Problem-Solving Investigation: Act It Out

Mixed Problem Solving

For Exercises 1 and 2, use the act it out strategy.

1. BILLS Joaquin bought a DVD for $21. He gave the cashier two $20 bills. How many different combinations of $1, $5, and $10 bills can the cashier give him for change?

2. TENNIS Felix, Lolita, Tetsuo, Ling, and Maxine are on the school tennis team. When ranked from first to fifth, how many ways can they be ranked if Maxine is always first and Felix is always ranked above Tetsuo?

Use any strategy to solve Exercises 3 and 4. Some strategies are shown below.

PROBLEM-SOLVING STRATEGIES
- Use the four-step plan.
- Work Backward.
- Look for a pattern.
- Use logical reasoning.
- Act it out.

3. PUMPKINS Mr. Greene harvested pumpkins for selling at four markets. He sold one-fifth of his crop at the first market, 40 at the second, 25% of the remaining at the third, and twice what he sold at the second at the forth market. If Mr. Greene has one pumpkin remaining, how many pumpkins did he sell?

4. CHORES Kimberley has the choice of washing the car, mowing the lawn, or raking leaves on Saturday and baking a cake, washing the dishes, or doing the laundry on Sunday. In how many ways can she choose one chore for each day?

Select the Operation

For Exercises 5 and 6, select the appropriate operation(s) to solve the problems. Justify your solution(s) and solve the problem.

5. FUND-RAISER The drama club is selling 100 T-shirts for $15 each for a fund-raiser. The T-shirts cost a total of $623. If they sell all the T-shirts, how much money will be raised for the drama club?

6. DELICATESSEN A delicatessen offers the possibility of 180 kinds of sandwiches made with wheat, rye, white, or sourdough breads. If the delicatessen adds multi-grain bread to the menu, find the number of possible kinds of sandwiches the delicatessen now offers.

Using Sampling to Predict

Determine if each conclusion is valid. Then describe each sample.

2. To evaluate customer satisfaction, a grocery store gives double coupons to anyone who completes a survey as they enter the store. The store manager determines that customers are very satisfied with their shopping experience in his store.

3. To evaluate the integrity of underground water lines, the department of public works randomly selects 20 sites in each of 5 sectors of the city to unearth and observe the water lines. At 24 of the sites, the water lines needed repair. The department of public works concludes that one-fourth of underground water lines throughout the city need repair.
