors, and practice tests to help you study for concepts in Chapter 5.

## Are You Ready for the Chapter Test?

Use this checklist to help you study.
$\square$ I used my Foldable to complete the review of all or most lessons.I completed the Chapter 5 Study Guide and Review in the textbook.I took the Chapter 5 Practice Test in the textbook.I used the online resources for additional review options.I reviewed my homework assignments and made corrections to incorrect problems.I reviewed all vocabulary from the chapter and their definitions.

## Study Tips

- On test day, look over the entire test to get an idea of its length and scope so that you can pace yourself. Answer what you know first, then go back and complete the problems you skipped. When finished, check for errors. Don't change an answer unless you are certain you are correct.
$\qquad$
$\qquad$
$\qquad$

## CHAPTER <br>  <br> Ratio, Proportion, and Similar Figures

## Before You Read

Before you read the chapter, respond to these statements.

1. Write an $\mathbf{A}$ if you agree with the statement.
2. Write a $\mathbf{D}$ if you disagree with the statement.

| Before You Read | Ratio, Proportion, and Similar <br> Figures |
| :---: | :--- |
|  | - A ratio is a comparison of quantities <br> by addition. |
|  | - Unit rates are useful when <br> comparing prices. |
|  | - Ratios are used to change a <br> measurement from one unit to <br> another. |
|  | - When two figures are proportional, <br> they will have the same side and <br> angle measures. |
|  | - A scale drawing is sometimes <br> proportional to the actual object. |

Construct the Foldable as directed at the beginning of this chapter.

## Note Taking Tips

- To help you organize data, create study cards when taking notes, recording and defining vocabulary words, and explaining concepts.
- When taking notes, use a table to make comparisons about the new material. Determine what will be compared, decide what standards will be used, and then use what is known to find similarities and differences.
$\qquad$
$\qquad$

## chante <br> 6 <br> Ratio, Proportion, and Similar Figures

## Key Points

Scan the pages in the chapter and write at least one specific fact concerning each lesson. For example, in the lesson on solving proportions, one fact might be that the cross products of any proportion are equal. After completing the chapter, you can use this table to review for your chapter test.

| Lesson | Fact |
| :---: | :---: |
| 6-1 Ratios |  |
| 6-2 Unit Rates |  |
| 6-3 Converting Rates and Measurements |  |
| 6-4 Proportional and Nonproportional Relationships |  |
| 6-5 Solving Proportions |  |
| 6-6 Scale Drawings and Models |  |
| 6-7 Similar Figures |  |
| 6-8 Dilations |  |
| 6-9 Indirect Measurement |  |

$\qquad$
$\qquad$
$\qquad$

## 6-1 Ratios

What You'll Learn $\quad$ Scan Lesson 6-1. List two headings you would use to make an outline of this lesson.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary <br> Review Vocabulary Define simplify in your own words.

(Lesson 1-3)
simplify

New Vocabulary Fill in each blank with the correct term or phrase.
a $\qquad$ of two $\qquad$ by division that is usually written in $\qquad$ form

Vocabulary Link Ratio is a word that is used in everyday English. Find the definition of ratio using a dictionary. List two examples of real-life ratios.
$\qquad$
$\qquad$
$\qquad$

## Lesson 6-1 (continued)

## Main Idea

## Write Ratios as Fractions in Simplest Form

pp. 265-266

## Simplify Ratios

Involving Measurements
p. 266

## Details

Cross out the ratio that is not equivalent to the following ratio.

16 girls out of 24 students

| $\frac{2}{3}$ | $\frac{4}{3}$ |
| :---: | :---: |
| $\frac{8}{12}$ | $\frac{16}{24}$ |

Write each ratio in simplest form.

1. 15 cans out of 9 cases $=\square$ 2. 4 rings to 7 bracelets $=\square$
2. 2 c to $32 \mathrm{oz}=\square \quad$ 4. 16 in. to $4 \mathrm{ft}=\square$
3. 11 dramas out of $17 \mathrm{DVDs}=\square$
4. 6 hours 14 days $=\square$

## Helping You Remember

Ratios can represent part to part, part to whole, or whole to part relationships. Write a problem that can be expressed with these three ratios. Include the ratios in your description.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## 6-2 Unit Rates

What You'll Learn $\quad$ Skim the Examples for Lesson 6-2. Predict two things you think you will learn about unit rates.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

Active Vocabulary Review Vocabulary Fill in each blank with the correct term or phrase. (Lesson 5-1)
area $\quad$ The $\qquad$ of the $\qquad$ enclosed by a figure.

New Vocabulary Write the definition next to each term.
rate $\qquad$

unit rate

Vocabulary Link Rate is a word that is used in everyday English. Find the definition of rate using a dictionary. Write two examples of rates used in everyday life.
$\qquad$
$\qquad$

## Main Idea

## Find Unit Rates

p. 270

## Compare Unit Rates

 p. 271
## Details

Complete the Venn diagram by writing the phrases in the correct position. Use the phrases below the diagram.

usually a fraction
4 miles to 1,000 feet
has 1 in numerator
5 inches per second
same units
different units
uses "out of"
uses "per"

Fill in each blank with $<,>$, or $=$ to compare the unit rates.

1. 10 notebooks for $\$ 12$ $\square$ 15 notebooks for $\$ 18.75$
2. 12 cans for $\$ 4.20$ $\square$ 20 cans for $\$ 6$
3. 171 miles with 9 gallons $\square 300$ miles with 15 gallons
4. $4,000 \mathrm{ft}$ in 16 seconds $\square$ $7,500 \mathrm{ft}$ in 30 seconds
5. 77 pages in 1 hour $\square 108$ pages in 120 minutes

## Helping You Remember

The word rate is part of the term unit rate.
Explain how a rate can be written as a unit rate.
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## 6-3 Converting Rates and Measurements

## What You'll Learn

Skim Lesson 6-3. Predict two things that you expect to learn based on the headings.

1. $\qquad$
$\qquad$
2. $\qquad$

## Active Vocabulary

Review Vocabulary Write the correct term next to each definition. (Lesson 4-3)
$\longrightarrow$ a mathematical sentence that contains an equals sign, (=), showing that two expressions are equal
$\qquad$ operations that "undo" each other

New Vocabulary Fill in each blank with the correct term or phrase.
dimensional analysis
the process of including $\qquad$ of $\qquad$ as factors when you compute

Vocabulary Link Analysis is a word that is used in everyday English. Find the definition of analysis using a dictionary. Explain how the English definition can help you remember how analysis is used in mathematics.
$\qquad$
$\qquad$
$\qquad$

## Lesson 6-3 (continued)

## Main Idea

## Dimensional Analysis

pp. 275-276

## Convert Between

 Systemspp. 276-277

## Details

Fill in each conversion factor and solve each problem.

1. Convert 8 cups of juice per 1 gallon of water to cups of juice per quart of water.
$\frac{8 \text { cups }}{1 \text { gallon }} \cdot \frac{1 \text { gallon }}{\square \text { quarts }}=\square$
2. Convert 110 millimeters per meter to millimeters per centimeter.
$\frac{110 \mathrm{~mm}}{1 \mathrm{~m}} \cdot \frac{1 \mathrm{~m}}{\square}=\square$
3. Convert 80 ounces per minute to ounces per second.
$\square$
Fill in the diagram to complete the steps to convert between measurement systems. Use the terms simplify, ratio, divide, and conversion factor.

## Step $1 \quad$ Step $2 \quad$ Step 3

## Helping You Remember

Describe how to convert 18 pounds to kilograms. In the conversation factor, which quantity is in the numerator and which quantity is in the denominator?
$\qquad$

## 6-4 Proportional and Nonproportional Relationships

What You'll Learn<br>Scan the text under the Now heading. List two things you will learn about in the lesson.

1. $\qquad$
$\qquad$
$\qquad$
2. $\qquad$

## Active Vocabulary

Review Vocabulary Match the term with the correct definition by drawing a line to connect the two. (Lessons 6-1 and 6-2)
ratio a simplified rate with a denominator of 1
unit rate a ratio with two quantities that have different kinds of units

## rate comparison of two quantities by division

New Vocabulary Write the correct term next to each definition.
the relationship between two quantities where the ratio or rate is not constant
a constant ratio or unit rate of a proportion
$\qquad$
$\qquad$

## Main Idea

## Identify Proportions

pp. 281-282

Describe Proportional Relationships p. 282

## Details

Fill in the organizer about proportions.

| What are proportions? | How can proportions be <br> written with numbers? |
| :--- | :--- |
| Examples | Proportions |

Fill in the blanks so that each table represents a proportional relationship.
1.

| cups of juice | 2 | 4 | 6 | 8 |
| :---: | :--- | :--- | :--- | :--- |
| cups of water | 6 |  |  |  |

2. 

| oranges | 1 |  | 3 |  |
| :---: | :---: | :---: | :---: | :---: |
| apples | 4 | 8 |  | 16 |

3. 

| cats | 3 | 9 |  |  |
| :---: | :---: | :---: | :---: | :---: |
| dogs | 5 |  | 25 | 35 |

$\qquad$
$\qquad$

## 6-5 Solving Proportions

What You'll Learn Scan the text in Lesson 6-5. Write two facts you learnedabout solving proportions.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$
$\qquad$
Active Vocabulary Review Vocabulary Write the definition next to each term. ..... (Lesson 4-3)
equation

$\qquad$
$\qquad$
solution

New Vocabulary Fill in each blank with the correct word or phrase.
proportion an $\qquad$ that states that two $\qquad$ or
rates are $\qquad$
cross products If $\frac{a}{b}=\frac{c}{d}$, then $\qquad$ $=$ $\qquad$ .
$\qquad$
$\qquad$
Lesson 6-5 (continued)

## Main Idea

## Details

## Proportions

pp. 287-288

## Use Proportions to Solve Problems

pp. 288-289

## Complete the organizer for cross products.

Fill in each blank with a ratio that forms a proportion.

1. $\frac{4}{12}=\square$
2. $\frac{10}{20}=\square$
3. $\frac{3.0}{1.8}=\square$
4. $\frac{7}{28}=\square$

## Helping You Remember Proportion is a common word in the English

 language. Use a dictionary to look up its definition. Explain how the definition from the dictionary can help you remember the mathematical definition of proportion.$\qquad$
$\qquad$
$\qquad$
$\qquad$

## 6-6 Scale Drawings and Models

What You'll Learn $\quad$ Skim the lesson. Write two things you already know about scale drawings and models.

1. $\qquad$
$\qquad$
$\qquad$
2. $\qquad$
$\qquad$

New Vocabulary Match the term with the correct definition by drawing a line to connect the two.
a ratio of a given length on a scale model or drawing to its corresponding length on the actual object
scale model a diagram used to represent an object that is too large or small to be drawn at actual size
scale the relationship between the measurements on a drawing or model and the measurements of the real object
scale drawing
a model used to represent an object that is too large or small to be built at actual size

Vocabulary Link Scale is a word that is used in everyday English. Find the definition of scale using a dictionary. Explain how the English definition can help you remember how scale is used in mathematics.
$\qquad$
$\qquad$

## Main Idea

## Use Scale Drawings and Models

pp. 294-295

Fill in the table using the information provided.
The actual measurements of a 5-room apartment are in the table below. Use the scale of $\frac{1}{2} \mathrm{in} .=4 \mathrm{ft}$ to find the missing lengths of the drawing.

| Room | Living <br> room | Kitchen | Bathroom | Bedroom <br> \#1 | Bedroom <br> \#2 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Actual <br> length <br> (ft) | 14 | 10 | 6 | 8 | 12 |
| Drawing <br> length <br> (in.) |  |  |  |  |  |

Construct Scale Drawings
p. 296

Construct a scale drawing of the floor plan of the 5 -room apartment above using the values you calculated for the lengths of each room.

## Helping You Remember

Explain how a scale is different than a scale factor.
$\square$
$\qquad$
$\qquad$
$\qquad$

## 6-7 Similar Figures

## What You'll Learn

2. 

Scan Lesson 6-7. List two headings you would use to make an outline of this lesson.

1. $\qquad$
$\qquad$
$\qquad$
$\qquad$

## Active Vocabulary

Review Vocabulary Write the definition of proportion in your own words. (Lesson 6-4)
proportion $\qquad$

New Vocabulary Quadrilateral DEFG ~ quadrilateral HIJK. Label the diagram with the correct terms. Use each term once.

$D E F G$ and HIJK are $\qquad$ .

Vocabulary Link Similar and congruent are two words used in everyday English. Find the definitions of similar and congruent using a dictionary.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## Main Idea

## Details

## Corresponding Parts of Similar Figures

pp. 301-302

| List the congruent angles. |
| :--- |
|  |

List the corresponding sides.

Fill in each blank to answer the questions about the figures below.
$A B C D \sim E F G H$

1. List all the corresponding sides.
2. List all the congruent angles.
3. What is the scale factor? $\qquad$
4. What is the value of $x$ ? $\qquad$

## Helping You Remember <br> Make a list of what you learned about similar

figures.
$\qquad$
$\qquad$
$\qquad$

## 6-8 <br> Dilations

## What You'll Learn <br> Skim the Examples for Lesson 6-8. Predict two things you think you will learn about dilations.

1. $\qquad$
$\qquad$
2. $\qquad$

## Active Vocabulary

$x$-coordinate

Review Vocabulary Match the term with its definition by drawing a line to connect the two. (Lessons 1-4 and 2-7)
a pair of numbers used to locate any point on a coordinate plane
ordered pair second number in an ordered pair coordinate plane movement of a geometric figure
first number in an ordered pair
formed by the intersection of two number lines that meet at right angles at their zero points

New Vocabulary Fill in each blank with the correct term or phrase.
dilation $\quad \mathrm{a}$ $\qquad$ that enlarges or reduces a figure by a
$\qquad$ factor
$\qquad$
$\qquad$
$\qquad$
Lesson 6-8 (continued)

## Details

## Dilations

pp. 307-309
Compare and contrast the three types of transformations by completing the diagram below, using the terms under the diagram.

## Helping You Remember

Dilation is a word used in everyday English as well as in mathematics. Write the definition of dilation. Explain how the English definition can help you remember how dilation is used in mathematics.
$\qquad$
$\qquad$
$\qquad$

## 6-9 Indirect Measurement

## What You'll Learn

Skim the Examples for Lesson 6-9. Predict two things that you will learn about indirect measurement.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary

Review Vocabulary Write the correct term next to each definition. (Lessons 6-5 and 6-7)
$\qquad$ - a statement of equality of two or more ratios
$\qquad$ - If $\frac{a}{b}=\frac{c}{d}$, then $a d=c b$.
$\qquad$ figures that have the same shape but not necessarily the same size

New Vocabulary Fill in each blank with the correct term or phrase.
indirect measurement $\quad$ allows you to use the properties of $\qquad$ to find measurements that are difficult to measure $\qquad$

Vocabulary Link Indirect is a word that is used in everyday English. Find the definition of indirect using a dictionary. Explain how the English definition can help you remember how indirect is used in mathematics.
$\qquad$
$\qquad$

Main Idea

## Indirect Measurement

p. 313

## Details

Model the following situation with a labeled drawing. Then solve.

A flagpole casts a shadow that is 32 feet long. At the same time, a statue that is 7 feet tall casts a shadow that is $17 \frac{1}{2}$ feet long. How tall is the flagpole?

## Fill in the blank of the missing measure.

The triangles below are similar. What is the distance from Springdale to Porter?

## Helping You Remember

Write a paragraph explaining how to find a missing measurement using similar triangles to a classmate that was absent from class the day it was taught. Include an example.
$\qquad$
$\qquad$
$\qquad$

## CHAPTER <br> 6 <br> Ratio, Proportion, and Similar Figures

## The It Together

Describe how ratios are used in each application.

$\qquad$
$\qquad$

## curvite <br> 6 Ratio, Proportion, and Similar Figures

## Before the Test

Now that you have read and worked through the chapter, think about what you have learned and complete the table below. Compare your previous answers with these.

1. Write an $\mathbf{A}$ if you agree with the statement.
2. Write a $\mathbf{D}$ if you disagree with the statement.

| Ratio, Proportion, and Similar Figures | After You Read |
| :--- | :--- |
| - A ratio is a comparison of quantities by |  |
| addition. |  |$\quad$| - Unit rates are useful when comparing |
| :--- |
| prices. |$\quad$ ( Ratios are used to change a | measurement from one unit to another. |
| :--- |
| - When two figures are proportional, |
| they will have the same side and angle <br> measures. |
| - A scale drawing is sometimes |
| proportional to the actual object. |

Math Online Visit glencoe.com to access your textbook, more examples, self-check quizzes, personal tutors, and practice tests to help you study for concepts in Chapter 6.

## Are You Ready for the Chapter Test?

Use this checklist to help you study.
$\square$ I used my Foldable to complete the review of all or most lessons.
$\square$ I completed the Chapter 6 Study Guide and Review in the textbook.
$\square$ I took the Chapter 6 Practice Test in the textbook.
$\square$ I used the online resources for additional review options.
$\square$ I reviewed my homework assignments and made corrections to incorrect problems.
$\square$ I reviewed all vocabulary from the chapter and their definitions.

- You will do better on a test if you are relaxed. If you feel anxious, try some deep breathing exercises. Don't worry about how quickly others are finishing. Do your best and use all the time that is available to you.
$\qquad$
$\qquad$
$\qquad$

## Percent

## Before You Read

Before you read the chapter, respond to these statements.

1. Write an $\mathbf{A}$ if you agree with the statement.
2. Write a $\mathbf{D}$ if you disagree with the statement.

| Before You Read | Percent |
| :--- | :--- |
|  | • A percent is a comparison of a <br> number and 100. |
|  | -To write a decimal as a percent, <br> divide by 100.$\|$- Percents can be written in fraction, <br> decimal, or percent form. |
|  | - A percent proportion is solved with <br> cross products. |
|  | - The percent equation can only be <br> used with percents in their fraction <br> form. |

## 

Construct the Foldable as directed at the beginning of this chapter.

## Note Taking Tips

- When taking notes, write clean and concise explanations.

Someone who is unfamiliar with the math concepts should be able to read your explanations and learn from them.

- If your instructor points out definitions or procedures from your text, write a reference page in your notes.
You can then write these referenced items in their proper place in your notes after class.
$\qquad$
$\qquad$
$\qquad$

## CHAPTER <br> 7 Percent <br> Key Points

Scan the pages in the chapter and write at least one specific fact concerning each lesson. For example, in the lesson on simple and compound interest, one fact might be that the formula used to solve simple interest problems is $I=p r t$. After completing the chapter, you can use this table to review for your chapter test.

| Lesson |  |  |
| :--- | :--- | :--- |
| $7-1$ | Fractions and Percents |  |
| $7-2$ | Fractions, Decimals, and Percents |  |
| $7-3$ | Using the Percent Proportion |  |
| $7-4$ | Find Percent of a Number Mentally |  |
| $7-5$ | Using Percent Equations |  |
| $7-6$ | Percent of Change |  |
| $7-7$ | Simple and Compound Interest |  |
| 7 |  |  |

$\qquad$
$\qquad$

## 7-1 Fractions and Percents

What You'll Learn $\quad$ Scan Lesson 7-1. List two headings you would use to make an outline of this lesson.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary <br> Review Vocabulary Write the correct term next to each

 definition. (Lessons 6-1 and 6-4)$\qquad$ a comparison of two quantities by division that is often written in fraction form
$\qquad$ describes the relationship between two quantities where the ratio or rate is not constant
$\qquad$ the $k$ in the equation $y=k z$
a relationship where two quantities have a constant ratio or rate

New Vocabulary Write the definition next to the term.
percent

Vocabulary Link Percent is a word that is used in everyday English. Find the definition of percent using a dictionary. List two examples of everyday uses of percents.
$\qquad$
$\qquad$

## Lesson 7-1 (continued)

## Main Idea

## Details

Percents as Fractions pp. 331-332

Fill in the fraction that completes the circle. Then define the relationship between the four parts.

The relationship:
Fill in each blank of the proportion to find the percent following the given steps.

What percent is 16 out of 24 ?

$$
\square=\square \quad \text { Multiply. }
$$

$$
\square=n \quad \text { Simplify }
$$

$$
\text { So, } \frac{16}{24}=\square \text { or } \square
$$

## Helping You Remember

Write and solve two questions where you would use proportions and percents to solve.
$\qquad$
$\qquad$
$\qquad$

## 7-2 Fractions, Decimals, and Percents

## What You'll Learn Skim the lesson. Write two things you already know about fractions, decimals, and percents.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary

Review Vocabulary Fill in each blank with the correct term or phrase. (Lessons 6-1, 6-5, and 7-1)

ratio

a $\qquad$ of two quantities by $\qquad$ that is usually written in $\qquad$ form
percent
a $\qquad$ that compares a number to $\qquad$ proportion an $\qquad$ that states that two $\qquad$ or rates are $\qquad$
cross products If $\frac{a}{b}=\frac{c}{d}$, then $\qquad$ $=$ $\qquad$

Vocabulary Link The historical form of percent was per cent. Use a dictionary to look up the words per and cent. Relate these two meanings to the current definition of percent.
$\qquad$
$\qquad$
Lesson 7-2 (continued)

Percents and Decimals
pp. 337-339

Compare Fractions, Decimals, and Percents p. 339

Complete the diagram by filling out each box with a description and example of each process described.

At a local school, $\mathbf{2 2 \%}$ of students walk to school, $\mathbf{0 . 3 5}$ take the bus, and three eighths are driven in a car. The rest of the students ride their bikes. Which of these groups are the largest? describing your experiences as a percent.
$\qquad$
$\qquad$
$\qquad$

## 7-3 Using the Percent Proportion

## What You'll Learn

Skim the Examples in Lesson 7-3. Predict two things that you think you will learn about using percent proportions.

1. $\qquad$
$\qquad$
2. $\qquad$

## Active Vocabulary

Review Vocabulary Match the term with its definition by drawing a line connecting the two. (Lessons 4-3, 6-1, and 6-5)
equation a ratio that compares a number to 100 cross products
proportion
percent If $\frac{a}{b}=\frac{c}{d}$, then $a d=c b$.

New Vocabulary Write the definition next to the term.
percent proportion
a mathematical sentence that contains an equals sign, (=), showing that two expressions are equal an equation that states that two ratios or rates are equal
$\qquad$

Vocabulary Link Percent and proportion are words that are used in everyday English. Find the definition of percent and proportion using a dictionary. How can their individual definitions help you remember what a percent proportion is?
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
Lesson 7-3 (continued)

## Details

The Percent Proportion pp. 345-347

Complete the model for the percent proportion.

Complete the organizer. Write the types of percent problems. Then write a word problem to show an example for each.

## Helping You Remember

Fill in each blank to identify the whole, the part, and the percent in the following percent proportion.

$\qquad$
$\qquad$

## 7-4 Find Percent of a Number Mentally

## What You'll Learn <br> Skim Lesson 7-4. Predict two things you expect to learn based on the headings and the Key Concept box.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary

Review Vocabulary Write the correct term next to each definition. (Lessons 6-2, 6-5, 7-1, and 7-2)
a ratio that compares a number to 100
a ratio that compares part of a quantity to the whole quantity
a ratio of two quantities that have different kinds of units
an equation that states two ratios or rates are equal

Vocabulary Link Mental and math are both words used in everyday English. Look up mental and math in the dictionary. Explain how the two words fit together to be the mental math that is used in everyday mathematics.
$\qquad$
$\qquad$
$\qquad$

Find Percent of a Number Mentally pp. 351-352

## Estimates with Percents

 pp. 352-353Complete the organizer with two ways that you can mentally find $\mathbf{4 0 \%}$ of $\$ 700$.

Fill in the table with the mental strategy of how you found the estimate. Use a different strategy each time.

| Estimate the <br> Answer | Describe your Strategy |
| :---: | :---: |
| $150 \%$ of 98 |  |
| $76 \%$ of 160 |  |
| $\frac{1}{2} \%$ of 280 |  |

## Helping You Remember

There are situations when an exact answer is needed. There are other times when an estimate is good enough. Give examples of when an exact answer and an estimate are appropriate. Explain your reasoning.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## 7-5 Using Percent Equations

$\qquad$
What You'll Learn Scan the text in Lesson 7-5. Write two facts you learned about solving using percent equations as you scanned the text.
1.
2.

## Active Vocabulary New Vocabulary Write the definition next to each term. (Lessons 4-3, 6-5, and 7-3) <br> proportion

percent proportion

## equation

$\qquad$
$\qquad$
cross products $\qquad$

New Vocabulary Fill in each blank with the correct term or phrase.
an form of the in which the percent is written as a $\qquad$
$\qquad$
$\qquad$
Lesson 7-5 (continued)

Main Idea

## Percent Equations

pp. 357-359

## Details

Complete the organizer. Write the type of percent problem using the terms part, whole, and percent. Then solve using the percent equation.

Fill in each blank using the information below.
Terri and Kraig each bought an MP3 player. Terri paid $\$ 45$ minus an $18 \%$ discount. Kraig has a coupon for $15 \%$ off, which is a $\$ 6$ discount.

1. What is the original price of Kraig's player?
2. How much did Terri pay after her discount? $\square$
3. Suppose Kraig pays $6.5 \%$ and Terri pays $6 \%$ sales tax. How much did Kraig and Terri spend total for both players, including tax? Round to the nearest cent if needed.

## Helping You Remember

The label over each oval represents what is missing from a percent equation. In each oval, write and solve a percent equation to find that missing information.

$\qquad$
$\qquad$

## 7-6 Percent of Change

## What You'll Learn <br> Skim Lesson 7-6. Predict two things that you expect to learn based on the headings and Key Concept box.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary

percent of decrease
selling price
discount
percent increase
markup
percent of change

New Vocabulary Match the term with the correct definition by drawing a line to connect the two.
ratio that compares the change in quantity to the original amount
the amount the price of an item is increased above the price the store paid for an item
a positive percent of change
total amount consumer pays for item
a negative percent of change
the amount by which the regular price of an item is reduced

Vocabulary Link Percent change is a term that is used in everyday English. List two ways in which percent change is used in everyday life.
$\qquad$
$\qquad$

## Lesson 7-6 (continued)

Main Idea

## Details

## Find Percent of Change

pp. 364-365

Using Markup and Discount pp. 365-366

Complete the Venn diagram for the terms markup and discount. Use the terms percent increase, percent decrease, percent of change, positive, and negative.

## Helping You Remember

For a percent of increase, is the percent of change always positive or negative? Why? For a percent of decrease, is the percent of change always positive or negative? Why?
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## 7-7 Simple and Compound Interest

## What You'll Learn

2. 

Scan the text under the Now heading. List two things you will learn about in this lesson.

1. $\qquad$
$\qquad$
$\qquad$
$\qquad$

## Active Vocabulary

New Vocabulary Label the diagram with the correct terms.

Vocabulary Link Principal is a word used in everyday English as well as in mathematics. Write the definition of principal. Explain how the English definition can help you remember how principal is used in mathematics.
$\qquad$
$\qquad$
Lesson 7-7 (continued)

## Main Idea

## Simple Interest

pp. 370-371 p. 371

## Compound Interest

## Details

Complete the organizer. Sample answers are given.

Compare the two types of interest.

| Types of Interest | Description |
| :---: | :---: |
| Simple |  |
| Compound |  |

compound interest. Find the answer then trade with a partner and solve
$\qquad$
$\qquad$
-
$\qquad$
$\qquad$

## 7-8 Circle Graphs

## What You'll Learn Skim the Examples for Lesson 7-8. Predict two things you think you will learn about circle graphs.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary <br> Review Vocabulary Write the term next to each definition.

 (Lessons 3-1 and 7-1)a decimal whose digits end
a decimal whose digits repeat in groups of one or more without end
a ratio that compares a number to 100

New Vocabulary Write the definition next to the term.
$\qquad$
circle graph $\qquad$
$\qquad$

Vocabulary Link A circle graph displays data. Look up data in a dictionary. Find a sentence in the lesson that uses that word.

Definition: $\qquad$

Sentence: $\qquad$
$\qquad$
$\qquad$
$\qquad$

## Lesson 7-8 (continued)

Main Idea

## Details

## Circle Graphs

pp. 376-377

Model a circle graph by following the steps below.
Count the number of students in your classroom. Then count the number of students that are wearing various colored shirts. For example, there may be 7 students wearing blue shirts, 3 wearing pink shirts, and 6 wearing white shirts. Construct and label a circle graph with your data.

Answer each question using the circle graph.

250 students were surveyed about their favorite activities. The results are in the circle graph.

How many students favor computer? $\qquad$
How many more students favor sports than favor swimming? -

Favorite Activity

Which activity is most favored?
$\qquad$

## Helping You Remember

Describe how to construct a circle graph in detail to a classmate who was absent.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## nern <br> 7 <br> Percent

## The It Together

Use the fraction $\frac{3}{4}$ to show how to convert to different forms of numbers.

Complete the proportion with the words "part", "whole", and the symbols \% and 100 .
$\qquad$
$\qquad$

## CHAPTER <br> 7 Percent

## Before the Test

Now that you have read and worked through the chapter, think about what you have learned and complete the table below. Compare your previous answers with these.

1. Write an $\mathbf{A}$ if you agree with the statement.
2. Write a $\mathbf{D}$ if you disagree with the statement.

| Percent | After You Read |
| :--- | :--- |
| - A percent is a comparison of a number |  |
| and 100. |  |$\quad$| - To write a decimal as a percent, divide |
| :--- |
| by 100. |

Math Online Visit glencoe.com to access your textbook, more examples, self-check quizzes, personal tutors, and practice tests to help you study for concepts in Chapter 7.

## Are You Ready for the Chapter Test?

Use this checklist to help you study.I used my Foldable to complete the review of all or most lessons.I completed the Chapter 7 Study Guide and Review in the textbook.I took the Chapter 7 Practice Test in the textbook.I used the online resources for additional review options.I reviewed my homework assignments and made corrections to incorrect problems.
$\square$ I reviewed all vocabulary from the chapter and their definitions.

## $S$ Study Tips

- Designate a place to study at home that is free of clutter and distraction. Try to study at about the same time each afternoon or evening so that it is part of your routine.
$\qquad$ DATE $\qquad$
$\qquad$

## chatio <br>  <br> Linear Functions and Graphing

## Before You Read

Before you read the chapter, respond to these statements.

1. Write an $\mathbf{A}$ if you agree with the statement.
2. Write a $\mathbf{D}$ if you disagree with the statement.

| Before You Read | Linear Function and Graphing |
| :---: | :---: |
|  | - In a function, a member of the domain can be paired with more than one member of the range. |
|  | - An arithmetic sequence has a common ratio between each term. |
|  | - A linear function has both straight and curved lines. |
|  | - If a rate of change is proportional, its graph will be a straight line. |
|  | - In the equation $y=5 x+3$, the slope is 3 . |

FOLDA $\mathrm{B}^{\prime}$ LES Study Organizer Construct the Foldable as directed at the beginning of this chapter.

## Note Taking Tips

- When you take notes, write concise definitions in your own words.

Add examples that illustrate the concepts.

- When taking notes, write down a question mark by anything you do not understand.
Before your next quiz, ask your instructor to explain these sections.
$\qquad$
$\qquad$
$\qquad$

## Num <br> 8 <br> Linear Functions and Graphing

## Key Points

Scan the pages in the chapter and write at least one specific fact concerning each lesson. For example, in the lesson on slope, one fact might be that positive slopes represent a rate of increase. After completing the chapter, you can use this table to review for your chapter test.

| Lesson | Fact |
| :---: | :---: |
| 8-1 Functions |  |
| 8-2 Sequences and Equations |  |
| 8-3 Representing Linear Functions |  |
| 8-4 Rate of Change |  |
| 8-5 Constant Rate of Change and Direct Variation |  |
| 8-6 Slope |  |
| 8-7 Slope-Intercept Form |  |
| 8-8 Writing Linear Equations |  |
| 8-9 Prediction Equations |  |
| 8-10 Systems of Equations |  |

$\qquad$
$\qquad$

| $x$ | $y$ |
| :---: | :---: |
| -1 |  |
|  | 2 |
| 2 | 0 |
| 3 | -1 |

Graph Linear Equations pp. 407-408

Compare the two methods of graphing a linear function.

One Way:

$\qquad$
$\qquad$
$\qquad$

## 8-4 Rate of Change

## What You'll Learn

Skim Lesson 8-4. Predict two things that you expect to learn based on the headings and the Key Concept Box.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary

New Vocabulary Write the definition next to the term.
rate of change

## Main Idea

## Rate of Change

## Details

Model a graph with a positive and then a negative rate of change. Describe your graph with words.

Positive Rate of Change Negative Rate of Change
Time and Distance Traveled Time and Distance Traveled

Minutes

$\qquad$
$\qquad$

## Details

Summarize the following situation.
Emily is filling a bathtub with water. She turns the faucet on, and 7 minutes later when the bathtub is full, she turns the faucet off.

Describe the rate of change. How would the graph of the water flow appear?
$\qquad$
$\qquad$

Describe another situation where the rate of change of the graph would appear the same.
$\qquad$
$\qquad$
$\qquad$

Hepling You Remember The graph below shows the earnings of Roger and Susan. Compare the two rates of change by comparing the steepness of the lines.

Roger's and Susan's Earnings

$\qquad$
$\qquad$

## 8-5 Constant Rate of Change and Direct Variation

## What You'll Learn <br> Scan the text under the Now heading. List two things you will learn about in the lesson.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary

Review Vocabulary Write the definition next to each term.
(Lessons 6-4 and 8-4)
rate of change $\qquad$
$\qquad$
proportion

New Vocabulary Write the correct term next to each definition.
$\qquad$ - the constant of proportionality, the $k$ in the equation $y=k x$
the relationship between two quantities that results in a straight-line graph
when the ratio between two variable quantities is constant
a linear relationship where the rate of change between any two data points is the same
$\qquad$
$\qquad$
$\qquad$
Lesson 8-5 (continued)

## Main Idea

## Constant Rate of Change

 pp. 418-420
## Details

Cross out the set of coordinates in the circle that do not belong. Then describe the relationship.

The relationship is $\qquad$ .

## Direct Variation

pp. 420-421
Fill in the organizer about direct variation.

| What is it? | How can it be written <br> using symbols? |  |
| :--- | :--- | :--- |
|  | Direct <br> Variation | Nonexamples |

## Helping You Remember

All directly proportional relationships are linear, but not all linear relationships are proportional. Give an example of a linear relationship that has a constant rate of change but is not proportional.
$\qquad$
$\qquad$
$\qquad$

## 8-6 Slope

## What You'll Learn Skim the lesson. Write two things you already know about slope.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary

Review Vocabulary Fill in each blank with the correct term or phrase. (Lessons 6-1 and 8-5)
$\qquad$ of two $\qquad$ by division that is often written in $\qquad$ form
constant rate of change $\quad \mathrm{a}$ $\qquad$ where the rate of change between any two data points is $\qquad$

New Vocabulary Write the definition next to the term.
slope

## Main Idea

## Slope

pp. 427-428

## Details

Match the different types of slopes to the correct coordinates by drawing a line to connect the two.
positive slope
$A(2,4), B(2,5)$
negative slope
$C(-5,3), D(-3,2)$
undefined slope
$E(7,4), F(-7,4)$
zero slope
$G(-1,-3), H(-3,-5)$
$\qquad$
$\qquad$
Lesson 8-6 (continued)

Slope and Constant Rate of Change
pp. 428-429

Complete the organizer to find the slope of a line. Fill in each blank to find the slope in the example.

Helping You Remember Use words to describe how a line appears with the given slopes.
positive: $\qquad$
negative: $\qquad$
zero: $\qquad$
undefined: $\qquad$
$\qquad$
$\qquad$
$\qquad$

## 8-7 Slope-Intercept Form

## What You'll Learn Skim the Example for Lesson 8-7. Predict two things you think you will learn about slope-intercept form.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary

Review Vocabulary Write the correct term next to each definition. (Lessons 6-5 and 8-3)
$\qquad$ a statement of equality of two or more ratios
$\qquad$ - an equation whose graph is a straight line
$\qquad$ the first number of an ordered pair
the second number of an ordered pair

New Vocabulary Write the definition next to the term.
$\qquad$
$\qquad$

## Details

## Find Slope and

 $\boldsymbol{y}$-interceptpp. 433-434

Identify the slope and $\boldsymbol{y}$-intercept in each equation.

1. $y=4 x+5$
2. $x+y=6$
slope: $\qquad$ $y$-intercept: $\qquad$
3. $y+3=-7 x$
slope: $\qquad$ $y$-intercept: $\qquad$
4. $-x-y=-2$
slope: $\qquad$ $y$-intercept: $\qquad$

Complete the organizer by following the steps given
Graph Equations
pp. 434-435
to graph an equation.

Step 1: Find the slope and $y$-intercept.

Graph: $y=-3 x-4$

Step 1: slope: __ $y$-intercept: ___

Step 2: Graph the $y$-intercept at ( $0,-4$ ).

Step 3: Write the slope as $\frac{-3}{1}$. Use it to locate another point on the line.

Step 4: Draw a line through the 2 points and extend the line.

$\qquad$
$\qquad$

## 8-8 Writing Linear Equations

What You'll Learn $\quad$ Skim Lesson 8-8. Predict two things that you expect to learn based on the headings and the Key Concept Box.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary Review Vocabulary Fill in each blank with the correct term or phrase. (Lessons 8-6 and 8-7)

slope $\quad$ the ratio of the $\qquad$ , or $\qquad$ change, to the $\qquad$ , or
$\qquad$ change of a line
$\qquad$ slope-intercept form $>$ a linear ___ in the form where is the slope and $b$ is the $\qquad$
New Vocabulary Write the definition next to the term.
point-slope form
$\qquad$
$\qquad$
Lesson 8-8 (continued)

## Main Idea

## Details

Write Equations in Slope-Intercept Form pp. 441-442

## Solve Problems

pp. 443-444

Fill in each blank to write a linear equation given two points.
Given: $(4,-5)$, and ( $-1,-3$ )

Find the slope: $m=\frac{\text { change of } y}{\text { change of } x}=$

Use $y-y_{1}=m\left(x-x_{1}\right)$ form: $y-($ $\qquad$ ) $=$ $\qquad$ $(x-1$ $\qquad$ )).

Simplify to $y-m x+b$ form: $y=$ $\qquad$ - $\qquad$ .

Complete the chart by summarizing the procedure.

| Writing Linear Equations |  |
| :---: | :---: |
| Forms | Procedure |
| from slope and <br> $y$-intercept |  |
| from a graph |  |
| from two points |  |
|  |  |

$\qquad$
$\qquad$

## 8-9 Prediction Equations

## What You'll Learn Scan the text in Lesson 8-9. Write two facts you learned about prediction equations as you scanned the text.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary

Review Vocabulary Write the definition next to the term.
(Lesson 1-6)

## scatter plot

New Vocabulary Fill in each blank with the correct term or phrase.
line of fit $>$ a $\qquad$ that is drawn on a $\qquad$ that closely approximates the $\qquad$

Vocabulary Link In this lesson you will make predictions using a line or equation. Prediction is a word that is used in everyday English. Find the definition of prediction using a dictionary. Give an example of how predictions are used in everyday life.
$\qquad$
$\qquad$

## Main Idea

## Details

## Lines of Fit

p. 448

Complete the organizer about the line of fit.

Fill in each blank to complete the graphic organizer for finding the equation of a line of best fit.

| Make a__ with the |  | Draw a <br> data. |
| :--- | :--- | :--- |
| Use 2 points on <br> the line to find <br> the |  |  |
| Use the $\quad$ and an <br> linear equation in point- <br> slope form. | Solve the point-slope <br> equation for |  |

$\qquad$
$\qquad$

## 8-10 Systems of Equation

## What You'll Learn Scan Lesson 8-10. List two headings you would use to make an outline of this lesson.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary New Vocabulary Fill in each blank with the correct term or phrase.

$\qquad$ with the same $\qquad$
$\qquad$ method of finding an exact $\qquad$ of a system of equations

Vocabulary Link Substitution is a word used in everyday English. Find the definition of substitution using a dictionary. Explain how the English definitions can help you remember how substitution is used in mathematics.
$\qquad$
$\qquad$

## Main Idea

## Solve Systems by

 Graphing pp. 453-454
## Solve Systems by Substitution

p. 455

Compare solutions by completing the chart.

Solutions for Systems of Equations

Fill in the diagram to complete the steps to solve a system of equations by substitution. Use the terms variable, value, equation, and substitute as often as needed.

Step 1
$\left.\begin{array}{|l|l|}\hline \text { Choose one } \\ \text { solve for one }\end{array}\right) \xrightarrow[\left.\begin{array}{l}\frac{1}{\text { expression from }} \begin{array}{l}\text { and } \\ \text { Step } 1 \text { into the other } \\ \text { the variable. }\end{array} \\ \hline\end{array} \right\rvert\,]{ }$

Step 3

Substitute the $\qquad$ for the variable found in Step 2 back into the first $\qquad$
Solve for the other variable.
$\qquad$
$\qquad$

## CHAPTER <br> (i) <br> Linear Functions and Graphing

## Tie It Together

Complete the graphic organizer with definitions and concepts about each topic.

$\qquad$
$\qquad$
$\qquad$

## CHAPTER

## 8 <br> Linear Functions and Graphing

## Before the Test

Now that you have read and worked through the chapter, think about what you have learned and complete the table below. Compare your previous answers with these.

1. Write an $\mathbf{A}$ if you agree with the statement.
2. Write a $\mathbf{D}$ if you disagree with the statement.

| Linear Function and Graphing | After You Read |
| :--- | :--- |
| - In a function, a member of the domain <br> can be paired with more than one <br> member of the range. |  |
| - An arithmetic sequence has a common |  |
| ratio between each term. |  |$\quad$| - A linear function has both straight and |
| :--- |
| curved lines. |$\quad$| - If a rate of change is proportional, its |
| :--- | :--- |
| graph will be a straight line. |

Math Online Visit glencoe.com to access your textbook, more examples, self-check quizzes, personal tutors, and practice tests to help you study for concepts in Chapter 8.

## Are You Ready for the Chapter Test?

Use this checklist to help you study.
$\square$ I used my Foldable to complete the review of all or most lessons.
$\square$ I completed the Chapter 8 Study Guide and Review in the textbook.
$\square$ I took the Chapter 8 Practice Test in the textbook.
$\square$ I used the online resources for additional review options.
$\square$ I reviewed my homework assignments and made corrections to incorrect problems.
$\square$ I reviewed all vocabulary from the chapter and their definitions.

- Be an active listener in class. Take notes, circle or highlight information that your teacher stresses, and ask questions when ideas are unclear to you.
$\qquad$
$\qquad$

## Powers and Nonlinear Functions

## Before You Read

Before you read the chapter, think about what you know about powers and nonlinear functions. List three things you already know about them in the first column. Then list three things you would like to learn about them in the second column.

| K | W |
| :---: | :---: |
| What I know... |  |
|  |  |
|  |  |

Construct the Foldable as directed at the beginning of this chapter.

## $\int$ Note Taking Tips

- When you take notes, be sure to listen actively.

Always think before you write, but don't get behind in your note-taking. Remember to enter your notes legibly.

- When you take notes, circle, underline, or star anything the teacher emphasizes.
When your teacher emphasizes a concept, it will usually appear on a test, so make an effort to include it in your notes.
$\qquad$

## Invim <br> 9 Powers and Nonlinear Functions

## Key Points

Scan the pages in the chapter and write at least one specific fact concerning each lesson. For example, in the lesson on prime factorization, one fact might be that a monomial is a number, a variable, or a product of numbers and/or variables. After completing the chapter, you can use this table to review for your chapter test.

|  | Lesson |  |
| :--- | :--- | :--- |
| $9-1$ | Powers and Exponents |  |
| $9-2$ | Prime Factorization |  |
| $9-3$ | Multiplying and Dividing <br> Monomials |  |
| $9-4$ | Negative Exponents |  |
| $9-5$ | Scientific Notation |  |
| $9-6$ | Powers of Monomials |  |
| $9-7$ | Linear and Nonlinear Functions |  |
| 9 |  |  |
| 9 |  |  |

$\qquad$
$\qquad$
$\qquad$

## 9-1 Powers and Exponents

## What You'll Learn

Skim Lesson 9-1. Predict two things that you expect to learn based on the headings and the Key Concept box.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary <br> Review Vocabulary Write the definition next to the term.

(Lesson 1-1)
order of operations

New Vocabulary Label the diagram with the correct term.
exponent
power

base
$\qquad$
$\qquad$

## Lesson 9-1 (continued)

Main Idea

## Details

## Use Exponents

pp. 471-472

Fill in the blank for each verbal expression with a numeric expression with exponents.

1. 8 to the seventh power $\qquad$
2. 3 cubed $\qquad$
3. 6 to the fourth power $\qquad$
4. 4 to the first power $\qquad$
5. 7 squared $\qquad$

Evaluate Expressions
pp. 472-473

Complete the organizer to evaluate the expression with the values given for $x$ and $y$.

## Helping You Remember

A classmate states that $3^{2}=6$. How would you explain the correct solution? Use words, drawings, or models in your explanation.
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## 9-2 Prime Factorization

## What You'll Learn

2. 

Scan Lesson 9-2. List two headings you would use to make an outline of this lesson.

1. $\qquad$
$\qquad$
$\qquad$
$\qquad$

## Active Vocabulary

monomial

New Vocabulary Match the term with its definition by drawing a line to connect the two.
composite number
factor tree
factor
prime number
prime factorization
when a composite number is expressed as the product of prime factors
to write a number as a product of its factors a whole number with exactly two unique factors, 1 and itself

#### Abstract

an expression that is a number, a variable, or a product of numbers and variables a way to find the prime factorization of a number a whole number that has more than two factors

Vocabulary Link Composite is a word that is used in everyday English. Find the definition of composite using a dictionary. Explain how the English definition can help you remember how a composite number is used in mathematics.

$\qquad$
$\qquad$
Lesson 9-2 (continued)

## Main Idea

## Write Prime

Factorization
pp. 476-477

Complete the factor tree.

The prime factorization of 72 is $\qquad$ .

Fill in each blank with the monomial whose factors are shown.

1. $2 \quad 3 \quad 3 \quad x \quad y \quad y$ $\qquad$
2. $-1 \begin{array}{llllll}-1 & 5 & a & a & a\end{array}$ $\qquad$
3. $\begin{array}{llllllll} & 7 & 11 & s & s & s & s & s\end{array}$ $\qquad$
4. $-1 \quad x \quad x \quad x$ $\qquad$

## Helping You Remember

Explain the relationship between the terms base, exponent, and power.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## 9-3 Multiplying and Dividing Monomials

## What You'll Learn Scan the text under the Now heading. List two things you will learn about in the lesson.

1. $\qquad$
$\qquad$
2. $\qquad$

Active Vocabulary Review Vocabulary Write the term next to the definition. (Lessons 1-3 and 2-1)
$\qquad$ $\xrightarrow{\longrightarrow}$ a number less than zero
$\qquad$
the whole numbers and their opposites

The order numbers are multiplied does not change the product.

The order numbers are grouped does not change the sum.

## Finish each property.

Product of Powers Property

$$
\boldsymbol{a} \cdot \boldsymbol{a}^{n}=\boldsymbol{a}^{m}
$$

Quotient of Powers Property
$\boldsymbol{a}^{m} \div \boldsymbol{a}=\boldsymbol{a} \quad n$
$\qquad$
$\qquad$
Lesson 9-3 (continued)

## Main Idea

## Details

## Multiply Monomials

pp. 481-482

Fill in the blanks to find each product.

1. $4^{3} 4^{2}=4 \square+\square=4 \square$
2. $2^{5} \quad 2^{3}=2 \square+\square=\square \square$
3. $5^{3} \quad 5^{4}=5 \square+\square=\square \square$
4. $2 y^{3}-3 y^{3}=\square \square \square+\square=\square \square \square$
5. $5 x^{4} \quad 3 x^{3}=\square \square^{\square+} \square=\square \square$

Cross out the one that does not belong. Then state the relationship among the three remaining parts of the circle.

The relationship is:
$\qquad$
Helping You Remember
Restate the Product of Powers Property and the Quotient of Powers Property in your own words.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## 9-4 Negative Exponents

## What You'll Learn Skim Lesson 9-4. Predict two things you expect to learn based on the headings and the Key Concept box.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

# Active Vocabulary Review Vocabulary Write the definitions next to each term. 

(Lessons 1-1, 1-2, 1-3 and 9-1)
deductive reasoning
$\qquad$
algebraic expression
$\qquad$
$\qquad$
Lesson 9-4 (continued)

## Main Idea

## Negative Exponents

pp. 486-487

## Evaluate Expressions

 p. 488
## Details

Fill in each blank to prove $\boldsymbol{y}^{-3}=\frac{\mathbf{1}}{\boldsymbol{y}^{\mathbf{3}}}$.
Start with $\frac{y^{4}}{y^{7}}$.

$\frac{y^{4}}{y^{7}} \longrightarrow$| Using the |
| :--- |
| the quotient is $\square \square^{-} \square$ |, | $\square$. |
| :--- |

Fill in the diagram to complete the steps to evaluate an expression with negative exponents. Use the terms order of operations, positive, replace, and simplify.

## Step 1 <br> Step 2 <br> Step 3

## Helping You Remember

Explain how negative exponents can be written
as positive exponents.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## 9-5 Scientific Notation

## What You'll Learn

2. 

Scan the text in Lesson 9-5. Write two facts you learned about scientific notation as you scanned the text.

1. $\qquad$
$\qquad$
$\qquad$
$\qquad$

# Active Vocabulary 

New Vocabulary Match the following terms with the correct examples by drawing a line to connect the two.
standard form
0.000050
$5.0 \times 10^{5}$
scientific notation
$2.8 \times 10^{3}$
3,700
$8,900,000,000$

Vocabulary Link Standard is a word that is used in everyday English. Find the definition of standard using a dictionary. Explain how the English definition can help you remember how standard form is used in mathematics.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
Lesson 9-5 (continued)

Main Idea

Scientific Notation
pp. 493-494

Compare and Order Numbers
p. 495

## Details

Complete the organizer about scientific notation.

Write the numbers in order from greatest to least.

1. $4.05 \times 10^{5}, 4.2 \times 10^{5}, 3.0 \times 10^{5}, 1.3 \times 10^{5}$
2. $2.4 \times 10^{-3}, 2.0 \times 10^{-2}, 3.1 \times 10^{3}, 2.9 \times 10^{-2}$

Helping You Remember Explain how to express a number greater than 1, a number less than 1 , and then the number 1 in scientific notation.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## 9-6 Powers of Monomials

## What You'll Learn <br> Skim the lesson. Write two things you already know about powers of monomials.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

Review Vocabulary Fill in each blank with the correct term or phrase. (Lessons 9-1 and 9-2)
an expression that is a number, a $\qquad$ or a
$\qquad$ of numbers and or variables
power $\quad$ a
a $\qquad$ that is expressed using an $\qquad$

Vocabulary Link Write a power that has a base of 7 and an exponent of 4 . Then write $x$ to the fifth power. Write $y$ squared. Write a monomial that is the product of the number 2 and $k$ cubed.

Finish for each property.
Power of a Property
$\left(\boldsymbol{a}^{m}\right)^{n}=\boldsymbol{a}^{m \_n}$
Power of a Property
$(\boldsymbol{a b})^{m}=\boldsymbol{a}-\boldsymbol{b}-$
$\qquad$
$\qquad$
Lesson 9-6 (continued)

## Main Idea

## Details

Power of a Power
p. 499

Fill in the blanks with each product.

1. $\left(5^{3}\right)^{2}=5 \square \square=5 \square$
2. $\left(x^{5}\right)^{4}=x \square \square=x \square$
3. $\left(6^{2}\right)^{-2}=6 \square \square=6 \square$ or $\frac{\square}{\square}$
4. $\left(y^{-3}\right)^{-4}=y \square \square=y \square$

Power of a Product
pp. 500-501
Compare the two properties of powers by filling out the chart.

|  | Power of <br> Powers | Power of a Product |
| :---: | :--- | :--- |
| Why? |  |  |
| How? |  |  |
| Example |  |  |

## Helping You Remember

Compare and contrast the Quotient of Powers
Property and the Product of Powers Property
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## 9-7 Linear and Nonlinear Function

## What You'll Learn Skim the Examples for Lesson 9-7. Predict two things you think you will learn about linear and nonlinear function.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

# Active Vocabulary Review Vocabulary Write the definition next to each term. 

(Lesson 1-5)
function $\qquad$
$\qquad$
function rule

## function table

$\qquad$
$\qquad$
$\qquad$

New Vocabulary Fill in each blank with the correct term or phrase.
nonlinear functions
functions that $\qquad$ have constant $\qquad$ therefore their graphs are not $\qquad$
$\qquad$
$\qquad$
Lesson 9-7 (continued)

Graphs of Nonlinear Functions
p. 504

Equations and Tables pp. 505-506

Complete the organizer to summarize three ways to determine if a function is linear or nonlinear.

Can the equation of the line be written in the form $y=m x+b$ ?

In a function table, are the changes in $x$ and $y$ constant?
$\qquad$
$\qquad$
$\qquad$

## 9-8 Quadratic Functions

## What You'll Learn Scan Lesson 9-8. List two headings you would use to make an outline of this lesson.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary <br> New Vocabulary Write the definition next to each term.

parabola $\qquad$
quadratic function

Vocabulary Link A parabola is the shape that is seen in everyday life. Give an example of something that has a parabola shape in real life.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
Lesson 9-8 (continued)

Main Idea

## Graph Quadratic

 Functionpp. 510-511

## Details

Complete the organizer by filling in the blanks. Then complete the example.

## Use Quadratic Function

 p. 511Fill in the blanks by using the information below.
A ball is thrown into the sky. The equation that gives the ball's height in meters $h$ as a function of time $t$ is $h=-4.9 t^{2}+12 t+3$.

1. What is the height of the ball after $t=1$ second?
$\qquad$
2. How high is the ball after 2 seconds? $\qquad$
3. What can you say about the ball's path between 1 and 2 seconds? $\qquad$
$\qquad$ .
$\qquad$
$\qquad$

## 9-9 Cubic and Exponential Functions

## What You'll Learn Scan the text under the Now heading. List two things you will learn about this lesson.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary

Review Vocabulary Fill in each blank with the correct term or phrase. (Lesson 9-8)
quadratic function $\quad$ a function that can be written in the form $\qquad$ where $a \neq 0$
parabola the graph of a $\qquad$ function graph

New Vocabulary Match the term with the correct form by drawing a line to connect the two.
cubic function
exponential function
$y=a^{x}+c$, where $a \neq 0, a \neq 1$
$y=a x^{3}+b x^{2}+c x+d$, where $a \neq 0$

Vocabulary Link Exponential is a word that is used in everyday English. Find the definition of exponential using a dictionary. Explain how the English definition can help you remember the shape of the graph of an exponential function in mathematics.
$\qquad$
$\qquad$
Lesson 9-9 (continued)

## Cubic Functions

pp. 516-517

Fill in the organizer for cubic functions. are given.

| What is a cubic function? | Sketch the shape of a <br> graph of a cubic function. |
| :--- | :--- |
| Examples of Cubic <br> Functions | Nonexamples of <br> Cubic Functions |

## Exponential Functions

pp. 517-518

Fill in each blank with the value of $y$.

1. $y=2^{x}-1$, when $x=3:(3, \longrightarrow)$
2. $y=4^{x}+2$, when $x=-1:\left(-1, \quad \_\right)$
3. $y=2^{x}-3$, when $x=2:(2, \longrightarrow)$
4. $y=5^{x}$, when $x=-2$ : $(-2, \longrightarrow)$

## Helping You Remember <br> You have learned to graph quadratic and cubic

 functions. Make a list of the steps you use to graph the two functions.$\qquad$
$\qquad$

## CHAPTER <br> 9 <br> Powers and Nonlinear Functions

## The It Together

Complete the graphic organizer by writing an equivalent form of the exponential expression.
$\qquad$

| $x^{m} \cdot x^{n}$ |  |
| :---: | :--- |
| $\frac{x^{m}}{x^{n}}$ |  |
| $\left(x^{m}\right)^{n}$ |  |
| $(x y)^{m}$ |  |
| $x^{-m}$ |  |
| $x^{0}$, when $\neq 0$ |  |

Complete the graphic organizer with types of functions and their general equations.

$\qquad$

## chaptir <br> Powers and Nonlinear Functions

## Before the Test

Review the ideas you listed in the table at the beginning of the chapter. Cross out any incorrect information in the first column. Then complete the table by filling in the third column.

| K | W | L |
| :---: | :---: | :---: |
| What I know... | What I want to find out... | What I learned... |
|  |  |  |
|  |  |  |

Math Online Visit glencoe.com to access your textbook, more examples, self-check quizzes, personal tutors, and practice tests to help you study for concepts in Chapter 9.

## Are You Ready for the Chapter Test?

Use this checklist to help you study.
I used my Foldable to complete the review of all or most lessons.I completed the Chapter 9 Study Guide and Review in the textbook.I took the Chapter 9 Practice Test in the textbook.I used the online resources for additional review options.I reviewed my homework assignments and made corrections to incorrect problems.I reviewed all vocabulary from the chapter and their definitions.

## 5 Study Tips

- Complete reading assignments before class. Write down or circle any questions you may have about what was in the text.
$\qquad$
$\qquad$

## cavie <br> 10 Real Numbers and Right Triangles

## Before You Read

Before you read the chapter, think about what you know about real numbers and right triangles. List three things you already know about them in the first column. Then list three things you would like to learn about them in the second column.

| K | W |
| :---: | :---: |
| What I know... |  |
|  |  |

Construct the Foldable as directed at the beginning of this chapter.

## Note Taking Tips

- Before going to class, look over your notes from the previous class, especially if the day's topic builds from the last one.
- When you take notes, write down the math problem and each step in the solution using math symbols.
Next to each step, write down, in your own words, exactly what you are doing.
$\qquad$
$\qquad$
$\qquad$

## cmatio <br> 10 Real Numbers and Right Triangles

## Key Points

Scan the pages in the chapter and write at least one specific fact concerning each lesson. For example, in the lesson on triangles, one fact might be that a vertex is a point where line segments intersect. After completing the chapter, you can use this table to review for your chapter test.

| Lesson | Fact |
| :--- | :--- |
| 10-1 Squares and Square Roots |  |
| 10-2 The Real Number System |  |
| $10-3$ Triangles |  |
| $10-4$ The Pythagorean Theorem |  |
| $10-5$ The Distance Formula |  |
| $10-6$ Special Right Triangles |  |

$\qquad$
$\qquad$

## 10-1 Squares and Square Roots

## What You'll Learn <br> Scan the text in Lesson 10-1. Write two facts you learned about squares and square roots as you scanned the text.

1. $\qquad$
$\qquad$
2. $\qquad$

## Active Vocabulary

perfect square

New Vocabulary Match the term with its definition by drawing a line to connect the two.
one of a number's two equal factors
square root
indicates a positive square root
radical sign

## Main Idea

Find Square Roots p. 537
a rational number whose square root is a whole number

Cross out the square root in the concept circle that does not belong. Then describe the relationship of the remaining three parts.

The relationship is $\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## Lesson 10-1 (continued)

## Main Idea

## Details

## Estimate Square Roots

pp. 538-539
Complete the organizer by following the steps to
estimate a square root. Then complete the example.

## Helping You Remember

Tell whether each number has a square root and explain why or why not. Then state if it is a perfect square and explain.

|  | Real Square Root? | Perfect Square? |
| :--- | :--- | :--- |
| 26 |  |  |
| -81 |  |  |
| 256 |  |  |
| 2500 |  |  |
| -5 |  |  |

$\qquad$
$\qquad$

## 10-2 The Real Number System

## What You'll Learn

Scan the text under the Now heading. List two things you will learn about the real number system.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary

New Vocabulary Label the diagram with the correct term.
irrational numbers
real numbers

Vocabulary Link Irrational is a word that is used in everyday English. Find the definition of irrational using a dictionary. Explain how the English definition can help you remember how irrational is used in mathematics.
$\qquad$
$\qquad$
Lesson 10-2 (continued)

## Details

Identify and Compare Real Nmbers
pp. 543-544

Model and explain how to use a number line to list $\frac{7}{8}, 0 . \overline{67}, \sqrt{3}$, and $\frac{3}{4}$ from least to greatest. Write an equality and explanation on the lines below.

Solve Equations p. 545

Complete the organizer by following the steps to solve the equation $x^{2}=10$ using the definition of a square root.

$\qquad$
$\qquad$

## 10-3 Triangles

## What You'll Learn

2. 

Skim Lesson 10-3. Predict two things that you expect to learn based on the headings and the Key Concept boxes.

1. $\qquad$
$\qquad$
$\qquad$
$\qquad$

## Active Vocabulary

New Vocabulary Write the definition next to each term.
congruent $\qquad$
triangle $\qquad$
$\qquad$

## vertex

$\qquad$
line segment

## Main Idea

Find Angle Measures pp. 550-551

## Details

Fill in the diagram to determine the angle measures of $\triangle K L M$ with a ratio of $1: 3: 1$.

Step 1
Step 2
Step 3

| Use $x$ to represent <br> the measure of the <br> and |
| :--- |
| . |$\rightarrow$| Use $\quad$ to <br> represent the <br> measure of the |
| :--- |$\rightarrow$| Write the |
| :--- |
| equation, |
| Solve for $x$. |

Because $x=\ldots$, the measure of the angles are $\qquad$
$\qquad$ .
$\qquad$
$\qquad$
Lesson 10-3 (continued)

## Main Idea

## Details

Classify Triangles
pp. 551-552

Summarize information about triangles in the graphic organizer. Sample answers are given.

Draw and label a scalene, isosceles, and equilateral triangle.

Draw and label an obtuse, acute, and right triangle.

Helping You Remember
Describe an obtuse, scalene triangle.

Describe an equilateral triangle. $\qquad$
$\qquad$
$\qquad$

## 10-4 The Pythagorean Theorem

## What You'll Learn Skim the Examples in Lesson 10-4. Predict two things you think you will learn about the Pythagorean Theorem.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$
$\qquad$

Active Vocabulary New Vocabulary Write the definition next to each term.
$\qquad$
$\qquad$

# hypotenuse <br> Pythagorean Theorem 

$\qquad$
$\qquad$
$\qquad$
converse of the Pythagorean Theorem
$\qquad$
$\qquad$
Lesson 10-4 (continued)

## Details

Use the Pythagorean Theorem
pp. 558-559

Fill in the organizer about using the Pythagorean Theorem.

Use the Converse of the Pythagorean Theorem p. 600

Fill in the blanks and determine whether each triangle is a right triangle.

1. 12 in., 35 in., 37 in.

$$
a^{2}+b^{2}=c^{2}
$$

$\square$

$\square$
$\square$ $\stackrel{\square}{=} \square$

Is it a right triangle?
2. $7 \mathrm{~cm}, 23 \mathrm{~cm}, 24 \mathrm{~cm}$ $a^{2}+b^{2}=c^{2}$

Is it a right triangle?
$\qquad$
$\qquad$
$\qquad$

## 10-5 The Distance Formula

## What You'll Learn <br> Skim the lesson. Predict two things that you expect to learn based on the headings and the Key Concept boxes.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary

Review Vocabulary Label the diagram with the correct term. (Lessons 10-3 and 10-4)

distance formula

New Vocabulary Fill in each blank with the correct term or phrase.

The distance $d$ between $\qquad$ with coordinates
$\qquad$ and $\qquad$ is given by the formula
$d=$ $\qquad$
$\qquad$
$\qquad$
Lesson 10-5 (continued)

## Main Idea

Find the Distance Between Points
pp. 565-566

Apply the Distance Formula
p. 567

## Details

Model the solution to find the distance between the points on the coordinate plane. Use the lines to show your calculations. Round to the nearest tenth if necessary.
$\left(x_{1}, y_{1}\right)=(-4,3) ;\left(x_{2}, y_{2}\right)=(5,5)$

## AB

$\qquad$
$\qquad$

$\qquad$

Fill in each blank to describe the steps to classify a triangle by its sides on a coordinate plane and then find its perimeter.

Step 1
Step 2
Step 3
Use the distance formula,
to find the $\qquad$
of each side.

$\rightarrow$| Step 2 |
| :--- |
| the <br> triangle as scalene, <br> equilateral, or <br> isosceles using the |

## Helping You Remember

Describe how you would find the perimeter of
$\triangle S T U$. List any formulas that must be used.
$\qquad$
$\qquad$
$\qquad$
$\qquad$

$\qquad$
$\qquad$

## 10-6 Special Right Triangles

## What You'll Learn

## Active Vocabulary

$\qquad$
$\qquad$ -
the point where two line segments that form a side of a triangle meet
figures that have the same shape but not necessarily the same size

## Main Idea

Review Vocabulary Write the term next to each definition. (Lessons 6-7, 10-1, 10-3, and 10-4)
formed by three line segments that intersect only at their endpoints
Scan Lesson 10-6. List two headings you would use to make an outline of this lesson.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$
same

## Details

Find Measures in 45-45-90 Triangles pp. 571-572

Use $\triangle A B C$ to fill in each blank.

1. The measure of $\angle B$ is $\qquad$ because $\qquad$
2. The length of the hypotenuse, $h$, is $\qquad$ because
$\qquad$
$\qquad$
3. The length of side, $l$, is 12 meters because $\qquad$
$\qquad$
$\qquad$
$\qquad$

Find Measures in 30-60-90 Triangles pp. 572-573

Compare 45-45 90 and $30 \quad 6090$ triangles by filling in each blank of the organizer.

| Special Right Triangles |  |
| :---: | :---: |
| $\downarrow$ | $\downarrow$ |
| $\begin{gathered} 45-45-90 \\ \text { Triangles } \end{gathered}$ | $\begin{gathered} 30-60-90 \\ \text { Triangles } \end{gathered}$ |
| $\downarrow$ | $\downarrow$ |
| The length of the hypotenuse is $\qquad$ times the length of $\qquad$ leg. | The length of the hypotenuse is $\qquad$ times the length of the $\qquad$ leg. |
| $\downarrow$ | $\downarrow$ |
| The length of the two legs are $\qquad$ | The length of the $\qquad$ leg is $\qquad$ times the length of the $\qquad$ leg. |

## Helping You Remember

Describe the properties of a $30^{\circ} 60^{\circ}-90^{\circ}$ triangle. Include the ways that students sometimes mismeasure the side lengths or angles.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$ PERIOD $\qquad$

## In

## Real Numbers and Right Triangles

## Tie It Together

Sketch an example of each type of triangle if possible. If the sketch is not possible mark an $X$ in the box.

| Angle Measure/ |
| :---: | :---: | :---: | :---: |
| Side Length |$\quad$ Acute | Obtuse | Right |
| :--- | :--- |
| Equilateral |  |

$\qquad$
$\qquad$

## curne <br> 10 Real Numbers and Right Triangles

## Before the Test

Review the ideas you listed in the table at the beginning of the chapter. Cross out any incorrect information in the first column. Then complete the table by filling in the third column.

| K | W | L |
| :---: | :---: | :---: |
| What I know... | What I want to find out... | What I learned... |
|  |  |  |
|  |  |  |

Math Online Visit glencoe.com to access your textbook, more examples, self-check quizzes, personal tutors, and practice tests to help you study for concepts in Chapter 10.

## Are You Ready for the Chapter Test?

Use this checklist to help you study.I used my Foldable to complete the review of all or most lessons.I completed the Chapter 10 Study Guide and Review in the textbook.I took the Chapter 10 Practice Test in the textbook.I used the online resources for additional review options.I reviewed my homework assignments and made corrections to incorrect problems.I reviewed all vocabulary from the chapter and their definitions.

## Study Tips

- Use abbreviations while note-taking to use less time and room. Write neatly and place a question mark by any information that you do not understand.
$\qquad$
$\qquad$
$\qquad$

## curne <br> 11 Distance and Angle

## Before You Read

Before you read the chapter, respond to these statements.

1. Write an $\mathbf{A}$ if you agree with the statement.
2. Write a $\mathbf{D}$ if you disagree with the statement.

| Before You Read | Distance and Angle |
| :--- | :--- |
|  | - Parallel lines intersect to form right <br> angles. |
|  | • A figure that rotates about a fixed <br> point does not change shape or size. |
|  | • A quadrilateral is a polygon that has <br> four sides. |
|  | - An example of a polygon is a circle. |
|  | - The formula to find the <br> circumference of a circle is $C=2 \pi r$. |

Construct the Foldable as directed at the beginning of this chapter.

## Note Taking Tips

- It is helpful to read through your notes before beginning your homework. Look over any page referenced material.
- As soon as possible, go over your notes.

Clarify any ideas that were not complete.
$\qquad$
$\qquad$

## curtio <br> 11 Distance and Angle

## Key Points

Scan the pages in the chapter and write at least one specific fact concerning each lesson. For example, in the lesson on quadrilaterals, one fact might be that the sum of the measures of the angles of a quadrilateral is $360^{\circ}$. After completing the chapter, you can use this table to review for your chapter test.

| Lesson | Fact |
| :--- | :--- |
| 11-1 Angle and Line Relationships |  |
| 11-2 Congruent Triangles |  |
| $11-3$ Rotations |  |
| $11-4$ Quadrilaterals |  |
| $11-5$ Polygons |  |
| $11-6$ Area of Parallelograms, Triangles, |  |
| and Trapezoids |  |
| $11-7$ Circles and Circumference |  |
| 1 Area of Composite Figures |  |

$\qquad$

## 11-1 Angle and Line Relationships

## What You'll Learn

Active Vocabulary
vertical angles
adjacent angles
complementary angles
supplementary angles
perpendicular lines
parallel lines
transversal
alternative interior angles
alternative exterior angles
corresponding angles

Skim Lesson 11-1. Predict two things that you expect to learn based on the headings and the Key Concept boxes.
1.
2.

New Vocabulary Write the definition next to each term.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## Lesson 11-1 (continued)

## Details

## Angle Relationships

pp. 589-590

Complete the model so that $\angle A B C$ is complementary to $\angle A B D$ and $\angle A B C$ is supplementary to $\angle A B D$. Label each angle measure.

| Complementary Angles | Supplementary Angles |
| :---: | :---: |

## Parallel Lines

pp. 590-591

Draw a transversal $\boldsymbol{t}$ which intersects with two parallel lines $a$ and $b$. Label all interior angles, exterior angles, alternative interior and exterior angles, and corresponding angles.

## Helping You Remember

Look up the meaning of the prefix trans- in the dictionary. Write down four words that have trans- as a prefix. How can the meaning of the prefix help you remember the meaning of transversal?
$\qquad$
$\qquad$

## 11-2 Congruent Triangles

## What You'll Learn Scan Lesson 11-2. List two headings you would use to make an outline of this lesson.

1. $\qquad$
$\qquad$
2. $\qquad$

## Active Vocabulary

Review Vocabulary Write the correct term next to each definition. (Lesson 10-3)
$\qquad$ formed by three line segments that intersect only at their endpoints
the point where two line segments that form a side of a triangle meet

## the part of a line containing two endpoints and all of the points between them

New Vocabulary Fill in each blank with the correct term or phrase.
congruent $\qquad$ that have the same $\qquad$
and $\qquad$ are congruent.
corresponding parts
The $\qquad$ of $\qquad$ triangles that
$\qquad$ or correspond are called corresponding parts.
$\qquad$
$\qquad$

## Lesson 11-2 (continued)

## Main Idea

## Corresponding Parts

pp. 598-600

Identify Congruent Triangles pp. 600-601

## Details

Fill in each blank to complete the congruence statements for the congruent triangles below.

1. $\triangle J K L \cong \triangle \square$
2. $\triangle K J L \cong \triangle \square$
3. $\triangle \square \cong \triangle N O M$
4. $\triangle \square \cong \triangle O M N$
5. $\triangle J L K \cong \triangle \square$
6. $\triangle L K J \cong \triangle \square$

Fill in the diagram to complete the steps to determine congruent triangles. Use the terms statement, order, angles, vertices, and sides.
Step 1
Step 2
Step 3

## Helping You Remember

Corresponding is a word used in everyday English as well as in mathematics. Write the definition of corresponding. Explain how the English definition can help you remember how corresponding is used in mathematics.
$\qquad$
$\qquad$
$\qquad$

## 11-3 Rotations

# What You'll Learn Skim the Examples for Lesson 11-3. Predict two things that you will learn about rotations. 

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

# Active Vocabulary 

New Vocabulary Match each definition with the correct term by drawing a line to connect the two.
rotation
center of rotation
rotational symmetry retry
when a figure can be rotated less than $360^{\circ}$ about its center so that its image matches the original figure
a transformation where a figure is turned about a fixed point

Vocabulary Link Rotational and symmetry are two words used in everyday English. Find the definitions of rotational and symmetry using a dictionary. List three examples of something that has rotational symmetry.
$\qquad$
$\qquad$

## Lesson 11-3 (continued)

## Main Idea

## Rotations

pp. 605-607

## Rotational Symmetry

 p. 607Draw the letter after a $90^{\circ}$ counterclockwise rotation around the point.

Fill in the organizer about rotational symmetry.

| How do you decide if a <br> figure has rotational <br> symmetry? | How do you find the <br> angle of rotation? |
| :--- | :--- |
|  |  |

## Helping You Remember

A classmate was absent the day that rotation and rotational symmetry were taught. Provide an explanation of the two concepts.
$\qquad$
$\qquad$
$\qquad$

## 11-4 Quadrilaterals

## What You'll Learn <br> Skim the lesson. Write two things you already know about quadrilaterals.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary

Review Vocabulary Write the definition next to each term. (Lesson 10-3)

vertex

segment

New Vocabulary Fill in each blank with the correct term or phrase.
quadrilateral $\downarrow$ A quadrilateral is a __ figure with segments that form a quadrilateral only at their $\qquad$ .

Vocabulary Link Quad- is a prefix used in everyday English as well as in mathematics. Write the meaning of the prefix quad-. Write two examples of words used in everyday life that have quad- as a prefix and their meanings.
$\qquad$
$\qquad$

## Lesson 11-4 (continued)

## Main Idea

## Find Angle Measures

pp. 612-613

## Details

Explain how the model proves that a quadrilateral has angles whose measures have a sum of $360^{\circ}$.

Classify Quadrilaterals p. 613

Fill in the organizer to classify and describe each figure. Then draw lines to connect the figures and show their relationships.

$\qquad$
$\qquad$

## 11-5 Polygons

## What You'l| Learn $\quad$ Scan the text in Lesson 11-5. Write two facts you learned about polygons.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary

New Vocabulary Label the diagram with the correct terms.

Vocabulary Link Tessellation can be illustrated by real-world examples. Look around the room. Give two examples of realworld tessellations.
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## Main Idea

## Details

Classify Polygons p. 617

Circle the figures that are not polygons. If a figure is not a polygon, write the reason inside or beside the figure.

Fill in each blank with the number of interior angles for each figure. Then write the sum of the measures of the interior angles.

1. heptagon
2. rhombus

A heptagon is a _sided figure.
So, $(n-2) 180=(--2) 180$
$n=$ $\qquad$ The sum is $\qquad$ -

A rhombus is a 4-sided figure. So, $(n-2) 180=(\ldots-2) 180$ $n=$ $\qquad$ The sum is $\qquad$ -

Cross out the figure that can not be used to make a tessellation. Explain.

$\qquad$
$\qquad$

## 11-6 Area: Parallelograms, Triangles, and Trapezoids

## What You'll Learn

2. 

Scan the text under the Now heading. List two things you will learn about in the lesson.

1. $\qquad$
$\qquad$
$\qquad$
$\qquad$

## Active Vocabulary

base
altitude
New Vocabulary Label the diagram with the correct terms.

Vocabulary Link Altitude is a word that is used in everyday English. Find the definition of altitude using a dictionary.
Explain how the English definition can help you remember how altitude is used in mathematics.
$\qquad$
$\qquad$

## Lesson 11-6 (continued)

## Main Idea

## Area of Parallelograms

 p. 624
## Details

Compare the area of a rectangle and the area of a parallelogram.

| Area |  |  |
| :---: | :---: | :---: |
|  | Rectangle | Parallelogram |
| Formula | $A=l w$ | $A=$ |
| Words | Area is length times width. | Area is $\qquad$ times $\qquad$ |
| Model |  |  |
| Examples | A rectangle with length 6 cm and width 5 cm has an area of | A parallelogram with base 10 mm and height 9 mm has an area of |

## Area of Triangles and Trapezoids

pp. 625-626

## Complete to summarize the area of a triangle and a trapezoid.

A parallelogram divided in half by a diagonal results in two congruent triangles. The area of a parallelogram is the sum of the area of the two $\qquad$ . Because the area of a parallelogram is $\qquad$ times $\qquad$ the area of a triangle is half the $\qquad$ times $\qquad$ or $\qquad$ .

A trapezoid with base $a$ and base $b$ can be divided in half by a $\qquad$ resulting in two noncongruent triangles. The sum of the area of those two triangles is $\frac{1}{2} a h+\frac{1}{2} b h$ which is equal to $\qquad$ ( $+$ $\qquad$ ).

## Helping You Remember

> Match the formula with the correct figure by drawing a line to connect them. Then find its area.

$$
A=\frac{1}{2} h(a+b)
$$

$A=\frac{1}{2}(b h)$

$A=b h$
$\qquad$
$\qquad$

## 11-7 Circles and Circumference

## What You'll Learn <br> Skim Lesson 11-7. Predict two things that you expect to learn based on the headings and the Key Concept box.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary <br> New Vocabulary Fill in each blank with the correct term or phrase.

circle $\quad$ the set of all $\qquad$ in a plane that is the same
$\overline{\text { plane }}$ from a given ___ in the
center the given $\qquad$ in the middle of a

$\qquad$
$\qquad$

## Details

## Circumference of Circles

 pp. 631-632Use Circumference to Solve Problems
p. 632

Label each part of the circle. Then find its circumference with the given diameter or radius. Round to the nearest tenth.

1. $r=15 \mathrm{~mm} \quad$ Use $C=2 \pi r$.
$C=2 \pi($ $\qquad$
$C=$ $\qquad$ $\pi$
$C \approx$ $\qquad$ mm
2. $d=8 \mathrm{yd} \quad$ Use $C=\pi d$.
$C=\pi($ $\qquad$ _)
$C \approx$ $\qquad$ yd

$$
-y u
$$

Fill in the blanks to complete the organizer. Round to the nearest tenth.

$\qquad$
$\qquad$

## 11-8 Area of Circles

## What You'll Learn

Scan Lesson 11-8. List two headings you would use to make an outline of this lesson.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary

New Vocabulary Label the diagram with the correct term or phrase.

Vocabulary Link Sector is a word that is used in everyday English. Find the definition of sector using a dictionary. Explain how the English definition can help you remember how sector is used in mathematics.
$\qquad$
$\qquad$

## Main Idea

## Area of Circles

pp. 636-637

## Area of Sectors

p. 638

## Details

Fill in each blank to summarize the formula for the area of a circle.

1. The area of a parallelogram is $\qquad$ .
2. The circumference of a circle is $\qquad$ .
3. The base of the parallelogram is $\qquad$ the circumference of the circle.
So, $b=\frac{1}{2} C=\frac{1}{2}$ ( $\qquad$ ) $=$ $\qquad$ .
4. The height of the parallelogram is the $\qquad$ of the circle.
So, $h=$ $\qquad$ .
5. Substitute the values for $b$ and $h$.

$$
A=b h=
$$

$\qquad$
$\qquad$
Fill in each blank to find the area of a sector.

$$
\begin{array}{rlrl}
A & =\frac{N}{360}\left(\pi r^{2}\right) & & \text { Use the formula. } \\
& =\frac{\square}{360}\left(\pi \square^{2}\right) & \begin{array}{l}
N \text { is the number } \\
\text { of degrees of the } \\
\text { central angle. }
\end{array} \\
& =-\pi & \begin{array}{l}
\text { Substitute for } N \\
\text { and } r .
\end{array} \\
& =\square \pi & \text { Simplify. }
\end{array}
$$

$\qquad$

## 11-9 Area of Composite Figures

## What You'll Learn <br> Skim the Examples for Lesson 11-9. Predict two things that you will learn about the area of composite figures.

2. 
3. $\qquad$
$\qquad$
$\qquad$
$\qquad$

## Active Vocabulary

Review Vocabulary Write the definition next to each term.
(Lesson 11-7)
circle $\qquad$
$\qquad$

## CHAPTER <br> 11 Distance and Angle

## Tie It Together

Complete each graphic organizer with a term or formula from the chapter.

$\qquad$
$\qquad$

## chaptir <br> 11 Distance and Angle

## Before the Test

Now that you have read and worked through the chapter, think about what you have learned and complete the table below. Compare your previous answers with these.

1. Write an $\mathbf{A}$ if you agree with the statement.
2. Write a $\mathbf{D}$ if you disagree with the statement.

| Distance and Angles | After You Read |
| :--- | :--- |
| - Parallel lines intersect to form right <br> angles. |  |
| - A figure that rotates about a fixed point <br> does not change shape or size. |  |
| - A quadrilateral is a polygon that has <br> four sides. |  |
| - An example of a polygon is a circle. |  |
| - The formula to find the circumference of |  |
| a circle is $C=2 \pi r$. |  |

Math Online Visit glencoe.com to access your textbook, more examples, self-check quizzes, personal tutors, and practice tests to help you study for concepts in Chapter 11.

## Are You Ready for the Chapter Test?

Use this checklist to help you study.I used my Foldable to complete the review of all or most lessons.I completed the Chapter 11 Study Guide and Review in the textbook.I took the Chapter 11 Practice Test in the textbook.I used the online resources for additional review options.
$\square$ I reviewed my homework assignments and made corrections to incorrect problems.
$\square$ I reviewed all vocabulary from the chapter and their definitions.

- Use the SQ3R method of reading: Survey, Question, Read, Recite, and Review. Survey the text by previewing the headings, boldface words, and examples. Ask questions about what you survey, read with purpose, recite out loud the main points and concepts without looking at the text, and review your text notes or use the chapter review at the end of the chapter.
$\qquad$
$\qquad$

## Surface Area and Volume

## Before You Read

Before you read the chapter, think about what you know about surface area and volume. List three things you already know about them in the first column. Then list three things you would like to learn about them in the second column.

| K | W |
| :---: | :---: |
| What I know... |  |
|  |  |
|  |  |

Construct the Foldable as directed at the beginning of this chapter.

## Note Taking Tips

- Include pictures with your notes.

Having diagrams that are labeled with specific parts of each figure will help you understand the formulas.

- Remember to study your notes daily.

Reviewing small amounts at a time will help you retain the information.
$\qquad$
$\qquad$
$\qquad$

## chatio <br> 12 Surface Area and Volume

## Key Points

Scan the pages in the chapter and write at least one specific fact concerning each lesson. For example, in the lesson on three-dimensional figures, one fact might be that a face is a flat surface. After completing the chapter, you can use this table to review for your chapter test.

| Lesson | Fact |
| :---: | :---: |
| 12-1 Three-Dimensional Figures |  |
| 12-2 Volume of Prisms |  |
| 12-3 Volume of Cylinders |  |
| 12-4 Volume of Pyramids, Cones, and Spheres |  |
| 12-5 Surface Area of Prisms |  |
| 12-6 Surface Area of Cylinders |  |
| 12-7 Surface Area of Pyramids and Cones |  |
| 12-8 Similar Solids |  |

$\qquad$

## 12-1 Three-Dimensional Figures

## What You'll Learn Skim Lesson 12-1. Predict two things that you expect to learn based on the headings and the Key Concept box.

1. $\qquad$
2. 

Active Vocabulary New Vocabulary Write the definition next to each term.
plane $\qquad$
$\qquad$
$\qquad$
$\qquad$
cone $\qquad$
cross section
$\qquad$
$\qquad$

## Lesson 12-1 (continued)

## Details

Identify ThreeDimensional Figures
pp. 664-665

Complete the organizer about three-dimensional figures.

| What are they? | Draw a picture of a three-dimensional figure. |
| :---: | :---: |
|  | Identify these figures. |
| Name some examples. |  |

## Fill in each blank to summarize cross sections.

1. If a cylinder is sliced vertically, the cross section that would result is $\mathrm{a}(\mathrm{n})$ $\qquad$ -.
2. When a triangular pyramid is sliced horizontally, the cross section that results is a(n) $\qquad$ —.
3. When a cone is sliced at an angle, the cross section that results is a(n) $\qquad$ .
4. If a $\qquad$ is sliced vertically, the cross section that would result is a square.

## Helping You Remember

The word polyhedron is composed of the prefix poly- and the root word-hedron. Find the definitions of poly- and hedron- in a dictionary. Write their definitions.
$\qquad$
$\qquad$

## 12-2 Volume of Prisms

## Active Vocabulary

simplest form
like terms
simplifying the expressions

Review Vocabulary Match the term with its definition by drawing a line to connect the two. (Lessons 4-1, 4-2, and 5-1) equation that shows a relationship between quantities terms that contain the same variable
an algebraic expression that has no like terms and no parentheses
formula combine like terms

New Vocabulary Fill in each blank with the correct word or phrase.
volume
The measure of the $\qquad$ occupied by a three-dimensional
$\qquad$ .

Vocabulary Link Volume is a word that is used in everyday English. Find the definition of volume using a dictionary. Write two sentences of how the word volume is used in everyday life.
$\qquad$
$\qquad$

## Details

## Volume of Prism

pp. 671-672

Volume of Composite Figures p. 673

Compare finding the volume of a rectangular prism with a triangular prism.

|  | Rectangular <br> Prism | Triangular <br> Prism |
| :--- | :--- | :--- |
| Formula | $V=$ | $V=$ |
| Area of base | $B=$ | $B=$ |
| Sketch the <br> prism and find <br> its volume. | $\square 10 \mathrm{~cm}$ | 5 cm |

Find the volume of the figure. Show your work.

Find the volume of the top.
Find the volume of the bottom. $\qquad$
Add the volumes. $\qquad$
$\qquad$
$\qquad$

## 12-3 Volume of Cylinders

## What You'll Learn Scan the text under the Now heading. List two things you will learn about in the lesson.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary

Review Vocabulary Write the term next to each definition. (Lessons 5-1 and 11-7)
$\qquad$ the distance around a figure
$\qquad$ an equation that shows a relationship between quantities
the surface enclosed by a figure
$\qquad$ given point called the center
the given point from which all points on the circle are the same distance
the distance from the center to any point on the circle
$\qquad$ the distance across the circle through its center
$\qquad$
the distance around a circle
$\qquad$ the ratio of the circumference to the diameter of the circle
$\qquad$
$\qquad$

## Lesson 12-3 (continued)

Volume of Cylinders
pp. 677-678

Volumes of Composite Figures
p. 678

Compare how to find the volume of the two figures by completing the chart.

| Volume |  |  |
| :--- | :--- | :--- |
|  | Rectangular Prism | Cylinder |
| Formula | $V=B h=l w h$ | $V=B h=$ |
| Words | Volume is the area of <br> the base times the <br> height. | Volume is the |
| Model |  | sample model: |
| Examples | A rectangular prism <br> with length 5 in., a <br> width 9 in., and a <br> height of 10 in. has a <br> volume of | A cylinder with radius <br> 7 mm and height 15 <br> mm has a volume of |

Fill in each blank to complete the steps to find the volume of a composite figure.

Step 1
Step 2
Step 3

| the |
| :--- |

| Find the |
| :--- |
| of each |
| correct $\quad$ using the |

| Find the of <br> the or <br> the volume of the |
| :--- |

## Helping You Remember

Describe how to find the height of a cylinder that has a volume of $2,211 \mathrm{~mm}^{3}$ and a radius of 8 mm .
$\qquad$
$\qquad$
$\qquad$

## 12-4 Volume of Pyramids, Cones, and Spheres

## What You'll Learn

Skim Lesson 12-4. Predict two things you expect to learn based on the headings and the Key Concept boxes.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary

Review Vocabulary Match each term with its definition by drawing a line to connect the two. (Lesson 12-1)
solid a three-dimensional figure with one circular base and a vertex connected by a curved side
polyhedron a three-dimensional figure
prism a solid with flat surfaces that are polygons
cone a polyhedron with one base that is a polygon
pyramid a polyhedron with two parallel congruent bases
New Vocabulary Fill in each blank with the correct term or phrase.
sphere $\quad$ A set of $\qquad$ in space that are a given $\qquad$ $r$ from the $\qquad$ phrase.
$\qquad$
$\qquad$

## Main Idea

Volume of a Cone p. 684

Volume of a Sphere pp. 684-685

## Details

Compare the volume of a cylinder and a cone.
Step 1: Find the volume of the two figures.

$V=$
$V \approx$
Step 2: Make a conjecture about the relationship between the volume of a cylinder and the volume of a cone with the same height and radius.
$\qquad$

Write out each step to find the volume of a sphere with $r=3 \mathrm{~cm}$.

Helping You Remember pyramid at the right.
$V=\frac{1}{3} B h$
$V=\frac{1}{3}\left(\frac{1}{2} \cdot 5 \cdot 8\right) 27$
$V \approx 180$ $\qquad$

$\qquad$
$\qquad$

## 12-5 Surface Area of Prisms

## What You'll Learn <br> Scan the text in Lesson 12-5. Write two facts you learned about the surface area of prisms as you scanned the text.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary

Review Vocabulary Write the term next to each definition. (Lessons 5-1 and 12-1)
the distance around a figure
a flat surface of a solid
one of two congruent faces of a prism

New Vocabulary Write the definition next to each term.

# lateral face 

$\qquad$
lateral area $\qquad$
surface area

Vocabulary Link Lateral is a word that is used in everyday English. Find the definition of lateral using a dictionary. Explain how the English definition can help you remember how lateral is used in mathematics.
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## Details

## Prisms

pp. 691-692
Summarize information about lateral and surface area in the graphic organizer below.

Describe how to find the surface area of the figure below.
$\qquad$
$\qquad$
$\qquad$

$\qquad$

## Helping You Remember

How does drawing a net help you find the surface area of a prism? Draw a prism and its net to justify your answer.
$\qquad$
$\qquad$

## 12-6 Surface Area of Cylinders

## What You'll Learn Skim the lesson. Write two things you already know about the surface area of cylinders.

1. $\qquad$
$\qquad$
2. $\qquad$

Review Vocabulary Fill in each blank with the correct term or phrase. (Lesson 12-1)
cylinder a three-dimensional figure with congruent, bases that are circles connected by a $\qquad$ side

cone a three-dimensional figure with one $\qquad$ base and a
$\qquad$ connected by a $\qquad$ side
vertex where $\qquad$ or more planes intersect at a $\qquad$
face a flat $\qquad$ of a $\qquad$

Vocabulary Link Cylinders are used in everyday life. List four examples of when the lateral area or surface area of a cylinder may be needed.
$\qquad$
$\qquad$

## Lesson 12-6 (continued)

## Main Idea

## Details

## Surface Area of Cylinders

pp. 697-698
Draw the net of the cylinder. Label the radius ( $r$ ), height ( $h$ ), and circumference ( $C$ ) on the net. Net

Fill in the blanks to complete the organizer about surface area of a cylinder.

## Helping You Remember

You want to decorate the side and bottom of a cylindrical flower pot with material. Do you need to calculate the surface area of the pot or the lateral area?
$\qquad$
$\qquad$

## 12-7 Surface Area of Pyramids and Cones

## What You'll Learn <br> Skim the Examples for Lesson 12-7. Predict two things you think you will learn about the surface area of pyramids and cones.

1. $\qquad$
$\qquad$
2. $\qquad$

## Active Vocabulary

Review Vocabulary Write the definition next to each term.
(Lesson 12-5)
lateral face $\qquad$

lateral area

$\qquad$
surface area

New Vocabulary Draw an arrow to the diagram that points the slant height of the pyramid. Then label it with the term slant height.
slant height $>$
regular pyramid

This figure is a $\qquad$ because it has a base that is a regular polygon.
$\qquad$
$\qquad$

## Main Idea

## Details

## Surface Area of Pyramids

pp. 702-703

Draw the net of the pyramid. Label slant height $(\ell)$, base ( $B$ ), and side length ( $s$ ) of the base on the net.

Figure

Net

## Surface Area of Cones

p. 704

Compare the volume of a cone and the surface area of a cone by filling out the chart. Sample answers are given.

| Cone | Volume | Surface Area |
| :--- | :--- | :--- |
| Formula | $V=\frac{1}{3} \pi r^{2} h$ | $S=L+\pi r^{2}$ |
| Words |  |  |
| Example | Find the volume <br> of a cone with a <br> radius of 5 cm and <br> a height of 7 cm. <br> $V \approx$ | Find the surface <br> area of a cone with <br> a radius of 5 cm <br> and a slant height <br> of 7 cm. <br> $S \approx$ |

## Helping You Remember

Prepare a script for a short presentation on how
to find the surface areas of pyramids and cones. Be sure to include any necessary vocabulary terms in your explanation. You may wish to include diagrams with your presentation.
$\qquad$
$\qquad$

## 12-8 Similar Solids

## What You'll Learn

## Active Vocabulary

Scan Lesson 12-8. List two headings you would use to make an outline of this lesson.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$
Review Vocabulary Match the term with the definition by drawing a line to connect the two. (Lessons 6-5 and 6-7)
cross products
similar figures
proportion
figures with congruent corresponding angles and proportional corresponding side lengths

New Vocabulary Fill in each blank with the correct term or phrase.
similar solid
Two figures that have the same $\qquad$ and their measures are
$\qquad$ .

Vocabulary Link Similar solids are seen in everyday life. Give an example of items that have the same shape but not necessarily the same size in real life.
$\qquad$
$\qquad$

Identify Similar Solids pp. 709-710

## Properties of Similar Solids

pp. 710-711

Complete the organizer by filling in each blank to identify similar solids. Then complete the example.

Step 3:

If the $\qquad$ are the solids are .

For each pair of solids listed in the table below, describe measurements you would need to determine if the pair is similar.

| Pair of Solids | Measurements Needed |
| :--- | :--- |
| Rectangular Prisms |  |
| Cylinders |  |
| Square Pyramids |  |
| Triangular Prisms |  |
| Cones |  |

## Helping You Remember

Describe the relationship between similar
figures for surface area and volume.
$\qquad$
$\qquad$
$\qquad$

## cuntio <br> 12 Surface Area and Volume

## Tre It Together

Fill in the formulas for each solid. Label the appropriate variables on each figure.

|  | Prism | Cylinder | Pyramid |
| :--- | :--- | :--- | :--- |
| Volume |  |  |  |
| Lateral Area |  |  |  |
| Surface Area |  |  |  |
|  |  |  |  |

$\qquad$
$\qquad$
$\qquad$

## counte <br> Surface Area and Volume

## Before the Test

Review the ideas you listed in the table at the beginning of the chapter. Cross out any incorrect information in the first column. Then complete the table by filling in the third column.

| K | W | L |
| :---: | :---: | :---: |
| What I know... | What I want to find out... | What I learned... |
|  |  |  |
|  |  |  |

Math Online Visit glencoe.com to access your textbook, more examples, self-check quizzes, personal tutors, and practice tests to help you study for concepts in Chapter 12.

## Are You Ready for the Chapter Test?

Use this checklist to help you study.I used my Foldable to complete the review of all or most lessons.I completed the Chapter 12 Study Guide and Review in the textbook.I took the Chapter 12 Practice Test in the textbook.I used the online resources for additional review options.I reviewed my homework assignments and made corrections to incorrect problems.I reviewed all vocabulary from the chapter and their definitions.

- On handouts, homework, and workbooks that can be written in, underline and highlight significant information.
$\qquad$
$\qquad$
$\qquad$

## chaptir <br> 13 Statistics and Probability

## Before You Read

Before you read the chapter, respond to these statements.

1. Write an $\mathbf{A}$ if you agree with the statement.
2. Write a $\mathbf{D}$ if you disagree with the statement.

| Before You Read | Statistics and Probability |
| :--- | :--- |
|  | - The median of a set of data is the <br> same thing as the average. |
|  | - The range is the difference between <br> the least and greatest numbers. |
|  | A histogram is a type of graph that <br> uses bars. |
|  | - Probability is expressed as a number <br> between 1 and 100. |
|  | - When something is likely to happen, <br> it is certain. |

## FOLDÁS B ES Study Organizer

Construct the Foldable as directed at the beginning of this chapter.

## Note Taking Tips

- When you take notes, it may be helpful to sit as close as possible to the front of the class.
There are fewer distractions and it is easier to hear.
- When taking notes on statistics, include your own statistical examples as you write down concepts and definitions.
This will help you to better understand statistics.
$\qquad$
$\qquad$
$\qquad$

## chante <br> Statistics and Probability

## Key Points

Scan the pages in the chapter and write at least one specific fact concerning each lesson. For example, in the lesson on measures of variation, one fact might be that the median of a set of data separates the set in half. After completing the chapter, you can use this table to review for your chapter test.

| Lesson | Fact |
| :--- | :--- |
| $13-1$ Measures of Central Tendency |  |
| $13-2$ Stem-and-Leaf Plots |  |
| $13-3$ Measures of Variation |  |
| $13-4$ Box-and-Whisker Plots |  |
| $13-5$ Histograms |  |
| $13-6$ Theoretical and Experimental |  |
| $13-7$ Usobability |  |
| $13-10$ Probability of Compound Events |  |
| 1 Permutations and Combinations |  |

$\qquad$
$\qquad$

## 13-1 Measures of Central Tendency

## What You'll Learn <br> Skim Lesson 13-1. Predict two things that you expect to learn based on the headings and the Key Concept box.

1. $\qquad$
$\qquad$
2. $\qquad$

## Active Vocabulary

New Vocabulary Fill in each blank with the missing term or phrase.
mode the $\qquad$ that occur $\qquad$
the $\qquad$ when data is ordered from $\qquad$ to
$\qquad$ or the $\qquad$ of the $\qquad$ two numbers
measures of central tendency -
describes the $\qquad$ of the data
mean
the $\qquad$ of the data $\qquad$ by the
$\qquad$ of items in the $\qquad$ set

Vocabulary Link Median is a word that is used in everyday English. Find the definition of median using a dictionary. Give two examples of how median might be used in everyday life.
$\qquad$
$\qquad$

Measures of Central Tendency
pp. 730-732

## Details

Complete the organizer. Write the three kinds of measures of central tendency with its definition. Then write a problem with the solution to show an example for each.

The heights of a group of friends are $54,62,48,62,58$, and 58 inches. Fill in each blank to find the measures of central tendency.

1. Write the numbers in order from $\qquad$ to $\qquad$
2. Find the $\qquad$ of the numbers and $\qquad$ by $\qquad$
3. The mean is $\qquad$ the median is $\qquad$ and
the mode is $\qquad$
$\qquad$
$\qquad$

## 13-2 Stem-and-Leaf Plots

## What You'll Learn

Scan Lesson 13-2. List two headings you would use to make an outline of this lesson.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary

New Vocabulary Label the stems and leaves in both plots. Then name the two types of plots.

| leaves | 863 | 0 | 479 | 0 | 479 |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | 0 | 1 | 3779 | 1 | 3779 |
|  | 8533 | 2 | 0058 | 2 | 0058 |
| stem-and-leaf plot back-to-back stem-and-plot | 9974 | 3 | 00113 | 3 | 0011347 |
|  | 21 | 4 | 37 | 4 | 37 |
|  |  | 5 | 1 | 5 | 1 |
|  |  |  | $3 \mid 1=31$ |  | $0 \mid 9=9$ |

## Main Idea

## Details

Display Data p. 737

Explain the steps to construct a stem-and-leaf plot.

$\qquad$
$\qquad$

## Details

## Interpret Data

pp. 738-739

Complete the stem-and-leaf plot using the data in the table.

| Books Checked Out Weekly |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 115 | 113 | 125 | 145 | 119 | 117 |
| 101 | 156 | 154 | 118 | 154 | 132 |
| 100 | 122 | 106 | 111 | 126 | 130 |

What does the Stem ' 14 ' represent? $\qquad$
What is the greatest number of books checked out? $\qquad$
What is the mode of the data? $\qquad$
How many weeks does the data cover? $\qquad$

## Helping You Remember

Measures of central tendency can be easily found using a stem-and-leaf plot. Explain how you could use the data in the stem-and-leaf plot below to find the mean, median, and mode. Then find the measures.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

$\qquad$
$\qquad$
$\qquad$
$\qquad$

## 13-3 Measures of Variation

## What You'll Learn <br> Skim the Examples for Lesson 13-3. Predict two things that you will learn about measures of variation.

1. $\qquad$
$\qquad$
2. $\qquad$

## Active Vocabulary

Review Vocabulary Write the term next to the definition.
(Lesson 13-1)
$\qquad$ The middle number when data is ordered from least to greatest or the mean of the middle two numbers

New Vocabulary Fill in the diagram with correct terms.
quartiles
upper quartile
lower quartile
interquartile range
outlier

$\qquad$
$\qquad$

## Lesson 13-3 (continued)

## Main Idea

## Measures of Variation

pp. 743-745

Use Measures of Variation
pp. 745-746

Use the test scores from the table to answer the questions below.

| Jackson | 67 | 80 | 78 | 75 | 80 | 79 | 77 | 79 | 55 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Terry | 68 | 77 | 60 | 77 | 71 | 72 | 52 | 63 | 59 |

What is the range of Jackson's and Terry's scores? $\qquad$
What conclusions can be drawn from the ranges? $\qquad$
$\qquad$

What are the interquartile ranges for each student?

What conclusions can be drawn from the interquartile ranges?
$\square$
$\qquad$
$\qquad$
$\qquad$

## 13-4 Box-and-Whisker Plots

## What You'll Learn <br> Skim the lesson. Write two things you already know about box-and-whisker plots.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary

New Vocabulary Fill in each blank with the correct term or phrase.
box-and-whisker plot $\downarrow$
uses a $\qquad$ to show the $\qquad$ of a set
of $\qquad$ ; also known as a $\qquad$

## Main Idea

## Display Data p. 750

## Details

Complete the organizer to explain the steps to construct a box-and-whisker plot. Then complete the example.

$\qquad$
$\qquad$

## Main Idea

Interpret Box-andWhisker Plots
p. 750

## Details

Use the information from the box-and-whisker plot to answer each question.

## Ages of Arcade Players

1. Which arcade attracts a wider range of ages? $\qquad$
2. What age is $25 \%$ of the age group at Jim's Arcade less than?
3. Compare the median for both arcades. What can you conclude?
$\qquad$
$\qquad$

## Helping You Remember

Describe in detail how to determine if an outlier exists in a data set.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## 13-5 Histograms

## What You'll Learn

Scan the text in Lesson 13-5. Write two facts you learned about histograms.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

Review Vocabulary Write the term under the correct display. (Lessons 13-2 and 13-4)

New Vocabulary Write the term histogram under the correct display.

Vocabulary Link The data on a histogram is in equal intervals. Name three examples of data that could be displayed in a histogram.
$\qquad$
$\qquad$

Displayed Data
p. 757

## Interpret Data

p. 758

Cross out the part of the concept circle that does not belong. Explain.

Use the information from the histogram to answer each question.

1. How many park visitors are under the age of 10 ? $\qquad$ Ages of Park Visitors
2. How many more visitors are in the 10-14 age interval than in the 0-4 age interval?
3. About what percent of the visitors are between ages 15 and 19 ? $\qquad$
$\qquad$
$\qquad$
$\qquad$

## Helping You Remember

Label the histogram: frequency, bar, interval, and histogram. Make a frequency table showing the same information as the histogram.

$\qquad$
$\qquad$

## 13-6 Theoretical and Experimental Probability

## What You'll Learn <br> Scan the text under the Now heading. List two things you will learn about in the lesson.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary New Vocabulary Fill in each blank with the correct term or

 phrase.simple event one $\qquad$ or a collection of $\qquad$
outcomes the $\qquad$ of an event or experiment
sample space $\quad$ the set of all possible $\qquad$
random when each outcome is equally $\qquad$ to occur
> probability

a $\qquad$ that compares the number of $\qquad$ outcomes to the number of $\qquad$ outcomes
theoretical probability
what $\qquad$ occur in an experiment experimental probability
what $\qquad$ occurs when repeating a probability experiment many times
odds in favor the ___ that compares the number of ways an event $\qquad$ occur to the number of ways that the event $\qquad$ occur
odds against $\quad$ the $\qquad$ that compares the number of ways an event
$\qquad$ occur to the number of ways that the event $\qquad$ occur
$\qquad$
$\qquad$

## Main Idea

## Probability of Simple

 Eventspp. 765-767

## Details

Fill in each blank with the terms, certain, impossible, or equally likely. Then answer the questions below with true or false.

1. Probability is a ratio that compares the number of possible outcomes to the number of favorable incomes.
$\qquad$
2. The closer a probability is to 1 , the less likely it is to occur.
3. Experimental probability is what actually happens, while theoretical probability is what should happen. $\qquad$

Use a Sample to Make a Prediction
p. 767

The table shows the results from a survey that asked students about their favorite school subject. If 50 more students are picked at random, predict how many will not have a favorite subject of math?

| Favorite Subject |  |
| :--- | :---: |
| subject | frequency |
| science | 22 |
| social studies | 22 |
| language arts | 26 |
| math | 30 |

## Helping You Remember

Look up theoretical and experimental in the dictionary. How can the definitions help you to remember the difference between theoretical probability and experimental probability?
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## 13-7 Using Sampling to Predict

## What You'll Learn Skim the lesson. Write two things you already know about using sampling to predict.

1. $\qquad$
2. $\qquad$

Active Vocabulary sample
population
unbiased sample
simple random sample
stratified random sample
systemic random sample
biased sample
convenience sample
voluntary response sample
$\qquad$
$\qquad$

## Lesson 13-7 (continued)

Identify Sampling Techniques
pp. 771-772

Validating and Predicting Samples pp. 772-773

Compare biased and unbiased sampling techniques by completing the chart below. Sample answers are given.

| Technique | Biased Sampling | Unbiased Sampling |
| :---: | :--- | :--- |
| What is it? |  |  |
| How are <br> they the <br> same? |  |  |
| How are <br> they <br> different? |  |  |
| What are <br> some <br> examples? |  |  |
| Is it biased <br> or unbiased? | on-line polls that request visitors to <br> participate: <br> a surveyor who visits every $25^{\text {th }}$ house in <br> neighborhood: |  |

A manufacturer makes 1500 phones and tests every $10^{\text {th }}$ phone for defects. Of the phones, 24 were defective.
Is this sampling valid? $\qquad$
How many of the 1500 could you expect to be defective? $\qquad$

## Helping You Remember

biased and unbiased sampling?
How can you remember the difference between
$\qquad$
$\qquad$

## 13-8 Counting Outcomes

## What You'll Learn <br> Skim Lesson 13-8. Predict two things that you expect to learn based on the headings and the Key Concept box.

1. $\qquad$
$\qquad$
2. $\qquad$
$\qquad$

## Active Vocabulary

Review Vocabulary Match each definition with the term by drawing a line to connect the two. (Lesson 13-6)
random
sample space
probability
outcomes
tree diagram -a Principle
the results of an event or experiment
the set of all possible outcomes
when each outcome is likely to occur
a ratio that compares the number of favorable outcomes to the number of possible outcomes

New Vocabulary Fill in each blank with the missing term or phrase.
$\qquad$ that shows different $\qquad$ for an $\qquad$ or
$\qquad$
$\qquad$ to the $\qquad$ of
$\qquad$
$\qquad$

## Lesson 13-8 (continued)

## Main Idea

## Details

## Counting Outcomes

pp. 777-778

Write the two methods to find possible outcomes of an event. Then use each method to find the outcomes of the example.

Find the Probability of an Event
pp. 778-779

Find each probability using a number cube labeled 1 through 6.

1. What is the probability of tossing a 1 and then a 2 ?
2. What is the probability of tossing a number greater than 4 on two consecutive tosses?
$\qquad$
$\qquad$

## 13-9 Permutations and Combinations

## What You'll Learn Scan Lesson 13-9. List two headings you would use to make an outline of this lesson.

1. $\qquad$
$\qquad$
2. $\qquad$

## Active Vocabulary

Review Vocabulary Write the definition next to each term. (Lesson 13-6)
random
probability

## theoretical probability

experimental probability
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

New Vocabulary Fill in each blank with the correct word or phrase.

## permutations

an $\qquad$ or listing in which order $\qquad$ important
an $\qquad$ or listing in which order $\qquad$ important

Vocabulary Link The root of permutation is permute. Look up permute in the dictionary. How can the English definition help you remember the mathematic definition?
$\qquad$
$\qquad$

## Lesson 13-9 (continued)

Main Idea

## Use Permutations

pp. 783-784

## Use Combinations

pp. 784-785

## Details

Fill in each blank to answer the question.
How many ways can a 4 -digit PIN number be made using the numbers 0 through 9 if each number can only be used once?
$P\left(\__{~}\right)=\quad$ Write the notation for a permutation with 10 digits used 4 at a time.

| $P(-\quad)$ | $=-Z_{-} \cdot-\cdot$ |
| ---: | :--- |
| $=$ |  |

Use the Fundamental Counting Principle to find the number of possible permutations.

Cross out the part of the concept circle that does not belong. Then state the relationship between the remaining parts.

## Helping You Remember

Complete the diagram by writing the words combinations and permutations in the correct blanks. Then write a sentence based on the diagram stating the difference between permutations and combinations.
$\qquad$

$\qquad$
$\qquad$

## 13-10 Probability of Compound Events

## What You'll Learn

Skim the Examples for Lesson 13-10. Predict two things that you will learn about the probability of compound events.

1. $\qquad$
$\qquad$
2. $\qquad$

Review Vocabulary Write the term next to the definition.
(Lesson 13-6)
$\qquad$
New Vocabulary Write the term next to each definition.
$\qquad$ - The outcome of one event does not influence the outcomes of a second event.
consists of two or more simple events
two events that cannot happen at the same time

- The outcomes of one event affects the outcomes of a second event.

Vocabulary Link Independent and dependent are words that are used in everyday English. Describe an independent and dependent event that occurs in everyday life.

## Main Idea

## Details

Probabilities of Independent and Dependent Events pp. 790-791

Mutually Exclusive Events
p. 792

Fill in each blank with dependent or independent.

1. A card is turned over and a number cube is tossed.
$\qquad$
2. One marble is randomly picked from a bag. Then a second marble is chosen without replacing the first marble. $\qquad$
3. A scarf is randomly chosen from a bag. After putting the first scarf back into the bag, another scarf is chosen.
$\qquad$
4. Two coins are tossed at the same time. $\qquad$
5. There are a dozen different flavored bagels in a bag. Jackson reaches in and grabs one. Then Iona grabs one.

Compare finding the probability of an independent or dependent event, and two mutually exclusive events. Sample answers are given.

|  | Independent <br> Events | Dependent <br> Events | Mutually <br> Exclusive <br> Events |
| :--- | :--- | :--- | :--- |
| What is it? |  |  |  |
|  |  |  |  |
| How do you <br> find the <br> probability? |  |  |  |

$\qquad$

## Before the Test

Now that you have read and worked through the chapter, think about what you have learned and complete the table below. Compare your previous answers with these.

1. Write an $\mathbf{A}$ if you agree with the statement.
2. Write a $\mathbf{D}$ if you disagree with the statement.

| Statistics and Probability | After You Read |
| :---: | :---: |
| - The median of a set of data is the same thing as the average. |  |
| - The range is the difference between the least and greatest numbers. |  |
| - A histogram is a type of graph that uses bars. |  |
| - Probability is expressed as a number between 1 and 100 . |  |
| - When something is likely to happen, it is certain. |  |

## Are You Ready for the Chapter Test?

Use this checklist to help you study.
$\square$ I used my Foldable to complete the review of all or most lessons.I completed the Chapter 13 Study Guide and Review in the textbook.I took the Chapter 13 Practice Test in the textbook.I used the online resources for additional review options.I reviewed my homework assignments and made corrections to incorrect problems.I reviewed all vocabulary from the chapter and their definitions.

## Study Tips

- If possible, rewrite your notes. Not only can you make them clearer and neater, rewriting them will help you remember the information.
