

Chapter 24 Stock Handling and Inventory Control

Section 24.1 Stock Handling

Review Key Concepts

1. A receiving record describes the goods received by a business. It is important because it serves as a permanent record of delivery.
2. Blind check, direct check, spot check, and quality check are used for checking merchandise.
3. UPC barcodes allow the store to track sales and inventory levels. They also allow customers to spend less time at check out when purchasing items.

Practice Academics

English Language Arts

4. Accept all reasonable and complete responses that use proper grammar, mechanics, and are of proper length. The students must identify at least one application of electronic product code usage. Examples may include the use of RFID tags in warehouse management systems or distribution centers at the carton or pallet level. They should also be able to find examples of how UPCs are currently being used at the product or item level to better address ordering and product availability, assist with inventory control, speed check-outs at POS terminals, and assist with perpetual inventory systems.

Mathematics

5. \$10,750 ($\$43,000 \times 0.25$).
