

## **Target Your Reading**

Use this to focus on the main ideas as you read the chapter.

- **Before you read** the chapter, respond to the statements below on your worksheet or on a numbered sheet of paper.
  - Write an A if you agree with the statement.
  - Write a **D** if you **disagree** with the statement.
- **2 After you read** the chapter, look back to this page to see if you've changed your mind about any of the statements.
  - If any of your answers changed, explain why.
  - Change any false statements into true statements.
  - Use your revised statements as a study guide.

Before You Read A or D		Statement	After You Read A or D
	1	All matter, including solids like wood and steel, contains mostly empty space.	
	2	Scientists are able to pinpoint the exact location of an electron in an atom.	
	3	Electrons orbit a nucleus just like planets orbit the Sun.	
	4	The number of electrons in a neutral atom is the same as the atom's atomic number.	
	5	Noble gases react easily with other elements.	
	6	All elements transfer the same number of electrons when bonding with other elements.	
	7	Electrons in metals can move freely among all the ions in the metal.	
	8	Some atoms bond by sharing electrons between the two atoms.	
	9	Water molecules have two opposite ends, like poles in a magnet.	

Test yourself. Create questions and then read to find answers to your own questions.
