- Shuffle the cards and then deal five cards to each player. Place the remaining cards facedown in a pile.
- A player spins the spinner.
- Using two cards, the player forms a pair whose sum results in the type of angle spun. A wild card represents any angle
 measure. Each pair is worth 2 points.
- If a pair cannot be formed, the player discards one card and selects another from the facedown pile. If a pair is formed, the player sets aside the two cards and gets 2 points. Then it is the other player's turn. If no pair is formed, it is the other player's turn.
- Who Wins? The first player to reach 20 points wins.
