## Polygon Bingo

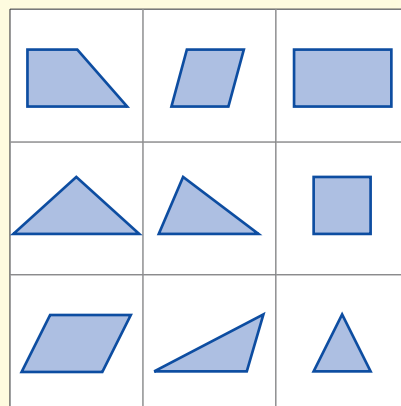

### ● GET READY!

**Players:** two

**Materials:** 10 counters, 1 number cube, marker,  
1 large red cube, 1 large blue cube, 2 square sheets  
of paper

### ● GET SET!

- Write *quadrilateral*, *trapezoid*, *parallelogram*, *rectangle*, *rhombus*, and *square* on different faces of the red cube.
- In the same manner, write *scalene*, *isosceles*, *equilateral*, *acute*, *right*, and *obtuse* on different faces of the blue cube.
- Create two boards like the one shown by drawing a different polygon in each square. Use no shape more than once.

### ● GO!

- The starting player rolls the number cube. If an even number is rolled, the player rolls the red cube. If an odd number is rolled, the player rolls the blue cube.
- The player covers with a counter any shape that matches the information on the top face of the cube. If a player cannot find a figure matching the information, he or she loses a turn.
- **Who Wins?** The first player to get three counters in a row wins.
