Preface	xix
P.A.V.E. the Way to Student Learning	xxii
Learning Resources for Instructors and Students	xxiv
Acknowledgments	xxvii
List of <i>How To's</i>	xxix
List of Applications	xxx

1 Matter and Measurement 1

1.1	Chemistry—The Science of Everyday Experience	2
1.2	States of Matter	3
1.3	Classification of Matter	5
1.4	Measurement	8
1.4A	The Metric System	9
1.4B	Measuring Length	10
1.4C	Measuring Mass	10
1.4D	Measuring Volume	11
1.5	Significant Figures	12
1.5A	Determining the Number of Significant Figures	13
1.5B	Using Significant Figures in Multiplication and Division	14
1.5C	Using Significant Figures in Addition and Subtraction	15
1.6	Scientific Notation	16
1.7	Problem Solving Using the Factor–Label Method	19
1.7A	Conversion Factors	19
1.7B	Solving a Problem Using One Conversion Factor	19
1.7C	Solving a Problem Using Two or More Conversion Factors	21
1.8	Focus on Health & Medicine: Problem Solving Using Clinical Conversion Factors	22
1.9	Temperature	24
1.10	Density and Specific Gravity	25
1.10A	Density	25
1.10B	Specific Gravity	27
	Chapter Highlights	27

2 Atoms and the Periodic Table 32

2.1	Elements	33
2.1A	Elements and the Periodic Table	34
2.1B	Focus on the Human Body: The Elements of Life	35
2.1C	Compounds	36
2.2	Structure of the Atom	38
2.3	Isotopes	41
2.3A	Isotopes, Atomic Number, and Mass Number	41
2.3B	Atomic Weight	43
2.3C	Focus on Health & Medicine: Isotopes in Medicine	44

- 2.4 The Periodic Table 45
 - 2.4A Basic Features of the Periodic Table 45
 - 2.4B Characteristics of Groups 1A, 2A, 7A, and 8A 47
 - 2.4C The Unusual Nature of Carbon 49
- 2.5 Electronic Structure 49
- 2.6 Electronic Configurations 52
 - 2.6A First-Row Elements (Period 1) 53
 - 2.6B Second-Row Elements (Period 2) 54
 - 2.6C Electronic Configurations of Other Elements Using the Periodic Table 55
- 2.7 Valence Electrons 57
 - 2.7A Relating Valence Electrons to Group Number 57
 - 2.7B Electron-Dot Symbols 59
- 2.8 Periodic Trends 60
 - 2.8A Atomic Size 60
 - 2.8B Ionization Energy 61
- Chapter Highlights 62

3 Ionic Compounds 67

- 3.1 Introduction to Bonding 68
- 3.2 Ions 69
 - 3.2A Cations and Anions 69
 - 3.2B Relating Group Number to Ionic Charge for Main Group Elements 72
 - 3.2C Metals with Variable Charge 74
 - 3.2D Focus on the Human Body: Important Ions in the Body 75
- 3.3 Ionic Compounds 77
 - 3.3A Formulas for Ionic Compounds 78
 - 3.3B Focus on Health & Medicine: Ionic Compounds in Consumer Products 80
- 3.4 Naming Ionic Compounds 81
 - 3.4A Naming Cations 81
 - 3.4B Naming Anions 81
 - 3.4C Naming Ionic Compounds with Cations from Main Group Metals 82
 - 3.4D Naming Ionic Compounds Containing Metals with Variable Charge 83
 - 3.4E Writing a Formula from the Name of an Ionic Compound 84
- 3.5 Physical Properties of Ionic Compounds 84
- 3.6 Polyatomic Ions 86
 - 3.6A Writing Formulas for Ionic Compounds with Polyatomic Ions 86
 - 3.6B Naming Ionic Compounds with Polyatomic Ions 88
 - 3.6C Focus on Health & Medicine: Useful Ionic Compounds 88
 - 3.6D Focus on Health & Medicine: Treating Osteoporosis 89
- Chapter Highlights 89

4 Covalent Compounds 94

- 4.1 Introduction to Covalent Bonding 95
 - 4.1A Covalent Bonding and the Periodic Table 96
 - 4.1B Focus on the Human Body: Covalent Molecules and the Cardiovascular System 98
- 4.2 Lewis Structures 99
 - 4.2A Drawing Lewis Structures 99
 - 4.2B Multiple Bonds 101
- 4.3 Exceptions to the Octet Rule 103
 - 4.3A Elements in Group 3A 103
 - 4.3B Elements in the Third Row 103

- 4.4 Resonance 104
 - 4.4A Drawing Resonance Structures 104
 - 4.4B Focus on the Environment: Ozone 106
- 4.5 Naming Covalent Compounds 107
- 4.6 Molecular Shape 108
 - 4.6A Two Groups Around an Atom 108
 - 4.6B Three Groups Around an Atom 109
 - 4.6C Four Groups Around an Atom 109
- 4.7 Electronegativity and Bond Polarity 111
- 4.8 Polarity of Molecules 114
- 4.9 Focus on Health & Medicine: Covalent Drugs and Medical Products 116
- Chapter Highlights 117

5 Chemical Reactions 123

- 5.1 Introduction to Chemical Reactions 124
 - 5.1A General Features of Physical and Chemical Changes 124
 - 5.1B Writing Chemical Equations 126
- 5.2 Balancing Chemical Equations 128
- 5.3 The Mole and Avogadro's Number 133
- 5.4 Mass to Mole Conversions 135
 - 5.4A Molar Mass 136
 - 5.4B Relating Grams to Moles 137
 - 5.4C Relating Grams to Number of Atoms or Molecules 138
- 5.5 Mole Calculations in Chemical Equations 139
- 5.6 Mass Calculations in Chemical Equations 140
 - 5.6A Converting Moles of Reactant to Grams of Product 140
 - 5.6B Converting Grams of Reactant to Grams of Product 143
- 5.7 Percent Yield 146
 - 5.7A Calculating Percent Yield 146
 - 5.7B Calculating Percent Yield from Grams of Reactant 148
 - 5.7C Focus on Health & Medicine: The Importance of Percent Yield in the Pharmaceutical Industry 149
- 5.8 Limiting Reactants 151
 - 5.8A Determining the Limiting Reactant 151
 - 5.8B Using the Limiting Reactant to Determine How Much Product Is Formed 153
 - 5.8C Determining the Limiting Reactant Using the Number of Grams 154
- 5.9 Oxidation and Reduction 156
 - 5.9A General Features of Oxidation–Reduction Reactions 156
 - 5.9B Examples of Oxidation–Reduction Reactions 158
- 5.10 Focus on Health & Medicine: Pacemakers 160
- Chapter Highlights 161

6 Energy Changes, Reaction Rates, and Equilibrium 167

- 6.1 Energy 168
 - 6.1A The Units of Energy 168
 - 6.1B Focus on the Human Body: Energy and Nutrition 169
- 6.2 Energy Changes in Reactions 170
 - 6.2A Bond Dissociation Energy 171
 - 6.2B Calculations Involving ΔH Values 173
- 6.3 Energy Diagrams 175
- 6.4 Reaction Rates 178
 - 6.4A How Concentration and Temperature Affect Reaction Rate 178
 - 6.4B Catalysts 179

- 6.4C Focus on the Human Body: Lactase, a Biological Catalyst 180
- 6.4D Focus on the Environment: Catalytic Converters 181
- 6.5 Equilibrium 182**
 - 6.5A The Equilibrium Constant 183
 - 6.5B The Magnitude of the Equilibrium Constant 184
 - 6.5C Calculating the Equilibrium Constant 186
- 6.6 Le Châtelier's Principle 187**
 - 6.6A Concentration Changes 187
 - 6.6B Temperature Changes 189
 - 6.6C Pressure Changes 190
- 6.7 Focus on the Human Body: Body Temperature 191**
- Chapter Highlights 192

7 Gases, Liquids, and Solids 198

- 7.1 The Three States of Matter 199**
- 7.2 Gases and Pressure 200**
 - 7.2A Properties of Gases 200
 - 7.2B Gas Pressure 201
 - 7.2C Focus on Health & Medicine: Blood Pressure 202
- 7.3 Gas Laws That Relate Pressure, Volume, and Temperature 203**
 - 7.3A Boyle's Law—How the Pressure and Volume of a Gas Are Related 203
 - 7.3B Charles's Law—How the Volume and Temperature of a Gas Are Related 205
 - 7.3C Gay-Lussac's Law—How the Pressure and Temperature of a Gas Are Related 207
 - 7.3D The Combined Gas Law 209
- 7.4 Avogadro's Law—How Volume and Moles Are Related 210**
- 7.5 The Ideal Gas Law 213**
- 7.6 Dalton's Law and Partial Pressures 216**
- 7.7 Intermolecular Forces, Boiling Point, and Melting Point 218**
 - 7.7A London Dispersion Forces 218
 - 7.7B Dipole–Dipole Interactions 219
 - 7.7C Hydrogen Bonding 219
 - 7.7D Boiling Point and Melting Point 221
- 7.8 The Liquid State 222**
 - 7.8A Vapor Pressure 223
 - 7.8B Viscosity and Surface Tension 224
- 7.9 The Solid State 226**
- 7.10 Energy and Phase Changes 227**
 - 7.10A Converting a Solid to a Liquid 227
 - 7.10B Converting a Liquid to a Gas 228
 - 7.10C Converting a Solid to a Gas 229
- 7.11 Heating and Cooling Curves 230**
- Chapter Highlights 233

8 Solutions 241

- 8.1 Introduction 242**
- 8.2 Solubility—General Features 244**
 - 8.2A Basic Principles 244
 - 8.2B Ionic Compounds—Additional Principles 247
- 8.3 Solubility—Effects of Temperature and Pressure 248**
 - 8.3A Temperature Effects 248
 - 8.3B Pressure Effects 249

- 8.4 Concentration Units—Percent Concentration 249
 - 8.4A Weight/Volume Percent 250
 - 8.4B Volume/Volume Percent 251
 - 8.4C Using a Percent Concentration as a Conversion Factor 252
 - 8.4D Parts Per Million 253
- 8.5 Concentration Units—Molarity 254
- 8.6 Dilution 258
- 8.7 Colligative Properties 260
 - 8.7A Boiling Point Elevation 260
 - 8.7B Freezing Point Depression 261
- 8.8 Osmosis and Dialysis 262
 - 8.8A Osmotic Pressure 262
 - 8.8B Focus on the Human Body: Osmosis and Biological Membranes 264
 - 8.8C Focus on Health & Medicine: Dialysis 265
- Chapter Highlights 266

9 Acids and Bases 273

- 9.1 Introduction to Acids and Bases 274
 - 9.1A Brønsted–Lowry Acids 275
 - 9.1B Brønsted–Lowry Bases 277
- 9.2 The Reaction of a Brønsted–Lowry Acid with a Brønsted–Lowry Base 278
- 9.3 Acid and Base Strength 281
 - 9.3A Relating Acid and Base Strength 281
 - 9.3B Using Acid Strength to Predict the Direction of Equilibrium 286
- 9.4 Equilibrium and Acid Dissociation Constants 287
- 9.5 Dissociation of Water 290
- 9.6 The pH Scale 292
 - 9.6A Calculating pH 292
 - 9.6B Calculating pH Using a Calculator 295
 - 9.6C Focus on the Human Body: The pH of Body Fluids 296
- 9.7 Common Acid–Base Reactions 297
 - 9.7A Reaction of Acids with Hydroxide Bases 297
 - 9.7B Reaction of Acids with Bicarbonate and Carbonate 298
- 9.8 The Acidity and Basicity of Salt Solutions 299
- 9.9 Titration 301
- 9.10 Buffers 303
 - 9.10A General Characteristics of a Buffer 303
 - 9.10B Calculating the pH of a Buffer 306
 - 9.10C Focus on the Environment: Acid Rain and a Naturally Buffered Lake 307
- 9.11 Focus on the Human Body: Buffers in the Blood 308
- Chapter Highlights 309

10 Nuclear Chemistry 315

- 10.1 Introduction 316
 - 10.1A Isotopes 316
 - 10.1B Types of Radiation 317
 - 10.1C Focus on Health & Medicine: The Effects of Radioactivity 319
- 10.2 Nuclear Reactions 319
 - 10.2A Alpha Emission 319
 - 10.2B Beta Emission 320
 - 10.2C Positron Emission 322
 - 10.2D Gamma Emission 323

- 10.3 Half-Life 325
 - 10.3A General Features 325
 - 10.3B Archaeological Dating 326
- 10.4 Detecting and Measuring Radioactivity 327
 - 10.4A Measuring the Radioactivity in a Sample 328
 - 10.4B Measuring Human Exposure to Radioactivity 328
- 10.5 Focus on Health & Medicine: Medical Uses of Radioisotopes 329
 - 10.5A Radioisotopes Used in Diagnosis 329
 - 10.5B Radioisotopes Used in Treatment 330
 - 10.5C Positron Emission Tomography—PET Scans 331
- 10.6 Nuclear Fission and Nuclear Fusion 332
 - 10.6A Nuclear Fission 332
 - 10.6B Nuclear Fusion 334
- 10.7 Focus on Health & Medicine: Medical Imaging Without Radioactivity 335
- Chapter Highlights 336

11 Introduction to Organic Molecules and Functional Groups 341

- 11.1 Introduction to Organic Chemistry 342
- 11.2 Characteristic Features of Organic Compounds 343
- 11.3 Shapes of Organic Molecules 346
- 11.4 Drawing Organic Molecules 350
 - 11.4A Condensed Structures 350
 - 11.4B Skeletal Structures 352
- 11.5 Functional Groups 354
 - 11.5A Hydrocarbons 355
 - 11.5B Compounds Containing a Single Bond to a Heteroatom 356
 - 11.5C Compounds Containing a C=O Group 356
- 11.6 Properties of Organic Compounds 361
 - 11.6A Polarity 361
 - 11.6B Solubility 364
 - 11.6C Focus on the Environment: Environmental Pollutants 365
- 11.7 Focus on Health & Medicine: Vitamins 366
 - 11.7A Vitamin A 366
 - 11.7B Vitamin C 367
- Chapter Highlights 369

12 Alkanes 376

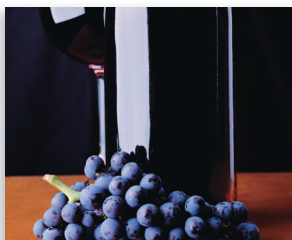

- 12.1 Introduction 377
- 12.2 Simple Alkanes 378
 - 12.2A Acyclic Alkanes Having Fewer Than Five Carbons 378
 - 12.2B Acyclic Alkanes Having Five or More Carbons 380
 - 12.2C Classifying Carbon Atoms 381
 - 12.2D Bond Rotation and Skeletal Structures for Acyclic Alkanes 382
- 12.3 An Introduction to Nomenclature 383
 - 12.3A The IUPAC System of Nomenclature 383
 - 12.3B Focus on Health & Medicine: Naming New Drugs 384
- 12.4 Alkane Nomenclature 384
 - 12.4A Naming Substituents 385
 - 12.4B Naming an Acyclic Alkane 386
- 12.5 Cycloalkanes 389
 - 12.5A Simple Cycloalkanes 389
 - 12.5B Naming Cycloalkanes 390

- 12.6 Focus on the Environment: Fossil Fuels 392
- 12.7 Physical Properties 394
- 12.8 Focus on the Environment: Combustion 394
- Chapter Highlights 396

13 Unsaturated Hydrocarbons 402

- 13.1 Alkenes and Alkynes 403
- 13.2 Nomenclature of Alkenes and Alkynes 405
- 13.3 Cis–Trans Isomers 408
 - 13.3A Stereoisomers—A New Class of Isomer 408
 - 13.3B Focus on Health & Medicine: Saturated and Unsaturated Fatty Acids 411
- 13.4 Interesting Alkenes in Food and Medicine 413
- 13.5 Focus on Health & Medicine: Oral Contraceptives 414
- 13.6 Reactions of Alkenes 415
 - 13.6A Addition of Hydrogen—Hydrogenation 416
 - 13.6B Addition of Halogen—Halogenation 416
 - 13.6C Addition of Hydrogen Halides—Hydrohalogenation 417
 - 13.6D Addition of Water—Hydration 419
- 13.7 Focus on Health & Medicine: Margarine or Butter? 420
- 13.8 Polymers—The Fabric of Modern Society 422
 - 13.8A Synthetic Polymers 422
 - 13.8B Focus on the Environment: Polymer Recycling 424
- 13.9 Aromatic Compounds 425
- 13.10 Nomenclature of Benzene Derivatives 426
 - 13.10A Monosubstituted Benzenes 426
 - 13.10B Disubstituted Benzenes 427
 - 13.10C Polysubstituted Benzenes 427
 - 13.10D Aromatic Compounds with More Than One Ring 428
- 13.11 Focus on Health & Medicine: Aromatic Drugs, Sunscreens, and Carcinogens 429
- 13.12 Focus on Health & Medicine: Phenols as Antioxidants 431
- 13.13 Reactions of Aromatic Compounds 432
 - 13.13A Chlorination and the Synthesis of the Pesticide DDT 432
 - 13.13B Focus on Health & Medicine: Nitration and Sulfa Drugs 433
 - 13.13C Sulfonation and Detergent Synthesis 434
- Chapter Highlights 435

14 Organic Compounds That Contain Oxygen, Halogen, or Sulfur 442

- 14.1 Introduction 443
- 14.2 Structure and Properties of Alcohols 445
- 14.3 Nomenclature of Alcohols 447
- 14.4 Interesting Alcohols 449
- 14.5 Reactions of Alcohols 451
 - 14.5A Dehydration 451
 - 14.5B Oxidation 453
 - 14.5C Focus on the Human Body: Oxidation and Blood Alcohol Screening 455
- 14.6 Focus on Health & Medicine: Ethanol, the Most Widely Abused Drug 456
 - 14.6A The Metabolism of Ethanol 456
 - 14.6B Health Effects of Alcohol Consumption 457
- 14.7 Structure and Properties of Ethers 458
 - 14.7A Physical Properties 459
 - 14.7B Naming Ethers 460

- 14.8 Focus on Health & Medicine: Ethers as Anesthetics 461
- 14.9 Alkyl Halides 462
 - 14.9A Physical Properties 462
 - 14.9B Nomenclature 463
 - 14.9C Interesting Alkyl Halides 464
 - 14.9D Focus on the Environment: Alkyl Halides and the Ozone Layer 464
- 14.10 Organic Compounds That Contain Sulfur 466
- Chapter Highlights 468

15 The Three-Dimensional Shape of Molecules 475

- 15.1 Isomers—A Review 476
- 15.2 Looking Glass Chemistry—Molecules and Their Mirror Images 477
 - 15.2A What It Means to Be Chiral or Achiral 478
 - 15.2B The Chirality of Molecules 478
 - 15.2C Chirality in Nature 480
- 15.3 Chirality Centers 480
 - 15.3A Locating Chirality Centers 480
 - 15.3B Drawing a Pair of Enantiomers 483
- 15.4 Chirality Centers in Cyclic Compounds 484
 - 15.4A Locating Chirality Centers on Ring Carbons 484
 - 15.4B Focus on Health & Medicine: The Unforgettable Legacy of Thalidomide 484
- 15.5 Focus on Health & Medicine: Chiral Drugs 485
 - 15.5A Chiral Pain Relievers 486
 - 15.5B Parkinson's Disease and L-Dopa 487
- 15.6 Fischer Projections 488
- 15.7 Optical Activity 490
 - 15.7A The Physical Properties of Enantiomers 490
 - 15.7B Specific Rotation 491
- 15.8 Compounds with Two or More Chirality Centers 492
- 15.9 Focus on the Human Body: The Sense of Smell 495
- Chapter Highlights 496

16 Aldehydes and Ketones 503

- 16.1 Structure and Bonding 504
- 16.2 Nomenclature 506
 - 16.2A Naming Aldehydes 506
 - 16.2B Naming Ketones 507
- 16.3 Physical Properties 508
- 16.4 Focus on Health & Medicine: Interesting Aldehydes and Ketones 510
- 16.5 Reactions of Aldehydes and Ketones 512
 - 16.5A General Considerations 512
 - 16.5B Oxidation of Aldehydes 512
- 16.6 Reduction of Aldehydes and Ketones 514
 - 16.6A Specific Features of Carbonyl Reductions 515
 - 16.6B Examples of Carbonyl Reduction in Organic Synthesis 516
 - 16.6C Focus on the Human Body: Biological Reductions 517
- 16.7 Focus on the Human Body: The Chemistry of Vision 518
- 16.8 Acetal Formation 520
 - 16.8A Acetals and Hemiacetals 520
 - 16.8B Cyclic Hemiacetals 522
 - 16.8C Acetal Hydrolysis 524
- Chapter Highlights 525

17 Carboxylic Acids, Esters, and Amides 534

- 17.1 Structure and Bonding 535
- 17.2 Nomenclature 537
 - 17.2A Naming a Carboxylic Acid— RCOOH 537
 - 17.2B Naming an Ester— RCOOR' 539
 - 17.2C Naming an Amide 540
- 17.3 Physical Properties 541
- 17.4 Interesting Carboxylic Acids in Consumer Products and Medicines 543
 - 17.4A Focus on Health & Medicine: Skin Care Products 543
 - 17.4B Focus on Health & Medicine: Aspirin and Anti-Inflammatory Agents 544
- 17.5 Interesting Esters and Amides 545
- 17.6 The Acidity of Carboxylic Acids 546
 - 17.6A Reactions with Bases 546
 - 17.6B Carboxylate Anions—Salts of Carboxylic Acids 547
 - 17.6C How Does Soap Clean Away Dirt? 549
- 17.7 Focus on Health & Medicine: Aspirin 550
- 17.8 The Conversion of Carboxylic Acids to Esters and Amides 552
 - 17.8A Ester Formation 552
 - 17.8B Amide Formation 554
- 17.9 Hydrolysis of Esters and Amides 556
 - 17.9A Ester Hydrolysis 556
 - 17.9B Amide Hydrolysis 557
 - 17.9C Focus on Health & Medicine: Olestra, a Synthetic Fat 558
- 17.10 Synthetic Polymers in Modern Society—Polyamides and Polyesters 560
 - 17.10A Nylon—A Polyamide 560
 - 17.10B Polyesters 561
 - 17.10C Focus on Health & Medicine: Dissolving Sutures 562
 - 17.10D Focus on the Environment: Polymer Recycling 563
- 17.11 Focus on Health & Medicine: Penicillin 563
- Chapter Highlights 564

18 Amines and Neurotransmitters 571

- 18.1 Structure and Bonding 572
- 18.2 Nomenclature 575
 - 18.2A Primary Amines 575
 - 18.2B Secondary and Tertiary Amines 575
 - 18.2C Aromatic Amines 576
 - 18.2D Miscellaneous Nomenclature Facts 577
- 18.3 Physical Properties 577
- 18.4 Focus on Health & Medicine: Caffeine and Nicotine 579
 - 18.4A Caffeine 579
 - 18.4B Nicotine 580
- 18.5 Alkaloids—Amines from Plant Sources 581
 - 18.5A Morphine and Related Alkaloids 581
 - 18.5B Quinine 582
 - 18.5C Atropine 583
- 18.6 Amines as Bases 583
 - 18.6A Reaction of Amines with Acids 584
 - 18.6B Ammonium Salts 585
- 18.7 Focus on Health & Medicine: Ammonium Salts as Useful Drugs 587
- 18.8 Neurotransmitters 588
 - 18.8A Norepinephrine and Dopamine 589
 - 18.8B Serotonin 590
 - 18.8C Acetylcholine and Nicotine Addiction 591

- 18.9** Focus on the Human Body: Epinephrine and Related Compounds 592
 - 18.9A Derivatives of 2-Phenylethylamine 593
 - 18.9B Drugs to Treat Asthma 594
- 18.10** Focus on Health & Medicine: Histamine and Antihistamines 594
 - Chapter Highlights 595

19 Lipids 601

- 19.1** Introduction to Lipids 602
- 19.2** Fatty Acids 604
- 19.3** Waxes 607
- 19.4** Triacylglycerols—Fats and Oils 608
 - 19.4A General Features 609
 - 19.4B Focus on Health & Medicine: Fats and Oils in the Diet 611
- 19.5** Hydrolysis of Triacylglycerols 613
 - 19.5A Focus on the Human Body: Metabolism of Triacylglycerols 614
 - 19.5B Soap Synthesis 615
- 19.6** Phospholipids 617
 - 19.6A Phosphoacylglycerols 617
 - 19.6B Sphingomyelins 619
- 19.7** Cell Membranes 621
 - 19.7A Structure of the Cell Membrane 621
 - 19.7B Transport Across a Cell Membrane 623
- 19.8** Focus on Health & Medicine: Cholesterol, the Most Prominent Steroid 624
- 19.9** Steroid Hormones 627
- 19.10** Focus on Health & Medicine: Fat-Soluble Vitamins 629
- 19.11** Focus on Health & Medicine: Prostaglandins and Leukotrienes 631
 - 19.11A Prostaglandins 631
 - 19.11B Asthma and Leukotrienes 632
- Chapter Highlights 633

20 Carbohydrates 640

- 20.1** Introduction 641
- 20.2** Monosaccharides 642
 - 20.2A Fischer Projection Formulas 644
 - 20.2B Monosaccharides with More Than One Chirality Center 645
 - 20.2C Common Monosaccharides 647
- 20.3** The Cyclic Forms of Monosaccharides 648
 - 20.3A The Cyclic Forms of D-Glucose 649
 - 20.3B Haworth Projections 650
 - 20.3C The Cyclic Forms of Fructose, a Ketohexose 653
- 20.4** Reduction and Oxidation of Monosaccharides 654
 - 20.4A Reduction of the Aldehyde Carbonyl Group 654
 - 20.4B Oxidation of the Aldehyde Carbonyl Group 655
 - 20.4C Focus on Health & Medicine: Monitoring Glucose Levels 657
- 20.5** Disaccharides 658
 - 20.5A Focus on Health & Medicine: Lactose Intolerance 660
 - 20.5B Focus on Health & Medicine: Sucrose and Artificial Sweeteners 661
- 20.6** Polysaccharides 663
 - 20.6A Cellulose 663
 - 20.6B Starch 664
 - 20.6C Glycogen 665
- 20.7** Focus on the Human Body: Useful Carbohydrate Derivatives 666
 - 20.7A Glycosaminoglycans 666
 - 20.7B Chitin 667

- 20.8 Focus on the Human Body: Blood Types 668
Chapter Highlights 670

21 Amino Acids, Proteins, and Enzymes 676

- 21.1 Introduction 677
21.2 Amino Acids 678
21.2A General Features of Amino Acids 678
21.2B Stereochemistry of Amino Acids 679
21.3 Acid–Base Behavior of Amino Acids 681
21.4 Peptides 683
21.5 Focus on the Human Body: Biologically Active Peptides 687
21.5A Neuropeptides—Enkephalins and Pain Relief 687
21.5B Peptide Hormones—Oxytocin and Vasopressin 688
21.6 Proteins 690
21.6A Primary Structure 690
21.6B Secondary Structure 691
21.6C Tertiary and Quaternary Structure 694
21.7 Focus on the Human Body: Common Proteins 697
21.7A α -Keratins 697
21.7B Collagen 697
21.7C Hemoglobin and Myoglobin 698
21.8 Protein Hydrolysis and Denaturation 700
21.8A Protein Hydrolysis 700
21.8B Protein Denaturation 701
21.9 Enzymes 702
21.9A Characteristics of Enzymes 702
21.9B How Enzymes Work 704
21.9C Enzyme Inhibitors 705
21.9D Zymogens 707
21.10 Focus on Health & Medicine: Using Enzymes to Diagnose and Treat Diseases 707
21.10A Enzyme Levels as Diagnostic Tools 707
21.10B Treating Diseases with Drugs That Interact with Enzymes 708
Chapter Highlights 709

22 Nucleic Acids and Protein Synthesis 715

- 22.1 Nucleosides and Nucleotides 716
22.1A Nucleosides—Joining a Monosaccharide and a Base 716
22.1B Nucleotides—Joining a Nucleoside with a Phosphate 719
22.2 Nucleic Acids 721
22.3 The DNA Double Helix 723
22.4 Replication 726
22.5 RNA 729
22.6 Transcription 729
22.7 The Genetic Code 732
22.8 Translation and Protein Synthesis 733
22.9 Mutations and Genetic Diseases 736
22.10 Recombinant DNA 739
22.10A General Principles 739
22.10B Polymerase Chain Reaction 740
22.10C Focus on the Human Body: DNA Fingerprinting 742
22.11 Focus on Health & Medicine: Viruses 743
Chapter Highlights 745

23 Digestion and the Conversion of Food into Energy 751

- 23.1 Introduction 752
- 23.2 An Overview of Metabolism 753
 - 23.2A Stage [1]—Digestion 753
 - 23.2B Stages [2]–[4] of Catabolism 754
- 23.3 ATP and Energy Production 756
 - 23.3A General Features of ATP Hydrolysis and Formation 756
 - 23.3B Coupled Reactions in Metabolic Pathways 758
 - 23.3C Focus on the Human Body: Creatine and Athletic Performance 761
- 23.4 Coenzymes in Metabolism 761
 - 23.4A Coenzymes NAD⁺ and NADH 762
 - 23.4B Coenzymes FAD and FADH₂ 764
 - 23.4C Coenzyme A 765
- 23.5 The Citric Acid Cycle 766
 - 23.5A Overview of the Citric Acid Cycle 766
 - 23.5B Specific Steps of the Citric Acid Cycle 767
- 23.6 The Electron Transport Chain and Oxidative Phosphorylation 769
 - 23.6A The Electron Transport Chain 770
 - 23.6B ATP Synthesis by Oxidative Phosphorylation 771
 - 23.6C ATP Yield from Oxidative Phosphorylation 771
- 23.7 Focus on Health & Medicine: Hydrogen Cyanide 772
- Chapter Highlights 773

24 Carbohydrate, Lipid, and Protein Metabolism 778

- 24.1 Introduction 779
- 24.2 Understanding Biochemical Reactions 779
- 24.3 Glycolysis 782
 - 24.3A The Steps of Glycolysis 783
 - 24.3B The Net Result of Glycolysis 786
 - 24.3C Glycolysis and Other Hexoses 787
 - 24.3D Focus on Health & Medicine: Glycolysis and Cancer Cells 787
- 24.4 The Fate of Pyruvate 788
 - 24.4A Conversion to Acetyl CoA 788
 - 24.4B Focus on Health & Medicine: Conversion to Lactate 788
 - 24.4C Focus on Health & Medicine: Conversion to Ethanol 790
- 24.5 The ATP Yield from Glucose 791
- 24.6 Gluconeogenesis 793
- 24.7 The Catabolism of Triacylglycerols 794
 - 24.7A Glycerol Catabolism 794
 - 24.7B Fatty Acid Catabolism by β -Oxidation 794
 - 24.7C The Energy Yield from Fatty Acid Oxidation 797
- 24.8 Ketone Bodies 798
- 24.9 Amino Acid Metabolism 799
 - 24.9A Degradation of Amino Acids—The Fate of the Amino Group 800
 - 24.9B Degradation of Amino Acids—The Fate of the Carbon Skeleton 802
- Chapter Highlights 803

Appendices

- A Useful Mathematical Concepts A-1
- B Selected Answers to In-Chapter and End-of-Chapter Problems B-1

Glossary G-1
