

Contents

<i>Preface</i>		<i>vii</i>
Chapter 1	Introduction to Statistics and Data Collection	1
	Introduction	1
	Business Statistics	2
	Collection of Data	3
	Populations and Samples	6
	Nature of Statistical Data and Measurement Levels	7
	Scales of Measurement	8
	Types of Statistical Data	10
	Use of Statistics in Business and Economics	14
	Scheme of the Book	16
	<i>Chapter Summary</i>	17
	<i>Test Your Understanding</i>	18
	<i>Exercises</i>	18
Chapter 2	Summarizing and Presenting Statistical Data	21
	Introduction	21
	Univariate Frequency Distributions	22
	Terms Related to Frequency Distribution	24
	Bivariate Frequency Distributions	31
	Graphic Presentation of Frequency Distributions	33
	<i>Additional Solved Examples</i>	42
	<i>Chapter Summary</i>	48
	<i>Test Your Understanding</i>	49
	<i>Chapter Review</i>	50
	<i>Exercises</i>	50
Chapter 3	Measures of Central Tendency	58
	Introduction	58
	Central Tendency	59
	Requisites of a Good Average	59
	The Measures	60
	Arithmetic Mean	60
	Median	70
	Partition Values	76

Mode	81
Geometric Mean	88
Harmonic Mean	95
MS Excel and Measures of Central Tendency	101
Relationship between AM, GM, and HM	101
Difference between Mathematical and Positional Averages	102
Choice of an Average	103
<i>Additional Solved Examples</i>	105
<i>Chapter Summary</i>	116
<i>List of Formulae</i>	117
<i>Test Your Understanding</i>	119
<i>Chapter Review</i>	121
<i>Exercises</i>	122
<i>Applications</i>	134

Chapter 4 Measures of Variation 138

Introduction	138
Variability and Decision Making	139
Absolute and Relative Variation	139
Measures of Variation	140
Mean Deviation	146
Standard Deviation	150
MS Excel and Measures of Variation	162
Relationship between Arithmetic Mean and Standard Deviation	162
Relationship between Different Measures of Variation	166
Lorenz Curve	167
<i>Additional Solved Examples</i>	169
<i>Chapter Summary</i>	180
<i>List of Formulae</i>	181
<i>Test Your Understanding</i>	183
<i>Chapter Review</i>	185
<i>Exercises</i>	186
<i>Applications</i>	194

Chapter 5 Measures of Skewness and Kurtosis, and Moments 195

Introduction	195
Skewness	195
Measurement of Skewness	200
Difference Between Dispersion and Skewness	206
Kurtosis	207
Five-Point Summary	210
Moments	213
<i>Additional Solved Examples</i>	221
<i>Chapter Summary</i>	230
<i>List of Formulae</i>	230

Test Your Understanding 232
Chapter Review 233
Exercises 234

Chapter 6 Theory of Probability 240

Introduction 240
 Meaning of Probability 241
 Basic Concepts 241
 Approaches to Calculation of Probability 245
 Marginal, Joint and Conditional Probability 248
 Probability Theorems 250
 Probability Trees 258
 Bayes' Theorem 260

Additional Solved Examples 264
Chapter Summary 273
List of Formulae 274
Test Your Understanding 275
Chapter Review 276
Exercises 277
Appendix 6 288

Chapter 7 Statistical Decision Theory 291

Introduction 291
 Decision-Making Process 292
 Decision Rules 295
 Expected Value of Perfect Information 301
 Decision-Making When Pay-Offs are in Terms of Costs 302
 Decision-Making Using Posterior Probabilities : Bayesian Decision Rule 304
 Decision Trees 310

Additional Solved Examples 315
Chapter Summary 332
List of Formulae 332
Test Your Understanding 333
Chapter Review 334
Exercises 335
Applications 348

Chapter 8 Probability Distributions 351

Introduction 352
 Some Examples of Probability Distributions 352
 Discrete and Continuous Random Variables 354
 Expected Value and Standard Deviation of a Random Variable 355
 Some Standard Probability Distributions 356
 MS Excel and Probability Distributions 383

	<i>Additional Solved Examples</i>	384
	<i>Chapter Summary</i>	398
	<i>List of Formulae</i>	399
	<i>Test Your Understanding</i>	401
	<i>Review Questions</i>	402
	<i>Exercises</i>	403
	<i>Applications</i>	413
Chapter 9	Sampling and Sampling Distributions	416
	Introduction	416
	Reasons for Sampling	418
	Sampling Design: Methods of Sampling	418
	Statistics and Parameters	424
	Sampling and Non-sampling Errors	425
	A General Idea of Sampling Distributions	426
	Sampling Distribution of Mean	427
	Sampling Distribution of Number and Proportion (of Successes)	435
	Sampling Distribution of Difference Between Means	437
	Sampling Distribution of Difference Between Proportions	438
	<i>Additional Solved Examples</i>	439
	<i>Chapter Summary</i>	444
	<i>List of Formulae</i>	446
	<i>Test Your Understanding</i>	446
	<i>Review Questions</i>	448
	<i>Exercises</i>	449
Chapter 10	Theory of Estimation	455
	Introduction	455
	Estimation: Point and Interval Estimates	456
	Confidence Interval for Population Mean: Large Samples	459
	Confidence Interval for Population Mean: Small Samples	465
	Confidence Interval for Proportion of Successes, π	470
	Confidence Intervals for Estimating Difference Between Two Population Parameters	472
	<i>Additional Solved Examples</i>	477
	<i>Chapter Summary</i>	483
	<i>List of Formulae</i>	484
	<i>Test Your Understanding</i>	485
	<i>Review Questions</i>	486
	<i>Exercises</i>	487
Chapter 11	Testing of Hypotheses: Means and Proportions	492
	Introduction	492
	Section 1: Methodology of Hypotheses Testing	493
	Errors in Hypothesis Testing	502
	p -Value Approach to Hypothesis Testing	507

Section 2: One-Sample Tests of Hypotheses 509

Testing a Hypothesis for Mean: Normally Distributed

Population with Known σ 509Testing a Hypothesis for Mean When σ is Known: Large Sample 510Testing a Hypothesis for Mean When σ is Unknown: Large Sample 511Testing a Hypothesis for Mean When σ is Unknown: Small Sample 513

Testing for Population Proportions: Large Samples 516

Section 3: Two-Sample Tests of Hypotheses 517Test for Two Independent Sample Means: Large Samples,
Standard Deviations Known 518Test for Two Independent Sample Means: Large Samples,
Standard Deviations not Known 520Test for Two Independent Sample Means: Small Samples, Standard
Deviations not Known 521

Test for Difference Between Means: Dependent Samples 524

Testing for Difference Between Proportions of Successes 527

Additional Solved Examples 528*Chapter Summary* 538*List of Formulae* 539*Test Your Understanding* 540*Chapter Review* 542*Exercises* 543*Application* 556**Chapter 12 Tests of Variance and Analysis of Variance (ANOVA) 558**

Introduction 558

Tests About Variances 560

Testing the Population Variance Using Chi-Square 562

Testing the Assumption of Equal Population Variances 570

One-Way Analysis of Variance (ANOVA) 571

Relationship Between the t -test and the F -Test 580

Two-Way Analysis of Variance 582

Additional Solved Examples 586*Chapter Summary* 594*List of Formulae* 595*Test Your Understanding* 596*Chapter Review* 598*Exercises* 598**Chapter 13 Simple, Multiple, and Partial Correlation Analysis 609**

Introduction 609

Correlation Analysis 610

Simple Correlation 611

Correlation in Grouped Data 619

Testing the Significance of Correlation Coefficient 622

	Rank Correlation	625	
	Multiple and Partial Correlation	628	
	<i>Additional Solved Examples</i>	630	
	<i>Chapter Summary</i>	635	
	<i>List of Formulae</i>	636	
	<i>Test Your Understanding</i>	637	
	<i>Chapter Review</i>	639	
	<i>Exercises</i>	640	
Chapter 14	Simple and Multiple Regression Analysis		647
	Introduction	647	
	Simple Regression Model	648	
	Multiple Regression Analysis	672	
	<i>Additional Solved Examples</i>	680	
	<i>Chapter Summary</i>	688	
	<i>List of Formulae</i>	689	
	<i>Test Your Understanding</i>	690	
	<i>Chapter Review</i>	692	
	<i>Exercises</i>	692	
	<i>Application</i>	701	
Chapter 15	Chi-square and Other Non-Parametric Tests		702
	Introduction	702	
	Chi-Square Test	704	
	Runs Test	718	
	Sign Test	719	
	Mann–Whitney <i>U</i> -Test	721	
	Kruskal–Wallis <i>H</i> -Test	724	
	Spearman’s Rank Correlation Test	726	
	<i>Additional Solved Examples</i>	728	
	<i>Chapter Summary</i>	734	
	<i>List of Formulae</i>	735	
	<i>Test Your Understanding</i>	736	
	<i>Chapter Review</i>	737	
	<i>Exercises</i>	737	
Chapter 16	Index Numbers		747
	Introduction	747	
	Univariate Index Numbers	748	
	Composite Index Numbers	752	
	Simple Aggregative Index Numbers	753	
	Simple Average-of-Relatives Indices	754	
	Weighted Aggregative Index Numbers	756	
	Weighted Average-of-Relatives Index Numbers	760	
	Value Index	761	

Tests of Adequacy of Index Numbers	762
Consumer Price Index Number (CPI)	764
Productivity Index Numbers	767
Base Shifting	768
Deflating	769
Splicing	771
Problems in the Construction of Index Numbers	772
<i>Additional Solved Examples</i>	773
<i>Chapter Summary</i>	783
<i>List of Formulae</i>	784
<i>Test Your Understanding</i>	785
<i>Chapter Review</i>	786
<i>Exercises</i>	787
<i>Applications</i>	795

Chapter 17 Time Series Analysis and Forecasting 798

Introduction	798
Components of a Time Series	800
Decomposition of Time Series	801
Analysis of Trend	802
Quadratic Trend Equation: Second-Degree Parabolic Trend	813
Exponential Trend Equation: Geometric Straight Line	817
Seasonal Variations	821
Forecasting Using Moving Averages and Exponential Smoothing	829
Exponential Smoothing	830
<i>Additional Solved Examples</i>	836
<i>Chapter Summary</i>	842
<i>List of Formulae</i>	843
<i>Test Your Understanding</i>	844
<i>Chapter Review</i>	846
<i>Exercises</i>	847
<i>Application</i>	854

Chapter 18 Statistical Quality Control 856

Introduction	856
Process Control: Using Control Charts	857
Control Charts for Variables	859
Control Charts for Attributes	868
Acceptance Sampling	873
<i>Additional Solved Examples</i>	880
<i>Chapter Summary</i>	886
<i>List of Formulae</i>	887
<i>Test Your Understanding</i>	888
<i>Chapter Review</i>	888
<i>Exercises</i>	889
<i>Application</i>	894

Appendix A	Statistical Tables	895
Appendix B	Key: <i>Test Your Understanding</i>	910
Appendix C	Answers to Exercises	912
Bibliography		925
Index		927
